Lesson Plans and Assessment

Grade R

basic education
Department:
Basic Education
REPUBLIC OF SOUTH AFRICA

How to use this book

Dear Grade R Teacher

Welcome to the 'Laying Solid Foundations for Learning' Lesson Plan Book. This book forms part of the 'Laying Solid Foundations for Learning' Grade R kit.

Your 'LAYING SOLID FOUNDATIONS FOR LEARNING' kit contains:

- 20 themed POSTERS with supporting questions to encourage discussion;
- A Big Book STORYBOOK containing 20 theme-linked stories;
- This LESSON PLAN BOOK, packed with daily and weekly LESSON PLANS plus ASSESSMENT ACTIVITIES for the year;
- A TEACHER'S GUIDE, packed with practical classroom ideas and more;
- A LEARNERS' RESOURCE BOOK filled with flashcards, picture cards and games;
- A LEARNERS' WORKBOOK containing reproducible worksheets; and
- A DVD demonstrating how to use these materials in your classroom plus tips for teaching numeracy, literacy and life-skill concepts to your Grade R learners.

PLEASE NOTE: Not all of the kits supplied contain the DVDs. For more information about where to obtain copies of the DVDs, please phone (011) 482-4053 or email info@eish-team.co.za

How to use the 'Laying Solid Foundations for Learning' Grade R kit:

The 'Laying Solid Foundations for Learning' programme for Terms 1 to 4 is organised into **20 themes**, each of which contains enough work for two weeks. In other words, there is 40 weeks' worth of work here. You should aim to cover five themes per term (a term being roughly ten weeks long).

For each theme there is a **poster** and a **Big Book story**. Supporting **flashcards** and **picture cards** can be found in the Learners' Resource Book, while the **worksheets** can be found in the Learners' Workbook. There are additional teacher resources – such as **letter templates** and pegboards.

How to use this 'Laying Solid Foundations for Learning' Lesson Planner Book

Lesson planning involves three easy steps:

1. The daily lesson plan
2. The weekly lesson planner
3. Assessment

This book contains **daily lesson plans**, **weekly lesson planners** and **assessment tasks** for each two-week theme. The daily lesson plans and weekly lesson planners will give you ideas for using the posters, stories, worksheets and flashcards in the 'Laying Solid Foundations for Learning' kit.

What is the daily lesson plan?

The daily lesson plan provides activities and ideas for one whole day in the theme. It begins with arrival time and ends with story time. It has been designed so that you can use it as it is; however, if you only want to use certain parts of it you are welcome to do so.

Why is there only one daily lesson plan per theme?

Each of the 20 themes in this programme are designed to be used over a two-week period or 10 days. We have provided you with a completed daily planner to get you started. You will therefore need to plan an additional nine daily lessons to complement what you have here. You will find a blank daily lesson plan at the back of this book. Make copies of it and use these for your planning.

This programme gives you the freedom to plan your teaching and learning. This is very important because no two classrooms are the same.

What is the weekly planner?

The weekly planner is exactly that ... a planner. While we have included some exciting activity ideas for you to incorporate into your lessons, we have also left space for you to fill in your own favourite activities.

The activities on the weekly lesson planner can be used in the first or second week of the two-week theme. You can write directly onto the planner. If you prefer, make copies of the blank weekly planner at the back of this book. Then copy the activities that appeal to you onto the weekly lesson planner provided for the theme and include your own activities to complete it so that it suits your teaching style, as well as the level and pace of your learners.

How to integrate your own favourite themes into the 'Laying Solid Foundations for Learning' resource kit:

The 'Laying Solid Foundations for Learning' Grade R kit has 20 learner-friendly themes. If there are themes of your own that you want to include, feel free to do so. Find a place where you can slot them in or choose which of the themes in the kit you would like to replace.

How the 'Laying Solid Foundations for Learning' kit helps with assessment:

At the end of the lesson plans for each theme you will find two or more **assessment tasks** that you can use to evaluate your learners' progress. A **recording sheet**, in the form of a checklist or rubric, is included for you to record your observations.

We trust that both you and your learners will enjoy working through this programme with us!

DAILY PLANNER: Weeks 1 and 2

My body

Phonics focus: a

Day: Tuesday

Term: 1

Big Book story: *Afro Ant's Adventure*

Poster: My body

1. Arrival time

Welcome learners and their parent or caregiver as they arrive. In each locker place a coloured card with a picture of a body part on it (six body parts to make up one body – each on the same colour card). Tell learners to place their bags in their lockers, collect their body card and bring it with them to the carpet for the morning circle.

2. Health check

As you greet each learner and as they settle in, take note of their appearance. Pay attention to details like how they are walking, i.e. are they favouring any part of their body – indicating pain or discomfort? Make a note and keep an eye on that learner for the day. A meeting with the parent or caregiver may be necessary.

3. Morning circle

Read the theme message (sentence strip): Today we are learning about our body. Ask them to name the body part on their cards. What can they do with this body part? Show me. Now ask the learners to find all the other cards to complete their body. They should get up and move around to find friends with the same colour cards, e.g. learners with the six yellow cards get together, learners with the six blue cards get together etc.

4. Work time

Revise the activities that learners did the previous day. Play a quick guessing game to check their understanding of what was covered. Describe a body part and what it can do and learners have to guess what it is. Explain any challenging work station activities.

Work time: work stations

Life Orientation table: Make body facing cards. Paste pictures of different people, cut from magazines, onto cards. Punch holes around each card. Learners thread shoelaces in and out of the holes around the card.

Science table: Learners make body puzzles. They cut out individual body parts from magazines and paste them together to form a complete body.

Life Orientation table: Learners use playdough to form a person's body.

Numeracy table: Learners copy pegboard patterns using the templates in the Learner Resource Book.

5. Small group time

Show learners an apple. Ask them to say what it is. Say the name very slowly – emphasising each sound. Ask learners what sound they hear at the beginning of the word 'apple'. Let them repeat the 'a' sound a few times. Tell them that all sounds that we hear in words have a letter to show that sound.

Introduce learners to the letter 'a'. Show the flashcard for the letter 'a'. Ask learners to think of another word that begins with 'a'. If they can't, show actual objects or pictures of ant, astronaut, axe and arrow. Using chalk draw a large 'a' on the carpet or concrete. Guide learners to walk along the 'a' letter in the correct formation. Each time, encourage them to repeat the sound. Allow each learner to trace the shape on the sandpaper letter.

Provide each learner with a small tray filled with sand. Learners practise writing the letter over and over again.

Learners can now complete Worksheet 2.

6. Tidy up time

As learners move around the room tidying up their games and toys, call out a body part. They can then only use that body part to tidy up, until you call out another body part. Make this activity fun but not too rowdy.

12. Story time

Learners settle comfortably on the carpet to get ready for the story. Hold up a picture of an ant, or a plastic toy ant if available. Ask learners to talk about the ant's body. Is it big? Is it strong? Are their own bodies stronger than an ant's? Are they happy with their bodies? What would they change? Introduce the story by saying you are going to tell them about a little ant who got so tired of being little that he decided to do something about it. Ask what they think the ant will do? Read the story on page 1 of the Big Book. Stop where necessary to talk about the events.

After reading, ask learners if they think Afro Ant is now happy with his body. What problems did he have when he got so big? Ask if they would have similar problems if they got too big. Refer to the things they said they would change about their bodies. Guide learners to understand that their bodies are fine just as they are and, like Afro Ant, they mustn't wish to get too big, too quickly.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 3 as a backdrop for the theme table. Place a coloured tablecloth on the table.

Display Poster 1 and flashcards found in the Learner Resource Book on your table. Also put a mirror on the table; place it at an angle so that learners can see themselves in it, but make sure that it is secured to the table. Then add objects which we use on our bodies for personal hygiene and appearance – creams, nail files and scissors, facecloths, sponges, make up brushes, deodorant and perfume containers (with water inside), razors (with no blades) etc.

Also put out cards with pictures of various body parts. Nearby have a basket with either actual objects or pictures of things we use. Learners match each item to the correct body part, e.g. a pencil would be placed with a hand, a ball with a foot, a spoon with a face (mouth).

Fantasy corner

A full length mirror would be an excellent asset to the fantasy corner. Learners love to look at themselves, especially when in character. For this fantasy space, create a 'body workout' centre. Make it an open space with minimal furniture. On the floor, place non-slip mats. On the wall around this space have pictures showing bodies in different positions (or even photographs of the children themselves in different positions). Learners go to this space and use it to stretch, touch their toes, copy the cards, etc. To make it seem more realistic, have paper towels that learners can use to wipe their 'sweaty' faces and even glasses of water to drink.

7. Hand washing

Before eating it is important for people to wash their hands. The learners need to understand the importance of having clean hands, especially before touching food.

As they wash their hands make sure learners are washing correctly and adequately. You can make up silly rhymes to remind learners of the order:

First wet your hands, then soap them well. Rub, rub, rub, till you see bubbles. Now rinse your hands and get them dry. You're all done now – off you fly!

8. Snack time

As learners sit down to eat their lunch encourage them to first say thanks for the food they are about to eat.

As they eat, chat about who made their lunch.

What parts of the body did that person use to make the lunch?

What steps did they take?

Using their hands only, learners can mime some of the actions – cutting bread, spreading butter, etc.

9. Music and movement ring

Begin the ring by singing a popular body-related song with the learners, e.g. *Head and shoulders, knees and toes*.

Play some music and encourage learners to walk around the space without touching or bumping into anyone else. Stop the music. Hold up a certain number of fingers. Learners have to get into groups of that number. In their group they then have to hold hands and do something creative with their bodies. Encourage them to do something as a group rather than as individuals. You can also call out a part of the body and in their groups; learners have to use that part of the body in a creative position.

10. Outdoor play

On a large cardboard box, draw a large face. Cut out large holes where the mouth, eyes and ears should be.

Provide learners with bean bags. Encourage them to aim the bean bags into the holes. They can get a point for each time they get the bean bag in. The learner with the most points can get a small reward.

11. Hand washing and toilet time

After play, lead the learners to the bathroom. They can walk like big, strong giants. Repeat the hand washing song from earlier. Make sure all learners wash their hands after using the toilet.

WEEKLY PLANNER: Weeks 1 and 2

My body

Arrival
15 - 30 minutes

Monday	Tuesday	Wednesday	Thursday	Friday
Welcome each learner. In each locker place a coloured card with a picture of a body part on it (only do six body parts in total). Have six baskets available. Learners must identify the body part and place the card in the correct matching basket.			Welcome each learner. Inside each learner's locker place a coloured counter or cube that matches the coloured body part cards. Learners then go to the matching basket where all six body parts have been mixed up. They need to re-arrange the pieces to create a completed body.	

Morning circle
10 - 15 minutes

Introduce the theme for the next two weeks. Discuss the theme table and all the items on it. Encourage learners to talk about their own bodies. What do they use their bodies for? How do certain parts of their body help them? Go through the labels on the poster and get learners to identify the various parts of the body.		Learners sit on the carpet. Ask them to do various exercises with their bodies, e.g. wiggle your fingers, stamp your feet, pat your tummy, etc. 	Revise all that learners have learnt this week. Ask leading questions that will check their understanding. Turn learners' attention to the poster and the labels of the various parts of the body. Revise the names of the body parts. Hold up matching flashcards of the labels of the parts of the body. Read one slowly and get learners to identify it. Let them match it to the label on the poster. Call up a learner to Prestik the flashcard over the label on the poster.
---	---	--	---

Work time and small group time

SMALL GROUP TIME:
10 - 15 minutes

TOTAL TIME:
45 minutes

Work time activities: 1. Life Orientation focus - This is me – let learners look at themselves in mirrors and describe what they see. - Learners make bodies by cutting out pictures of different body parts from magazines and assembling them. - Learners do puzzles. 2. Creative focus Learners do body rubbings using cardboard cut-outs of different body pictures. They place these under paper and rub over with crayon.	Work time activities: 1. Creative focus - Learners trace around their hands and feet. Cut these out and make a class mural. - Learners make playdough bodies. 2. Life Orientation focus Learners complete the body (symmetry) on Worksheet 1. 3. Technology focus Baking: Learners make biscuit faces, using sweets for facial features. 	Work time activities: 1. Life Orientation and Technology focus - Learners do large body tracings. They trace around one another's bodies, cut them out and paint them. - Learners make hand and foot prints. 2. Literacy focus Learners complete their 'Me book' from yesterday's lesson. 3. Creative focus Learners make faces on paper plates using waste materials, e.g. buttons for eyes, a cork for a nose, etc. 	Small group time activity: Life Orientation focus Get learners to name all the body parts on the poster. Now tell them to: Point to your ... Touch your ... Move your ... Touch your ... (ear) with your ... (thumb) etc. Make a body dice from a cubed box or from cardboard. On each of the six sides place a picture of a body part. Pass the dice around so that each learner has a turn to throw it, and then to draw that body part on a piece of paper. The dice goes around the circle until all learners have drawn a full body.	Small group time activity: Life Orientation focus Encourage learners to describe what their bodies can do. Use action words like 'walk', 'run', 'jump', etc. Prepare cards of people and cut them in half. Learners match the tops and bottoms. Play a fun memory game with the cards.	Small group time activity: Literacy focus Revise action words from previous day's activity: 'I run', 'walk', 'hop', etc. Show learners flashcards for 'I'. Learners practise writing the letter 'I' in sand trays. Provide a sheet of paper folded in half. Learners can make a 'Me book', including pictures of themselves hopping, walking, jumping, etc. Learners glue the pictures onto the pages. On the cover they draw themselves. They write the word 'I' on each page. Write the action word for them. Read through each book a few times with the group.	Small group time activity: Numeracy focus Provide six counters each for the members of the group. Learners count their counters out loud. Call out various problems for them to solve: <i>Hold four counters in your hand ... get one more ... how many do you have now?</i> Focus on one more and one less only. Show learners the flashcards for the numeral 1 and the word 'one'. Stick one counter onto the flashcard. Ask: How many? Learners can practise writing the number 1 in the sand trays.	Small group time activity: Numeracy focus Get learners to use their bodies to count to 6. They can clap hands, stamp feet, pat tummies, etc. Revise the number 1 flashcard. Ask: what number is this? Learners can practise writing 1 in the air. Get learners to stand up and talk about their heights: who is the tallest, shortest, taller than, shorter than, etc. Measure learners' heights and create a height chart of the class. Learners can even draw a small picture of themselves to place on the graph.
--	---	---	--	---	---	--	---

Music and movement ring

You will need the body dice and some music.

Play music while learners move around the room. Stop music.

Learners take turns to throw the dice and then do something interesting using the body part the dice lands on.

TIDY UP TIME
HAND WASHING
SNACK TIME

Begin with the song *Tommy Thumb*.

Play the movement game *Do this, do that*. Mime an action and learners have to follow, e.g. Say 'Do this' and clap your hands. Learners must copy you. But if your action is preceded by the instruction 'Do that', then learners must not copy it. Those that do must sit out for a short time, after which they can join the game again.

Begin with a song, e.g. *The Hokey Pokey*, or any other appropriate movement song. Hand out a bean bag to each learner. Let them play with their bean bag for a few minutes. Then ask learners to balance the bean bag on their head. Play some music and get learners to move around to it, challenge them to do some actions while balancing the bean bag. Call out a different part of the body and learners have to balance their bean bag on it. Again, they must move around to music.

Outdoor play

Provide hula hoops for the learners.

They can twirl the hoops on different parts of their bodies (waist, arm, wrist, ankle, etc.)

Count who can make the most twirls with the hoop.

Provide different sized balls. Learners can catch / throw / aim balls into boxes, etc.

Encourage learners to play ball games with one another, e.g. throw or kick to one another, play Pig-in-the-middle, etc.

Story time

Encourage learners to tell the class stories about themselves when they were younger or babies.

They can first describe their bodies and how they have changed since then.

Before reading a story related to the body, ask learners to talk about any accidents they may have had, where they broke or damaged a certain part of their body. Ask questions like: 'What did you break?' 'How did it happen?' 'Did you have a plaster cast?' 'How long was it on for?'

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Afro Ant's adventure*
- demonstrated understanding of the above story
- identified the 'a' sound at the beginning of words
- sang and recited songs
- talked about their own bodies and what they use their bodies for
- discussed how certain parts of their body help them
- matched labels on the poster to various parts of the body
- segmented names into syllables
- read the sentence strips with the teacher and class
- practised the letter formation of the letter 'a'
- used language for learning

This assessment task may take several days to complete. You can do it on a one-to-one basis with each learner or in a small group.

TASK

Part One

- Use the letter formation assessment wheel to assess this activity.
- Put the letter 'a' from the Learner Resource Book series on a table.
- Ask each learner to 'read' the letter 'a'.
- Now ask learners to trace the letter 'a' saying what they are doing. Check that they start and end in the correct positions.
- Finally ask each learner if they know words that begin with 'a'. Remember to say the sound and not the name, i.e. 'a' not 'ay'.

Part Two

- Use Poster 1.
- Ask the learners to name each part of the body.
- Ask the learners to name the actions being performed in each little picture around the poster.
- Ask the learners to name the body part being used in each of these action pictures, e.g. legs to run.

Part Three

- Use the sentence strip: I _____.
- Place the action words and matching pictures on the table.
- Say: Here is the flashcard for 'walk'. Match it to a picture.
- Let the learner make the sentence. Ask the learners to 'read' and point to the words when reading.

Assessment wheel

Use this assessment wheel to assess Part One of the task on this page.

4 Well developed	3 Age appropriate	2 Still developing	1 Intervention needed
------------------	-------------------	--------------------	-----------------------

Grade R: Term 1				
Holistic rubric for Literacy Assessment Task Part Two and Part Three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
The learner is able to:				
Oral:				
1. Follow the instructions				
2. Answer questions				
3. Hear and clap syllables in words				
Phonics:				
4. Identify the 'a' sound at the beginning of words				
5. Identify 'a' sounds in the environment				
Reading:				
6. Recognise different parts of the body				
7. Explain what own body can do				
8. Can use an action word in own sentence				
9. Recognise the 'a' letter symbol in print				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted to 5 and more
- were introduced to the number 1
- were introduced to the shape of a circle
- were able to name 'one more' and 'one less'
- worked concretely comparing and ordering objects using appropriate vocabulary to describe length (e.g. tall, short, longer, shorter).

This assessment task may take several days to complete. You can do it on a one-to-one basis with each learner or in a small group.

TASK

- Place five counters in front of the learner.
- Ask the learner to tell you how many counters there are altogether.
- Then let the learner count the counters.
- Ask the learner to hold up one counter, then two counters, etc.
- Show learner the flashcards for '1' and 'one'. Ask them to make the number. They can use any medium to make the number, e.g. plasticine, crayon.
- The learner must find five different items of which there are only one in the classroom, e.g. the door, the teacher's table, a dustbin.

Grade R: Term 1		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Count the items		
2. Identify the number one / 1		
3. Write the number 1 correctly		
4. Identify single items in the environment		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skills-linked activities that required them to name body parts, list the various actions they can do with their bodies, and copy those actions using their bodies. Learners were also required to identify basic rights and responsibilities they and others have in the classroom.

Show learners the following pictures and ask them to:

- name each of the various body parts
- name the action
- name the body part used to complete the action

See if learners are able to apply what they have learned over the past two weeks when looking at these pictures. Record your observations.

DAILY PLANNER: Weeks 3 and 4

Phonics focus: v

Day: Thursday

Term: 1

My senses

Big Book story: *Vusi and the vuvuzela*

Poster: My senses

1. Arrival time

Welcome learners and their parent or caregiver as they arrive. In each locker place an object from the theme table – something that makes a sound, something textured you touch, or a food item to taste, etc. Learners bring this item with them to the carpet for the morning circle.

2. Health check

As each learner arrives at school evaluate their general health and appearance. Remind parents or caregivers that at any sign of a cold, flu or other illness it is best to keep the child at home. This will help them to recover faster and will also prevent the illness from spreading to the rest of the class.

3. Morning circle

Read the theme message (sentence strip): Today we are learning about our senses. Get each learner to name the object they brought from their locker. Which sense are they using to examine that object? Learners can then group themselves according to the main sense they used to experience their object. On A3 size paper cut out an ear, eye, mouth and hand. Each group member can draw their object on the cut-out that shows the sense they used. Display pictures. Use the sentence strip: I (see, hear, touch, smell, taste) with my _____. (eyes, ears, hands, nose, tongue).

4. Work time

Revise the activities that learners did the previous day during the small group time activity, especially if they are going to work on a similar activity during their independent work time. Play a quick listening game *Listen and do*, e.g. put your hands in the air, touch your toes, etc.

Work time: work stations

Science table 1: Learners make a fabric collage (to explore touch and texture).

Science table 2: Learners make a rice or bean shaker using a plastic box or container (to explore sense of hearing).

Science table 3: Learners make binoculars using two toilet paper rolls (to explore sense of sight).

Science/Life Orientation table: Learners play with smelly playdough: make playdough and add an essence such as lemon.

5. Small group time

Pass around vanilla essence or sticks for learners to smell. Can they name the smell? It's vanilla. Can they name the sound it starts with?

Introduce learners to 'v'. Show them a vuvuzela. Go outside and give each child the opportunity to blow it, and to make the sound 'v' in the sand.

Show the sandpaper letter 'v'. Get learners to form the letter with their fingers on the card and in the air.

Now ask learners to think of other words that start with the 'v' sound.

Show actual objects or pictures of the following:

van, vest, volleyball, vase, vegetables, vinegar, vitamins, volcano, vet, violets, etc.

Now provide each learner with a small sand tray. Learners practise writing the letter 'v'. They can then complete Worksheet 3.

6. Tidy up time

Get learners to tidy up all the toys and materials they were using throughout the morning. Take three sound items from the theme table (bell, shaker and tambourine). When learners hear the one, they must move faster. When they hear another, they slow down. When they hear the last one, they stop.

8. Snack time

As learners sit down to eat their lunch, encourage them to first say a word of thanks for the food they are about to eat.

As they eat, get learners to remain absolutely silent for a minute.

What can they hear?

Ask them what they can taste.

Is it something sweet or salty?

12. Story time

Learners sit comfortably on the carpet ready for their story. Open the Big Book and turn to the story *Vusi and the vuvuzela*.

Talk about the cover. Ask: Who is this? What sound does his name begin with? Ask learners if they can guess what the story is about.

If someone blows a vuvuzela, what sound do you hear? Is it a loud sound or a soft sound? Read the story, stopping where necessary to check that learners understand.

Point out any new or difficult words that may need explanation.

Discuss the experiences Vusi had with each different instrument. Can learners name which senses he used throughout the story?

Help learners to orally recount the events in the story.

This will check their understanding, visual and auditory memory.

7. Hand washing

Remind learners of the importance of having clean hands before eating. Remind them of the sequence of washing hands: turn on tap – wet hands – rub the soap on – lather it up – rub hands all over and in between the fingers – rinse hands with clean water – dry hands.

9. Music and movement ring

Begin the ring by singing *Ten fat sausages*. Divide learners into groups of ten. They can then act out the song. Ask learners which sense or senses they use when frying sausages.

Ask learners to think about what sounds they can make with their bodies. Do a few of these together as a class.

10. Outdoor play

Set up a mini obstacle course for learners to practise their balancing skills. Use benches, planks, rope, tyres, etc. Encourage learners to move from one object to the other by balancing on them. They can also crawl under, over, etc.

11. Hand washing and toilet time

After play, lead the learners to the bathroom. As they walk, call out STOP, and then one of the senses, e.g. SIGHT. Learners have to look around and name something they see.

Go through all the senses while the learners are using the toilet and washing up.

Theme table

Place the poster and labels appropriate for this theme on the table. Use any coloured cloth to cover the table. Place activities on the table that will match all the senses. Here are some ideas:

- Touch:** Use a cardboard box with a hole in the top (feely box). Have one set of items inside the box and a matching set of items in a basket next to it. Learners feel inside the box for an item but do not look at it. They must find the matching object in the basket.
- Sight:** Display a photograph album, animal magazines, kaleidoscopes, binoculars, etc.
- Smell:** Make a smelling tree. Tie small opaque bags to a branch which you have 'planted' in a small pot. Inside the bags place various items that have an interesting smell, for example, cloves, vanilla, cinnamon, perfume soaked cotton wool, potpourri, rose petals, etc.
- Taste:** On paper plates put out small items that learners can taste. (Include plastic forks that can be washed.)
- Sound:** Have two sets of various shakers in tins or boxes. Learners shake the tins and match the pairs that make the same sound.

Fantasy corner

Create a sensory filled space. Have items that learners can use to explore their senses: Braille books, glasses, telescopes, musical instruments, binoculars, etc. You can even create a space similar to an optometrist's examination room, with a large piece of cardboard with various sized letters on it, and different pairs of glasses for learners to try on (with no lenses), etc.

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes		Welcome each learner. In each locker place an item that matches a certain sense, for example, an item that makes an interesting sound or has an interesting smell. Tell learners to bring their item with them to the morning ring.		Welcome each learner. In each locker place an item that we taste. Tell learners to bring their item with them to the morning ring.	
Morning circle 10 - 15 minutes	Introduce the theme for the next two weeks. Ask learners if they know what they will be learning about. Discuss the theme table and all the items on it. Encourage learners to name the various ways we experience and explore our world using our senses.	Prepare and use the following sentence strips: I (see, hear, touch, smell, taste) with my _____ (eyes, ears, hands, nose, tongue).		Ask learners to name the items they brought onto the carpet. What do they all have in common? (They are all things we eat.) Can we group them further, for example: fruit, vegetable, sweets, etc. Let learners have a taste of their food item and describe what it tastes like. What does it make them think of?	
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes	Work time activities: 1. Creative focus Learners make a collage: 'Things I like to hear'. 2. Creative focus Spread shaving foam on the table for learners to experiment with. 3. Creative/ Numeracy focus Learners follow and create patterns using pegboards and the pegboard cards in the Learner Resource Book.	Work time activities: 1. Literacy focus Learners make a book of senses. They cut out magazine pictures that match a sense and paste each one onto a large eye, mouth, nose, etc. 2. Creative focus Learners make a texture collage (include interesting textures like sandpaper). 3. Technology focus Learners use paper plates to make tambourines.	Work time activities: 1. Technology focus Baking: Learners make fruit salad. 2. Science/Creative focus Learners make a nature collage using sticks, leaves, sand, etc. 3. Creative focus Learners make chalk drawings. 4. Creative focus Learners do blow painting. They drip paint onto paper and then use a straw to blow the paint along the page.		
Music and movement ring	 Make popcorn. Let learners explore some raw corn: how does it feel, taste, smell, etc? Make the popcorn, and while it's popping, ask learners what they can smell, hear and see. Be very careful not to let children too near to the hot pot. Each learner can then draw a picture. Learners say a sentence about their picture for you to write.	 Learners bring the tambourines they have made with them to the carpet. They can use these to keep a beat while singing a previously learnt song. Teach learners the rhyme <i>I have two eyes</i> . Learners come up with actions and rhythms for various parts of the rhyme.	TIDY UP TIME HAND WASHING SNACK TIME Begin with the song <i>The Hokey Pokey</i> . Play a charades game. Learners have to enact (mime) something they experience through one of their senses. The rest of the class must guess what they are doing and which sense was affected.	 Begin with the song <i>Head and shoulders</i> . Ask learners to lie down on the carpet and close their eyes. Play different classical tunes for them. Stop and ask learners how the music made them feel. Let learners listen to the music again. This time they draw a picture of what the music makes them think of. Encourage learners to describe their drawings for the class.	
Outdoor play	Blow up balloons and allow learners to hit them into the air. 			Make some skittles from empty plastic cooldrink or milk containers by filling them up with sand. On each one write a number from 1 to 10. Provide soft balls which the learners use to roll along the ground to knock down the skittles. See if learners can roll a strike (knock all 10 skittles down at once).	
Story time	 Make a sound story. Tell a story, e.g. start with a school bell ringing, followed by a child who went home from school, stamp-stamp-stamp. When the child got home he went knock-knock-knock at the door, etc. Provide learners with various items for making sounds and ask them to add to the oral story. If possible record the story and play it back to the class.			Read a storybook appropriate to the theme of 'My senses'. 	

1. Literacy assessment

- This assessment task will assess whether the learner has understood and can apply the concepts taught in this theme. Over the last two weeks learners:
- listened to the story *Vusi and the vuvuzela*
 - demonstrated an understanding of the above story
 - identified the 'v' sound at the beginning of words
 - sang and recited songs
 - talked about how we experience the world through our senses
 - matched items associated with particular senses, e.g. sweet smelling flower with the nose
 - read the sentence strips with the teacher and class
 - practised the letter formation of the letter 'v'
 - used language for learning.

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Put the letter 'v' from the Learner Resource Book on a table.
- Ask the learner to 'read' the letter 'v'.
- Now ask learners to trace the letter 'v' saying what they are doing. Check that they start and end in the correct positions.
- Finally ask the learner if they know words that begin with 'v'. Remember to say the sound and not the name, i.e. 'vvv' not 'vee'.

Part two

- Use Worksheet number 2.
- Ask the learner to name each of the senses.
- Ask the learner to name the pictures that we experience with our senses.
- Learners say which senses are used to experience each item, e.g. we experience food with our senses of smell and taste (and even sight).

Part three

- Use the sentence strip: I (see, hear, touch, smell, taste) with my ____ (eyes, ears, hands, nose, tongue).
- Place the ending words and matching body part pictures on the table.
- Say, 'I see with my ____' ask the learner to match it to the picture of eyes.
- Let the learner make the sentence. Ask learner to 'read' and point to the words.

Assessment wheel

Use this assessment wheel to assess Part One of the task on this page.

4 Well developed	3 Age appropriate	2 Still developing	1 Intervention needed
------------------	-------------------	--------------------	-----------------------

Grade R: Term 1				
Holistic rubric for Literacy Assessment Task Part two and three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
Is the learner able to:				
Oral:				
1. Follow the instructions?				
2. Answer questions?				
3. Take turns to speak?				
Phonics:				
4. Identify the 'v'-sound at the beginning of words?				
5. Identify 'v'-sounds in the environment?				
Reading:				
6. Recognise the senses?				
7. Explain what each sense can do?				
8. Can match word and picture in own sentence?				
9. Recognise the 'v' letter symbol in print?				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

- This assessment task will assess whether the learner has understood and can apply the concepts taught in this theme. Over the last two weeks learners:
- counted to 5 and more
 - were introduced to the number 2/two
 - were introduced to the square
 - sorted objects into groups of two
 - created and continued patterns
 - described and compared objects according to mass – heavy, heavier, light, lighter etc.

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

- Provide the learner with coloured counters, pegs and a board or even coloured Unifix cubes.
- Start a basic pattern with the two colours. Ask the learner to describe what you did.
- Ask the learner to continue the pattern with more coloured counters.
- Now ask the learner to create a new pattern using three colours.
- Place all the counters in a pile, ask the learner to sort them into groups. The learner must explain how they were sorted.

Grade R: Term 1		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Continue the pattern of two colours?		
2. Describe what was done?		
3. Create a pattern of three colours?		
4. Explain reasons for sorting?		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skill-linked activities that required them to name the five senses and how their bodies use these senses to explore their world. They began to describe and be aware of what they experience with their senses.

Show learners the following pictures and ask them to:

- name the five senses
- list five items they experience with each sense
- explain how they can experience something with more than just one sense; they should be able to provide examples

See if learners are able to apply what they have learned over the past two weeks when looking at these pictures.

Phonics focus: g

Day: Wednesday

Term: 1

Big Book story: A surprise for Gogo

Poster: My family

1. Arrival time

Welcome each learner as they arrive. Near the door have a very large sheet of paper and some crayons. Get each learner to draw themselves and the person who dropped them off somewhere on the paper. If they came by taxi or school bus, then they can draw the person that took them to the bus or taxi stop.

2. Health check

Assess each learner's health as they arrive at school. Be particularly aware of any learners who still look tired, indicating a lack of sleep. Remind learners and parents that learners need to go to bed early at night and have at least ten hours of sleep every night.

3. Morning circle

Read the theme message (sentence strip):
Today we are learning about our family.
Draw their attention to the large sheet of paper on which they drew when they arrived.

Ask each learner to talk about who they drew with them. Was it a member of their family? Was it a friend? Write both the learner's name and the family or friend's name on the paper as they are being described.

4. Work time

Chat about our families and close friends. Why are they so special to us? Introduce the work station activities. Explain what the learners should do at each one. Also remind learners about the number of children allowed at a time. If an area is full, they need to move to another one.

Work time: work stations

Technology table: Learners make a family of "people skittles" using old plastic cooldrink or milk bottles, half filled with sand and scrap materials.

Creative table 1: Learners make people from playdough.

Creative table 2: Learners do sponge painting: Make templates of family members out of cardboard. Using paint and small sponges attached to pegs, learners sponge paint the template and create images of family members.

Life Orientation table: Make family lacing cards by cutting out pictures of different people from magazines and reinforcing these with cardboard. Punch holes around the picture. Learners use shoelaces to lace around the people.

5. Small group time

Introduce the letter 'g'. Ask learners what sound their names begin with. Point out the letter 'g' and the capital letter 'G'. Learners can trace these letters on the sandpaper letters – the formation can be tricky so make sure they get enough practice. Get a piece of yellow rope and lay it on the floor as a 'g'. Learners walk along the letter 'g'.

Show learners items or pictures of items that begin with 'g', e.g. guitar, golf(ball), gold, girl, gift, garage, garden, gorilla, green, green pepper, grass, grasshopper, grape, glass, glove, glue. Describe a picture and get learners to find the one you are describing. Now provide each learner with a small tray of green jelly powder.

Learners practise writing the letter 'g' over and over again. They can then complete Worksheet 2.

ggggggggggggggg

6. Tidy up time

Once work time is over, all learners need to help pack away the materials. Make up a rhyme or song they can sing while tidying up, for example:

Tidy up, tidy up, put the toys away
Tidy up, tidy up, we're finished for today

12. Story time

Talk to learners about family birthdays. What is the best part about them? Can they think of a particularly special or funny family birthday? Ask them to share these with the class.

Turn to the story A surprise for Gogo on page 7 of the Big Book. Talk about the picture. Ask: Who does it show? Does she look happy, sad, excited or surprised? First look at the pictures and get the learners to tell the story as they think it will happen. Then read the story, stopping to discuss any challenging words or concepts. Afterwards talk about the differences between what the learners thought was going to happen and what actually did.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 3 as a backdrop for the theme table. Place a coloured tablecloth on the table.

Put the labels appropriate for this theme on the table and add items that relate to the theme of families, for example:

- Place family photographs of each child in the class either on a board or inside a photograph album.
- Make stick, finger or hand puppets of various members of the family. Display these in such a way that they can stand upright on the table, for example: with stick puppets, push the stick through a piece of polystyrene so they stand unaided.
- Near these puppets have a pile of actual items or pictures of items that various members of the family would use, for example, handbag, high heeled shoes, walking stick, razor (with no blade), pipe, hat, ball, roller skates, etc. Learners match the items to the family members. Note that there are no right or wrong choices here – members of one family could use different items to members of another family.

Fantasy corner

Create a space where learners can experience a busy family home. Have items that various family members would use, like clothing and accessories. If possible, also include a selection of baby items like dolls, blankets, baby bath, baby chair, nappies, bottles, bibs, etc.

WEEKLY PLANNER: Weeks 5 and 6

My family

	Monday	Tuesday	Wednesday	Thursday	Friday	
Arrival 15 - 30 minutes	Welcome each learner. Ask parents or caregivers to please bring a family photograph to school for tomorrow. 	Welcome each learner. Cut out magazine pictures of people and cut them in half across. Place a picture half in each learner's locker. Ask them to bring these pictures with them to the carpet for morning circle.			Welcome each learner. Make similar magazine people pictures as earlier in the week. This time, cut each picture in half from top to bottom. Place a half picture in each learner's locker. Tell learners to bring these to morning ring.	
	Introduce the theme for the next two weeks. Look at Poster 3 and talk about the various family members listed there. Go through the labels of each family member and see how they are linked to the rest of the family.	 	HEALTH CHECK		Discuss family relationships: What does it mean to be part of a family? How do family members look after each other? Learners can play charades and enact various members of the family.	Explain that our bodies are symmetrical – if we cut our bodies in half from top to bottom, the halves would match. Tell learners to find the partner who has the missing left or right half of their person. They each paste their half onto paper, then draw the other half of the person by copying their partner's picture.
Morning circle 10 - 15 minutes			Work time activities: 1. Technology focus Baking: Learners make jelly with fruit pieces. 2. Creative focus Learners make family finger puppets. 3. Numeracy focus Learners build a 'family home' with blocks.	Work time activities: 1. Creative focus Learners make a collage with shades of green. 2. Life Skills/creative focus Learners make their family members using plasticine. 3. Literacy focus Learners draw with chalk.		
Work time and small group time	Work time activities: 1. Literacy focus Learners draw themselves and their family busy at home. 2. Creative focus Learners make wooden or plastic spoon puppets. 3. Numeracy focus Learners make a shape family, using shape cut-outs to make people.					
SMALL GROUP TIME: 10 - 15 minutes	Small group time activity: Life Orientation focus Bring a suitcase full of clothing. Pull out one item at a time. Learners describe the item, then say who in the family would use it and why. As you finish with an item, let a learner put it on. At the end of the lesson, the learners should each be wearing some items of clothing or accessories. Call up one learner and tell the rest to close their eyes. Change something on the learner – the rest of the group must guess what was changed or removed.	Small group time activity: Literacy focus Introduce the sentence for the week: 'Who am I?' Have pictures of the family members and their labels. Read the sentence, pointing to the words, then point at a family member. Learners reply, e.g. I am the grandmother. Make a small book for each learner by folding two pieces of paper. On each page learners can paste pictures and sentences: 'Who am I? I am the (family member)'. Encourage each learner to read their book out loud.	Small group time activity: Numeracy focus Begin with counting to 10. Give each learner six counters. Ask them to place the counters in groups of three. Ask: How many groups? How many in each group? Introduce learners to the number 3 and the word 'three' on flashcards. Ask each learner to walk around the room and to find three of the same item. Learners count these out loud. Learners practise writing 3 in sand. They can then complete the pegboard pattern for 3.	Small group time activity: Literacy focus Ask learners to point out the various family members – use the pictures and labels. Clap the syllables for each family name: mo-ther; fa-ther, etc. Say an initial syllable, then stop. Learners must fill in the rest of the word, for example: sis ... (ter), bro ... (ther).	Small group time activity: Numeracy focus Show learners a circle and a square. Can they remember what these shapes are called? Ask learners to name things around the classroom that are square in shape. Now show a triangle. Ask: What do we call this shape? Discuss the number of sides and corners. Ask learners to name something that is triangular in shape. Give learners triangles cut from paper – with help they then create a triangular picture.	
TOTAL TIME: 45 minutes						
	TIDY UP TIME HAND WASHING SNACK TIME					
Music and movement ring	Introduce learners to the following family rhyme: <i>This is the daddy who bakes the bread This is the mommy who tucks us in bed This is the sister who cuddles the doll This is the brother who bounces the ball This is the baby, the last one of all Oh, how we love our family, one and all</i> Get learners to come up with actions for each sentence. They can practise performing the rhyme.	 father	 mother	 sister	 brother	 baby
	Outdoor play		Provide learners with a large box of dress-up clothes and accessories. They can dress up and imitate a family. Do not allow any use of the clothing or accessories on the climbing apparatus.		Provide learners with a few small buckets and some bean bags. Spread the buckets around and allow learners to practise aiming and throwing bean bags into buckets.	
Story time	Use some of the spoon puppets made during work time to initiate a story. Learners can give each puppet a name and role within a family. They can then use the characters to come up with a fun family story. Write down the story as learners make it up.	Talk to learners about the lessons that their parents teach them, for example, never to be rude (especially to older people), to say please and thank you. Select a story with a moral lesson in it – preferably within the context of the family. After reading, get learners to re-tell the story in their own words.		Re-read the story learners wrote from earlier in the week, where they used the spoon puppets as inspiration. Write up the story on large A3 paper, with a little text on each page. Ask learners what picture is needed to illustrate each page. Divide learners into groups and get them to illustrate the story. Paste pictures on the appropriate pages. Re-read the story when it's completed.		

1. Literacy assessment

This assessment task will assess whether the learner has understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *A surprise for gogo*
- demonstrated understanding of the above story
- identified the 'g' sound at the beginning of words
- sang and recited songs
- talked about the different members of a family and the roles they have
- matched 'personal' items to a particular family member and explained their reasoning
- read the sentence strips with the teacher and class
- practised the letter formation of the letter 'g'
- used language for learning

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Put the letter 'g' from the Learner Resource Book on a table.
- Ask the learner to 'read' the letter 'g'.
- Now ask learners to trace the letter 'g' saying what they are doing. Check that they **start and end** in the correct positions.
- Finally ask the learner if they know words that begin with 'g'. Remember to say the sound and not the name, i.e. 'gih' not 'gee'.

Part two

- Use Worksheet 3.
- Ask the learner to name each member of the family.
- Read the label of each picture and ask the learner to clap out its syllables.
- Ask the learner to read the single words and then match these to the family members.

Part three

- Use the sentence strip: I am the ____ (grandmother, mother etc).
- Place the ending words and matching family member's pictures on the table.
- Say, "Who am I?" and point to a picture. The learner replies "I am the..." and matches the word and picture.
- Let the learner make the sentence. Ask the learner to read it with you and to point to the words while you read.

Assessment wheel

Use this assessment wheel to assess Part One of the task on this page.

4 Well developed	3 Age appropriate	2 Still developing	1 Intervention needed
------------------	-------------------	--------------------	-----------------------

Grade R: Term 1				
Holistic rubric for Literacy Assessment Task Part two and three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
Is the learner able to:				
Oral:				
1. Follow the instructions?				
2. Answer questions?				
3. Take turns to speak?				
Phonics:				
4. Identify the 'g'-sound at the beginning of words?				
5. Identify 'g'-sounds in the environment?				
Reading:				
6. Recognise the various members of the family?				
7. Explain the role of each family member?				
8. Match word and picture and complete own sentence?				
9. Recognise 'g' symbol in print?				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learner has understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted to 5 and more
- were introduced to the number 3/three
- were introduced to the triangle
- answered verbal addition and subtraction problems with solutions to 4
- sorted objects according to size
- collected objects and sorted them and displayed them to make a pictograph

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

- Provide the learner with cardboard cut-outs of these a circle, square and triangle.
- Ask the learner to name the three shapes.
- Let the learner describe each shape in terms of its sides and corners.
- Ask the learner to draw each shape on paper.
- Then ask the learner to draw another circle, bigger than the first. Ask the learner to draw another circle, smaller than the other two. Repeat this for the square and the triangle shapes.

Grade R: Term 1		
Checklist for Numeracy Assessment Task		
Name:	Date:	
Is the learner able to:	Yes	No
1. Name the three shapes?		
2. Describe the properties of each shape?		
3. Draw the three shapes?		
4. Draw a bigger and smaller shape than the first one?		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skill-linked activities that required them to name the various members of the family and their roles. They also learnt what it means to be part of a family and how to look after their family.

Show learners the following pictures and ask them to:

- name the family members
- describe each family member in terms of their role within the family

See if learners are able to apply what they have learned over the past two weeks when looking at these pictures.

DAILY PLANNER: Weeks 7 and 8

Phonics focus: j and m

Day: Wednesday

Term: 1

Keeping clean and fit

Big Book story: *Dirty Duduzile*

Poster: Keeping clean and fit

1. Arrival time

Welcome each learner as they arrive at school. Draw learners' attention to the items on the theme table. Tell them to take their name card and to place it next to an item on the theme table that they like using, e.g. skipping rope, ball.

2. Health check

Talk to parents about their child's immunisation records and advise them that it is essential for their child's immunisations to be up to date.

3. Morning circle

Read the theme message (sentence strip): Today we are learning about keeping clean and fit. Take the items from the theme table and place them in the centre of the circle. Keep the name cards together with the items (see arrival time above). Go through each item and ask learners to say why they placed their name next to that item. Ask how they use this item, where and when they use it, and how it helps them keep fit or clean.

4. Work time

Have a quick talk with the learners about how we look after our bodies. What do we use to keep them clean and fit? Introduce the different activities at the work stations.

Work time: work stations

Technology table: Learners make toothbrushes using toilet roll inner and pipe cleaners.

Creative table 1: Learners do toothbrush painting. They dip an old toothbrush into paint and then gently brush the bristles over a sheet of paper to create splatter patterns.

Creative table 2: Learners make a tissue collage. They crumple different coloured pieces of tissue and glue them onto paper to make a collage.

Creative table 3: Learners do finger comb painting. They spread finger paint on the table, and then use a variety of old combs and brushes to create patterns.

5. Small group time

Show learners the letter m. Find items or pictures for the phonics table beginning with 'm', e.g. mouse, muffin, mushroom, mop, mug, mat, milk, mead, mirror, magazine, morago. Ask learners to name each item. Ask what they notice about the beginning sound of each word. Can they think of other things that start with the 'm' sound? Whose names begin with 'm'? Show learners the correct letter formation for 'm'. Let them use macaroni to make 'm's on the carpet. Then let learners complete Worksheet 4.

6. Tidy up time

Sing a tidy up song with learners as they tidy up the classroom.

7. Hand washing

As you lead learners to the bathroom to wash their hands before they eat, talk about how important it is to keep our hands clean, and when it is important to wash hands, e.g. after using the toilet, and before and after eating.

8. Snack time

Talk about why our bodies need food and how food keeps our bodies healthy. As they eat, learners can name a healthy item from their lunchbox.

9. Music and movement ring

Get learners to hold hands and stand in a circle. Stand in the middle of the circle and begin the song.

Learners copy your actions:

Let everyone clap hands like me (clap, clap) x2

Come on and join the game

Let everyone clap hands like me (clap, clap) x2

Try and do the same

Call out various actions related to the theme 'Keeping clean and fit'. Give learners a chance to come to the centre of the circle and to make up their own verses, e.g.

Let everyone brush their teeth like me ...

Let everyone run on the spot like me, etc.

10. Outdoor play

Add washing powder to the water trough to make it soapy and foamy. Add dolls' clothing from the fantasy corner. Erect a washing line with pegs and get learners to wash the clothes and hang them up to dry. This is a good science observation activity as learners can see how long different fabrics take to dry, which materials are more/less creased, etc.

11. Hand washing and toilet time

Learners line up to go to the toilet. On the way there get them to do various exercises, e.g. jumping, hopping, skipping, etc.

12. Story time

Open the Big Book to page 10 for the story *Dirty Duduzile*. Before reading, talk about how Dudu looks in the pictures. Draw learners' attention to Dudu's grubby, untidy appearance at the beginning of the story compared to her clean, neat appearance at the end. Ask learners to predict what they think the story will be about. After each page discuss the events that occurred and ask learners to suggest what will happen next. After the story, divide the class into three groups. The first group can act out the beginning of the story, the second group can act out the middle of the story and the third group can act out the ending. Tell each group exactly which part they must do. This will help them understand that all stories have a beginning, a middle and an end.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 4 as a backdrop for the theme table. Place a blue tablecloth on the table.

Display a variety of hygiene products, e.g. soap, toothpaste, shampoo, dental floss, toothbrush. Also include items that we can use to help us keep fit, e.g. skipping rope, ball, boxing glove. Place a girl and boy doll with items of clothing on the table. Learners can 'wash' and dress them.

Fantasy corner

Set up a 'beauty salon' or 'parlour' where learners can pretend they are going to be groomed. On a small table place a mirror, comb, brush, nail file, old nail polish bottles, an old electric razor, an old hairdryer and shaving brush. Provide towels and empty plastic cosmetic bottles for learners to play with.

WEEKLY PLANNER: Weeks 7 and 8

Keeping clean and fit

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes	Welcome each learner back after the weekend. Ask learners to bring their toothbrushes to school tomorrow. (Put a special note in their lockers to inform parents of this.) 		Before learners arrive, place an item from the theme table in each locker. Make sure that items are part of a pair, e.g. soap and towel. Learners collect these items and bring them to morning circle. 	As each learner arrives, ask them to mime an activity that they did that morning to keep clean or fit. 	
	HEALTH CHECK				
Morning circle 10 - 15 minutes	 Work time activities: 1. Creative focus Learners make dental floss art. They dip dental floss into paint and drag it over paper to make patterns. 2. Literacy focus Learners look for pictures that begin with 'm' in magazines and make a collage. 3. Creative focus Learners mix two different colours of playdough. Learners do ear-bud art by using ear-buds like paintbrushes.	Direct learners' attention to Poster 4 on the theme table. Ask them to describe what the children on the poster are doing: how are they keeping clean and fit? 	Learners bring the items from their lockers to the carpet. Ask each learner to show (mime) what they use the item for. Ask learners to find the child who has the partner to the object they found in their lockers, e.g. soap and washcloth, toothbrush and toothpaste. 	Use the sentence strip: I use ____ (soap, shampoo etc).  Work time activities: Creative focus Learners make ball art. They dip a small old ball into paint and place it on a tray lined with paper. They then move the tray slowly to create a pattern. Literacy focus Place the flashcards for this theme on the table. Learners 'read' the words and mime the action. The flashcards can be found in the Learner Resource Book. 	
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes	Small group time activity: Numeracy focus Introduce the number '4'. Learners jump, skip, hop, etc. four times each. Give learners six counters. Count out four from the total. Look for things that come in fours, e.g. table and chair legs, window panes, car wheels. Call out oral addition and subtraction word sums for learners to work out, e.g. I have four buttons. I drop two. How many do I have left?	Small group time activity: Literacy focus Introduce the letter 'j'. Get learners to identify any objects in the classroom, items on the phonics table and learners' names that begin with the letter 'j'. Teach correct letter formation. Let learners trace the letter in jelly powder. Let them jump, jive and jog over a large letter 'j' traced in chalk on the ground.	Small group time activity: Numeracy focus Revise circles, squares and triangles. Introduce the rectangle. Learners find items in the class that are rectangular. Discuss the properties of a rectangle and how it differs from the other shapes. Learners trace around rectangles onto paper. They then retrace the outline with wood glue and sprinkle it with sand coloured with powder paint.	Small group time activity: Life Orientation focus Talk about brushing teeth and why it is important. Have a picture of a mouth and teeth and a large toothbrush. Demonstrate correct brushing. Using their own toothbrush, learners brush their teeth. If possible have mirrors so they can watch themselves doing so. Make a small book for learners to take home. They tell you how to brush teeth and you write the sentences for them. Let them share their books.	Small group time activity: Literacy focus Play the memory box game. Prepare three to five small differently coloured boxes. In each one place an item from the theme table. Learners can talk about each item. Close the boxes and ask learners what is in each one. Then shuffle the boxes and ask learners what is in each one. Open the lids to check. This is a good visual memory exercise.
Music and movement ring		Begin with stretches, jumps and jogging on the spot. Call out three instructions, e.g. touch your nose, bend, and stretch up high. Learners listen, remember and copy the sequence (auditory memory).		Begin the lesson by singing the song <i>The healthy way we do it</i> (on Poster 4). Call out the name of a sport. Learners act out a movement or action related to that sport. Repeat the activity to music. Make a circle of chairs, one per learner. Play musical chairs to a sports theme. As learners move around the circle their movement should reflect a type of sport, e.g. dribbling a soccer ball, swinging a cricket bat, etc. 	
	Outdoor play				
Story time	Show learners four individual pictures illustrating the procedure for brushing teeth. Learners put the pictures in order. Then they use the pictures to tell a story.	Learners use the toothbrush they made previously from toilet roll inners and pipe cleaners (see the Daily Planner) to tell a story about brushing teeth and visiting the dentist.			

14

1. Literacy assessment

This assessment task will assess whether the learner has understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Dirty Dudu*
- demonstrated understanding of the above story
- identified the 'j' sound at the beginning of words
- identified the 'm' sound at the beginning of words
- sang and recited songs
- talked about how to keep clean and fit and look after their bodies
- read the sentence strips with the teacher and class
- practised the letter formation of the letters 'j' and 'm'
- used language for learning

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Ask the learner to find you three items that begin with 'm'. They look for these items in the classroom.
- Put the letter template for 'm' as well as the three taught previously from the Teachers' Guide on a table.
- Ask the learner to find the letter 'm' and say its sound.
- Ask the learner to 'read' the letter 'm'.
- Now ask learners to trace the letter 'm' saying what they are doing. Check that they start and end in the correct positions.
- Finally ask the learner if they know words that begin with 'm'. Remember to say the sound and not the name, i.e. 'mmm' not 'em'.

Part two

- Use Poster 4 for this task.
- Ask the learner to describe how the children in the poster are keeping clean and fit.
- Hold up items from the theme table and ask the learner to name them.
- Ask the learner to match the items with their flashcards.

Part three

- Use the sentence strip: I use ____ (soap, shampoo etc).
- Place the ending words and matching cleaning items' pictures on the table.
- Say, "What do you use to keep clean?" and point to a picture. The learner replies "I use ..." and matches the word and picture.
- Ask the learner to 'read' the sentence.

Assessment wheel

Use this assessment wheel to assess Part One of the task on this page.

4 Well developed	3 Age appropriate	2 Still developing	1 Intervention needed
------------------	-------------------	--------------------	-----------------------

Grade R: Term 1				
Holistic rubric for Literacy Assessment Task Part two and three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
Is the learner able to:				
Oral:				
1. Follow the instructions?				
2. Answer questions?				
3. Listen without interruption?				
Phonics:				
4. Identify the 'm'-sound at the beginning of words?				
5. Identify 'm'-sounds in the environment?				
Reading:				
6. Recognise the various cleaning items?				
7. Explain how to keep clean using the various items?				
8. Match word and picture and complete sentence?				
9. Recognise the 'm' symbol in print				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learner has understood and can apply the concepts taught in this theme.

Over the last two weeks learners:

- counted to 5 and more
- were introduced to the number 4/four
- were introduced to the rectangle
- Built up and broke down numbers to 4 using counters.

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

- Give the learner six counters. Ask the learner to count out four counters.
- Have various items for the learner to count, for example, a toy car, pencils, buttons etc. Ask the learner how many wheels, how many pencils, how many buttons.
- Call out verbal addition and subtraction problems for learners to work out, e.g. I have four buttons I drop two how many now?

Grade R: Term 1		
Checklist for Numeracy Assessment Task		
Name:	Date:	
Is the learner able to:	Yes	No
1. Read the number 4 and word four?		
2. Count up to at least four?		
3. Count a variety of objects?		
4. Answer verbally stated addition and subtraction problems?		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skill-linked activities that required them to name how we keep our bodies clean and how to get fit. They were involved in fun activities and exercises to strengthen their bodies physically. They were also encouraged to describe steps that can be taken to ensure personal hygiene.

Show learners the following pictures and ask them to:

- name each cleaning product.
- say what it is used for.
- name which part of the body the product is used on.

See if learners are able to apply what they have learned over the past two weeks when looking at these pictures.

DAILY PLANNER: Weeks 9 and 10

Healthy eating

Phonics focus: k and i

Day: Thursday

Term: 1

Big Book story: *Mmm, mud pies!*

Poster: Healthy eating

1. Arrival time

Welcome each learner as they arrive at school. Tell learners to go to their lockers where they will find a plastic or empty food container. They must take their food item to the theme table and place it on the paper plate showing the correct food group.

2. Health check

As learners arrive at school evaluate their overall health and appearance. If any learners are on medication make sure the parents inform you of what the medication is for, when to take it, how to store it and who to call in case of an emergency.

3. Morning circle

Read the theme message (sentence strip): Today we are learning about food. Draw learners' attention to the theme table and the poster. Spend some time discussing the different food groups and how the food pyramid on Poster 5 has been divided. Look at the food that learners placed on the paper plates on arrival. Let learners discuss which food groups the foods on their plates belong to.

4. Work time

Revise healthy and unhealthy food choices with the class. Draw learners' attention to the activities at the different work stations. Discuss respect for friends and all equipment. Remind learners to leave each work station clean and tidy like they found it. Demonstrate any challenging tasks.

Work time: work stations

Creative table 1: Cut out shapes in potato halves. Learners dip the halves in paint and print shapes.

Creative table 2: Learners make food moulds using playdough. They can put these on paper plates in the sun to dry. When dry, the food moulds can be painted.

Technology table: Learners make a class food mobile. They draw, colour and cut out pictures of different foods. Attach these with string to a hanger. Learners can also make a different mobile for each food group.

Life Orientation table: Learners cut out pictures of food from magazines. They paste these onto a large sheet of paper to create a food collage. Learners can also make a different collage for each food group.

5. Small group time

Hold up a variety of items or pictures that begin with the letter 'k', e.g. *key, king, kudu, kangaroo, kitchen, kettle, kite, kennel, kids, kitten*. Ask learners what sound they hear at the beginning of each word. Introduce the letter 'k'. Practise the sound.

Learners can trace the letter on the sandpaper letters (the formation can be tricky so make sure they have enough practice).

Prepare two sets of pictures of items beginning with the letter 'k'. Learners play a visual memory game with the pictures. Place them all face down on the carpet. Learners take turns to turn over two cards. If they are a set they keep them. If not, they turn them face down again. The game continues until all the card pairs are removed.

Provide each learner with a small tray filled with sand. Learners practise writing the letter 'k' as many times as they can. They can then complete the 'k' worksheet.

6. Tidy up time

After completing the activities for the day, all learners must work together to help tidy up. Make it fun by singing the song below to the tune of *The Farmer in the Dell*:

A helper I will be, a helper I will be

There's a lot of work to do

A helper I will be

7. Hand washing

Go over the correct manner and sequence for washing hands. Ensure that all learners do it properly. Sing the fun wash-up song learnt in the previous theme:

This little hand is a good little hand (wave left hand)

This little hand is its brother (wave right hand)

Together they wash and wash and wash (wash hands with soap)

One hand washes the other

12. Story time

Before beginning the story *Mmm, mud pies!* on page 13 of the Big Book, look at the illustrations with the learners. Ask: Who is this? What are they doing? Ask learners to predict what they think will happen in the story. Read the story slowly. Use expression and vary the pace when reading. Stop at the end of each page and talk about what happened. Discuss the illustrations on each page.

At the end of the story ask learners if their predictions at the beginning were correct. Get learners to orally re-tell the story, in this way assessing their understanding of what was read to them. If there is time, divide learners into small groups and let them re-enact the events of the story.

8. Snack time

As learners sit down to eat their lunch encourage them to first say a word of thanks for the food they are about to eat.

While they eat learners can talk about what they have in their lunch box. What is healthy or unhealthy? What should they eat first? Why? (Learners should begin with their sandwich and leave sweets or snacks for last.)

9. Music and movement ring

Begin with the song related to food. Get learners to sit in a circle. Begin the lesson by going around the circle and clapping out learners' names, e.g. Vu-si, Prince-ton, Ma-ry, etc.).

Now clap out names of food items. Hold up an item from the theme table and tell learners to clap out its name. Choose four food items and make a flashcard with each name. Hold up the cards and tell learners to clap the words. Now place them in a sequence and have the learners clap the syllables in order. This is beginning notation in music, learners should see that by clapping the words they are creating a sound pattern, or making music.

10. Outdoor play

Place a variety of buckets and bean bags outside. Learners can have fun throwing the bean bags into the buckets. Count how many bean bags they can get in. Learners can also test their aim over a distance - how far away can they move from the bucket and still get the bean bag in?

11. Hand washing and toilet time

As learners line up to go to the toilet, they can pretend to be fruit pickers at a fruit farm. They must stretch up and pick the apples/oranges; bend low and pick the grapes/bananas, etc.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 5 as a backdrop for the theme table. Place a green tablecloth on the table.

Place the labels appropriate for this theme on the table. Add items that relate to the theme of food, for example:

- a variety of cooking utensils and clothing, e.g. spatulas, spoons, aprons, oven gloves, etc.
- a variety of food items (preferably not fresh food items, but rather plastic food or empty, clean food containers)
- paper plates in different colours, labelled for the different food groups so learners can sort the food items into the various groups
- a variety of magazine pictures of food for learners to sort into various groups - food groups, favourites, food colours, healthy, unhealthy, etc.).

Fantasy corner

In the fantasy corner re-create the scene of a busy kitchen. Have a table in the centre of the space with chairs. On the table place plastic plates, cups, forks, spoons and knives (make sure these are toys or blunt). Learners can then practise setting the table. Create a cooking space with a stove (can be a big box with four circles for stove tops), cooking utensils, equipment such as pots and clothing such as aprons and oven gloves. Also have a variety of food items, once again either plastic items or empty, clean food containers.

WEEKLY PLANNER: Weeks 9 and 10

Healthy eating

Arrival

15 - 30 minutes

Monday	Tuesday	Wednesday	Thursday	Friday
Welcome each learner. As learners arrive ask them to pick an item of food they like off the theme table and place it in their lockers. 		Welcome each learner. Have pictures of various fruits and vegetables. Cut them in half. Place a half in each locker. As learners come in they can see their half and decide on what it is. 	Welcome each learner. As learners walk in they must go to the theme table and select a favourite item of food from a variety of food pictures (have duplicate copies of food that is generally more popular with children). They place this picture in their locker.	

Morning circle

10 - 15 minutes

Introduce the theme for the next two weeks. Direct learners' attention to the theme table. Discuss what they see on it. Ask learners to show the class their item of food. What did they pick? Once all learners have showed their choice, collect all the items. As a class sort the items into healthy and unhealthy food choices. 	Discuss the poster. Go through the questions on the poster. Discuss the theme words. Get learners to name their food item. They must then move around the room and find the person with the other half. As an extension see if learners can match their food item with the appropriate label. 	Learners bring the pic of their favourite food to the carpet. Collect the pictures and sort them with the class. Do this on the board so learners can see how to sort data. Then use the pictures to create a picture graph showing the class's most popular foods.
---	---	--

Work time and small group time

SMALL GROUP TIME:
10 - 15 minutes

TOTAL TIME:
45 minutes

Work time activities: 1. Peanut and macaroni necklaces (use raw peanuts in shells) 2. Mielie cob prints (save the cob after eating a mealie, learners roll the cob in paint and print) 3. Egg shell collage 4. Edible art (use toothpicks and pieces of fresh fruit and vegetables. Creations can be eaten at snack time)	Small group time activity: Numeracy focus Grow your own food. Get learners to grow their own food. Here is a simple idea: Cress eggheads: You need: an eggshell half, an egg cup, Koki pens, cotton wool and cress seeds. What to do: Fill the empty eggshell with cotton wool and put the shell back in an egg cup, then carefully draw a face with a Koki pen. Sprinkle on a layer of cress seeds. Cover the egg with paper and leave for two or three days until the seeds start to sprout.	Small group time activity: Numeracy focus Begin by counting to 10. Revise the names for the previous shapes learnt. Show learners a heart: what is it called? Discuss the shape of the heart. What is the meaning of the heart? When do we use it? Give learners various shapes cut from paper – call out a pattern, they copy it with their shapes and then extend it. Each learner can have a turn to call out a pattern for the rest to copy and extend.	Small group time activity: Literacy focus Introduce the African Alphabet letter 'I' and 'I'. Get learners to make the sound they hear. Provide each learner with a paintbrush and a cup of water. They can then practise writing the letter 'I' on the windows of the classroom. Give each learner a stick and some ink and they can make ink designs on paper. They can write a few 'I's with the ink.	Small group time activity: Literacy focus Place all the food items from the theme table before the learners. Also have paper bags or baskets labelled with letters of the alphabet and a matching picture, for example an 'm' and a monkey. Learners take turns to pick up a food item, name the initial sound and then place it in the correct sound bag.
--	---	--	--	---

Music and movement ring

Begin the lesson by singing the song: <i>Ten fat sausages...</i> (see poster). Place 10 sausage pictures up on the board or the wall, to accompany the song. Learners can spread out around the space and on the "pop" and the "bang" they can create large movements to show the action. Play "Freeze Dance". Play a song with a varied tempo and a fun beat. Learners have to express themselves to the music and must move fast to a fast tempo, slow to a slow tempo, and then when the music stops they must freeze.	Begin the lesson by singing the song: <i>Jelly on the plate...</i> (see poster). Learners can move as desired to the song. Play <i>Hot Potato</i>. Pass a potato around to music. When the music stops, whoever is left holding the potato must sit out. Continue until one person is left in the circle.	Begin the lesson by singing the song: <i>Jump up and down...</i> (see poster). Do the following activity using the food containers from the theme table: Choose a learner to sit in a chair and blindfold him/her. Begin to bang or hit the container with a continuous pattern. Ask the blindfolded learner to stand up and walk towards the sound. Once they've found you, have them feel and name the container being played. Continue the game with a few more learners.
---	---	---

Outdoor play

Story time

Create an outdoor obstacle course using benches, ropes, tyres etc. Learners can have fun working their way through it	Create an 'I like' book. Each learner can make their own. They can draw the picture and you complete the sentence – 'I like carrots', 'I like peas' etc. Learners then get a turn to read their books to the class.	Picture story strip: show learners four pictures of a child eating a sandwich. Learners must dictate a story to match each of the pictures. Write this story down and re-read it to the class when they are done.	Create a closed off space where learners can move freely. Put on some music and learners can do some free dance or aerobics with the teacher.	Make a class zig-zag book. Use the data from the graph to make a class book of favourites: We like... Each learner can help to decorate the book. Read the book to the class. Keep book in the reading centre for learners to access at their leisure.
--	---	--	--	--

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Mmm, mud pies!*
- demonstrated an understanding of the above story
- identified the 'k' sound at the beginning of words
- identified the 'i' sound at the beginning of words
- sang and recited songs
- talked about how to make good food choices
- read the sentence strips with the teacher and class
- practised the letter formation of the letters 'k' and 'i'
- used language for learning

This assessment task may take several days to complete.
You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Put the letter 'k' from the African Alphabet series on a table.
- Ask each learner to 'read' the letter 'k'.
- Now ask learners to trace the letter 'k' saying what they are doing. Check that they start and end in the correct positions.
- Finally ask learners if they know words that begin with 'k'. Remember to say the sound and not the name, i.e. 'kih' not 'koy'.

Part two

- Use Worksheet 4 for this part of the task.
- Ask learners to identify each picture.
- Ask learners to say just the initial sound for each picture.
- Read the sentences with the learners. They must correctly identify each colour.
- They must colour in the food item appropriately.

Part three

- Use the sentence strip: *I like ____* (chicken, eggs, etc.)
- Place the ending words and matching food pictures on the table.
- Ask: What do you like? Then point to a picture. The learner replies *'I like ____'* and matches the word and picture.
- Let the learner make the sentence. Have the learner read the sentence together with you, pointing to each word as you read.

Assessment wheel

Use this assessment wheel to assess Part One of the task on this page.

4 Well developed 3 Age appropriate 2 Still developing 1 Intervention needed

Grade R: Term 1				
Holistic rubric for Literacy Assessment Task Parts Two and Three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
The learner is able to:				
Oral:				
1. Follow the instructions				
2. Answer the questions				
3. Listen without interruption				
Phonics:				
4. Identify the 'k' sound at the beginning of words				
5. Identify 'k' sounds in the environment				
Reading:				
6. Name the various food items				
7. Complete the sentence				
8. Match the word and the picture				
9. Recognise the 'k' letter in print				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- Counted to 5 and more
- Revised numbers 1 to 3
- Were introduced to the heart shape
- Copied and extended simple patterns, using concrete objects and drawings
- Followed instructions and directions
- Collected data – food pictures
- Sorted food into the correct groups

This assessment task may take several days to complete.
You can do it one-to-one with the learner or in a small group.

TASK

- Give the learner six straws in a cup. The learner must count all the straws.
- Call out addition and subtraction problems. Learners must use the straws to show the solution.
- Learners use the straws to form the following shapes: circle, square, triangle and rectangle.

Grade R: Term 1		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Recognise numbers 1 to 3 and number words one to three		
2. Count up to at least six		
3. Count a variety of objects		
4. Answer oral addition and subtraction problems		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skills-linked activities that required them to make healthy food choices. They discussed the different food groups and how much to eat from each group. They also understood the importance of drinking only clean water and eating fresh food.

Show learners the following pictures and ask them to:

- Name the various foods.
- Divide the foods into two groups and explain why.

See if learners are able to apply what they have learnt over the past two weeks when looking at these pictures.

DAILY PLANNER: Weeks 11 and 12

Friends

Phonics focus: n

Day: Monday

Term: 2

Big Book story: *Proud to be me*
Poster: Friends

1. Arrival time

Welcome each learner as they arrive at school. As they are putting their bags away, chat to them about their weekend. Ask what they did, who they saw, etc.

2. Health check

As learners arrive at school evaluate their overall health and appearance. Make a sign and/or talk to parents/ caregivers about eye testing. It is important for them to make sure their children's eyes are tested regularly.

3. Morning circle

Read the theme message (sentence strip): Today we are learning about friends. Get them to sit in a circle. Sing this welcome song to the tune of *Here we go round the mulberry bush*:
This is the way we say hello, say hello, say hello
This is the way we say hello, to our friend

Learners join in and sing the song until every child in the circle has been named.

Draw learners' attention to the theme table. What is the theme about? Ask learners to say what they think are the qualities of a good friend. Write down some of these ideas as learners call them out.

4. Work time

Explain the activities at the various work stations and the other centres such as the reading corner, the theme table, the block area, etc. Explain that learners must go to each of the work stations to complete the activity there but the other centres are not compulsory. Explain that an empty chair indicates availability at that station. If full, the learner must wait and return later.

Work time: work stations

Life Orientation table 1: Learners make a 'me doll' by decorating a cardboard cut-out body using rice, ribbon, noodles, beads, buttons, crayons, glitter, paper, fabric, etc.

Life Orientation table 2: Learners draw and colour in a circle of friends. They can try to write the names of their friends next to each figure.

Literacy table: Learners make rainbow name cards. Prepare flashcards of each learner's name. Learners colour around it using kokis or crayons. They should use at least eight different colours.

Creative table: Learners mould 'friends' using playdough.

5. Small group time

Begin by singing this song to the tune of *If you're happy and you know it*:

If your name begins with A, clap your hands

(just those learners clap their hands twice) x2

If your name begins with A, clap your hands

(just those learners clap their hands twice) x2

If A begins your name

Then clap your hands again

If your name begins with A, clap your hands

(just those learners clap their hands twice)

Hold up a variety of items or pictures that begin with the letter 'n': nest, nine, nuts, noodles, needle, nail, net, newspaper, necklace, etc. Ask learners what sound they hear at the beginning of each word.

Show learners the alphabet from the Learner's Resource Book. Practise the sound it makes.

Provide learners with an assortment of noodles which they use to form 'n's on paper. They can glue the noodles onto the paper. Learners can then complete the letter 'n' worksheet (Worksheet 4).

6. Tidy up time

Learners find a friend and help tidy up together. Sing this song to the tune of *Twinkle twinkle little star*:

Pick up, pick up, pick up toys

All you little girls and boys

Look around and you will see

All the things that shouldn't be

Pick up, pick up, pick up toys

All you little girls and boys

7. Hand washing

As learners wash their hands, call out a name and the whole class sings this washing hands song, also to the tune of *Twinkle twinkle little star*:

(Child's name, child's name), *there you stand*

Please come wash your dirty hands!

12. Story time

Open the Big Book to the story *Proud to be me*. Talk about how each of us is unique and special. We have differences and similarities, but we all deserve to be loved and cared for. Page through the story before reading and discuss the children in the illustrations. Talk about the challenges faced by each of these children.

Read the story, stopping regularly to ask questions and to evaluate whether learners understand the content. After reading, discuss how we should react to people who may appear at first to be very different to us. Make learners understand the need for tact and sensitivity. Do role plays showing what it is like to be stared at and laughed at, so learners will grasp the message.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 6 as a backdrop for the theme table. Place a tablecloth on the table. Place the labels appropriate for this theme on the table. Add items that relate to the theme of friends, for example:

- flashcards related to the theme
 - pictures cut from magazines or newspapers of kind deeds and acts of friendship
 - puzzles made from cut-up friendship pictures (learners assemble the puzzle and then discuss the act of friendship depicted in the picture)
 - stick-puppets of different people (stick each puppet into the bottom of an upside down polystyrene cup, so they can stand on their own).
- Puppets can be used by learners to role-play various 'friends' scenarios.

Fantasy corner

Create a space in the fantasy corner where learners can explore the theme of friends. You can include the following items: puppets and dolls representing various races and ethnic backgrounds and dress-up clothing. Learners can use the puppets and dolls to explore issues of friendship in different situations.

8. Snack time

As learners sit down to eat their lunch encourage them to first say a word of thanks for the food they are about to eat.

While learners are eating, talk about sharing and what this means. Even though sharing is wonderful, learners must always first check with an adult before sharing their food – this is because some children have allergies.

9. Music and movement ring

Begin the music ring with the following friendship song *Counting friends*:

Friends, friends, one, two, three
All my friends are here with me
You're my friend, and you're my friend
And you're my friend as well
Friends, friends, one, two, three
All my friends are here with me

Talk about why it is often better to do things with friends than to do them alone. Playing games with friends is lots of fun!

Use the action rhyme *Did you ever see my friend?* (see Poster 6). Learners stand in a circle. Choose a learner to be the 'friend' in the middle of the circle. As you all say *Did you ever see my friend go this way and that?*, the learner in the middle does an action, e.g. hops on one foot, claps, sways, does jumping jacks, touches toes, waves arms, etc. Let different learners take turns to be the friend in the middle.

10. Outdoor play

Place a large box outside with skipping ropes, hula hoops and Frisbees. Encourage learners to use each apparatus and to have fun.

11. Hand washing and toilet time

As learners line up, have them pick a friend to skip together to the toilet with.

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes		Welcome each learner. Tell learners they will find a picture in their locker. They need to take the picture to the theme table and put it in the red basket if it shows an act of kindness or in the blue basket if it shows a mean act.	Welcome each learner. Ask parents to send a photograph of the child to school the next day.		
Morning circle 10 - 15 minutes		Show and talk about the pictures from the red and blue baskets. Ask learners to tell you words that describe friendship. Write these on the board or on a sheet of paper, e.g. <i>kind, share, nice, good, hug, love, play, friendly, etc.</i>	Talk about the poster. Go through the questions on the poster. Discuss the theme words. Get learners to use each of the theme words in a sentence about their friends.	Revise learners' names and colours by singing the <i>Do you know my friend?</i> song (see Poster 6), sung to the tune <i>The muffin man</i> (or improvise your own). Re-read the list from Tuesday's morning circle of what makes a good friend. Create a graph on the qualities listed. Discuss the results.	
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes		Work time activities: Literacy focus 1. Using alphabet cookie cutters, learners make letters from playdough. They can make their name and a friend's name. Creative focus 2. Learners make noodle designs on paper. When the glue dries, noodles can be painted. 3. Learners finger paint. 4. Learners make chalk pictures on paper or chalkboard.		Work time activities: Technology focus 1. Baking: Learners bake heart-shaped biscuits (to give to a friend). Creative focus 2. Learners plait three pieces of string or ribbon together to make a friendship bracelet. Give it to a friend. Literacy focus 3. Learners paint with old deodorant roller bottles filled with paint. 4. Learners draw and colour a picture to give to a friend.	
	Small group time activity: Numeracy focus: Begin with counting to 10. Revise the number flashcards 1 to 4. Have a learner call out a number. Do that many jumps or claps (or another movement activity). Hold up a clear bag of buttons or bottle tops. Ask the learners to guess how many there are in the bag. Now give them the bag. They count the buttons to see if any of their guesses were correct. How close were they? Was it more or less or the same as the actual amount?	Small group time activity: Science/ Numeracy focus Each learner brings a different piece of fruit. The fruit will be used to make a friendship salad. Before making the salad, the fruit can be sorted in various ways (colour, size, type). The fruit is then washed and cut up to make a mixed fruit salad. Learners can eat it during snack time.	Small group time activity: Numeracy focus: Begin by counting to 10. Revise the names of the shapes already learnt. Show learners a diamond and ask: What is this called? Discuss the number of sides and corners. What other shape looks similar to the diamond? Create a simple board game using shapes. Learners roll the dice and move along the board. When they land on a shape they must say its name and describe it (number of sides, corners, etc.). If they get the name wrong they miss a turn. The winner is the first player to reach the end.	Small group time activity: Literacy focus Introduce the sentence for the week: 'Who is this?' Have a photograph of each learner. Read the sentence. Learners must reply and say 'This is my friend (name)'. Hand out the photos and name labels. Learners make a sentence strip to match each photo. Make a small book for each child by folding two pieces of paper in half. On each page learners can draw a picture of a friend and paste the sentence strip. Encourage learners to read their book out loud.	
	TIDY UP TIME HAND WASHING SNACK TIME				
Music and movement ring	Begin the lesson by saying the <i>Roll the ball</i> rhyme. <i>Roll the ball to me And I'll roll it back to you What's your name, friend? Hello! How do you do?</i> Learners sit in a circle and pass the ball back and forth to one another. Each learner has a turn to roll the ball to a different learner. The child receiving the ball says their name and something about themselves.		Begin the lesson by singing the song <i>Will you meet a friend?</i> (see Poster 6). Play some music. Learners pick a partner, hold hands and dance in a circle. At the end of the song they can walk around and find a new partner and sing the song again. Play the <i>Who is it?</i> game. Cover one learner's eyes and ask another learner to stand in front of him. The learner whose eyes are covered should touch the other learner's face and try to guess who it is. If he can't then the class can give him clues, e.g. the first sound of their name, hair style/colour, body shape, etc.	Learners move freely around an open space. At the sound of a double whistle, learners must link arms with the person closest to them. The pair becomes 'friends' and they can only move if they stay connected. At the sound of a single whistle, learners break apart and move on their own again until they hear another double whistle telling them to link up again.	
Outdoor play		Read a story together related to the theme of friends. After reading get learners to dictate a page for a class book about friends. Type or write the words, add an illustration. Read the story to the learners at a later stage during this theme.	Begin by sharing a book related to the theme of friends. Then teach this rhyme to the class: <i>Friends care Friends share We need friends Everywhere!</i> Learners can get into pairs and make up a clapping sequence to accompany the rhyme.		Learners dictate a sentence about what they think a good friend means. They illustrate their sentence, then share it aloud with the class. All the pages can then be made into a class book to share during story time.
Story time					

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Proud to be me*
- demonstrated understanding of the above story
- identified the 'n' sound at the beginning of words
- sang and recited songs
- talked about how to be a good friend
- wrote the letters of their name
- described how to make and treat friends
- read the sentence strips with the teacher and class
- practised the letter formation of the letter 'n'
- used language for learning.

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Put the letter 'n' from the Learner Resource Book on a table.
- Ask learners to 'read' the letter 'n'.
- Now ask learners to trace the letter n saying what they are doing. Check that they start and end in the correct positions.
- Finally, ask the learners if they know words that begin with the letter 'n'. Remember to say the sound and not the name, i.e. 'nnn' not 'en'.

Part two

- Use Worksheet 4 for this task.
- Ask each learner to describe what they did on the worksheet.
- Ask each learner to say the sound of each letter in their name.
- Provide magnetic letters. Each learner must build their name using the letters, without looking at the name pasted on the worksheet.

Part three

- Use the sentence strip: *This is my friend* ____.
- Place the name labels and matching photographs on the table.
- Ask: "Who is this?" and point to a photograph. The learner replies "This is my friend ____" and matches the name label and photograph.
- Let the learner make the sentence. Have the learner read the sentence together with you, pointing to each word as you read.

Assessment wheel

Use this assessment wheel to assess Part One of the task on this page.

4 Well developed	3 Age appropriate	2 Still developing	1 Intervention needed
------------------	-------------------	--------------------	-----------------------

Grade R: Term 2				
Holistic rubric for Literacy Assessment Task Parts Two and Three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
The learner is able to:				
Oral:				
1. Follow the instructions				
2. Answer the questions				
3. Listen without interruption				
Phonics:				
4. Identify the 'n' sound at the beginning of words				
5. Identify 'n' sounds in the environment				
Reading:				
6. Read own name				
7. Read the names of other learners in the class				
8. Match a word (name) and a photograph				
9. Recognise the 'n' letter in print				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted to 10
- revised numbers 1 to 4
- were introduced to the diamond shape
- understood concepts of more/less/equal
- solved and explained solutions to practical problems that involved equal sharing and grouping with whole numbers of at least 6, and with solutions that included remainders.

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

- Give learners flashcards of numbers 1 to 4, number words one to four, and dots • to • • • • •.
- Ask learners to order the cards.
- Now ask learners to match the cards with the same amount (e.g. 2, two and • •).
- Call out a number between 1 and 4. Ask learners to write the number together with a corresponding number of items or pictures.

Grade R: Term 1		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Read numbers 1 to 4 and number words one to four		
2. Write numbers 1 to 4		
3. Count a variety of objects		
4. Draw pictures to match a specific number		

Copy this rubric. You will need one for each learner.

Grade R: Term 3				
Holistic rubric Numeracy Assessment Task				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
Is the learner able to:				
Counting				
1. Count out objects to ten?				
2. Identify the numerals 1 to 4?				
3. Identify the number words one to four?				
Concept development				
4. Match numeral (symbol), word and picture?				
5. Use mathematical language?				

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skills-linked activities that required them to describe how to treat a friend, how to be a good friend and what to expect from a friend.

Show learners the following pictures and ask them to:

- describe what each pair is doing
- say why they think each pair are friends
- say what things they like to do with their friends

See if learners are able to apply what they have learnt over the past two weeks when looking at these pictures.

DAILY PLANNER: Weeks 13 and 14

Phonics focus: e

Day: Thursday

Term: 2

This is what I wear

Big Book story: *Ntombi Hippo*

Poster: This is what I wear

1. Arrival time

Welcome each learner as they arrive at school. Direct learners' attention to their lockers where they will find a single shoe. They must bring this to the carpet with them for the morning circle.

2. Health check

As learners arrive at school evaluate their overall health and appearance. Check with parents/caregivers that all emergency contact details are available and up to date.

3. Morning circle

Read the theme message (sentence strip): Today we are learning about what we wear. Challenge learners to find a way to find the match for their shoe without making a noise. Set a timer: learners can have one minute to find their match.

Sitting with their partner, learners must discuss the pair of shoes they have. Who would wear it? Where would they go? What do they do? When last did they wear these shoes? What happened? What outfit could be worn with these shoes?

4. Work time

Call a learner to the front of the class. Dress him/her up with clothes from the fantasy corner. Discuss what s/he is wearing. Now tell the class to close their eyes and cover their ears. Change something small on the learner's outfit. The class must guess what was changed.

Explain the activities learners need to do at the work stations today.

Work time: work stations

Creative table: Learners make sock puppets. They decorate an old sock using fabric pieces, buttons, wool, glue, etc.

Life Orientation table: Learners draw themselves wearing their favourite outfit. They must include as much detail as they can.

Numeracy/Creative table: Learners use a variety of buttons to design a picture. Talk about the shape, colour and number of holes on each button.

Technology table: Learners cut out two doll outlines (use Worksheet 1 as a template) and glue the edges together. They then decorate and stuff the doll with paper. They then use fabric pieces to dress the doll. They can talk about the type of clothing they made.

5. Small group time

Introduce the letter 'e'. Hold up the letter 'e' flashcard in the Learner Resource Book.

Have learners trace the letter on each other's backs, in the air, on the carpet, etc.

Hold up a variety of pictures and items that begin with the letter 'e': envelope, egg, egg box, elf, engine, elevator, escalator, elbow, exercise, empty, exit, Eskimo, etc.

Ask learners what sound they hear at the beginning of each word.

Prepare an envelope for each picture with the matching 'e' word printed on it.

Read the word very slowly, in syllables, to give learners a chance to try and guess the word.

Learners must then find the matching picture and place it inside the envelope.

Learners practise writing the letter 'e' in their sand trays.

Learners can then complete the worksheet (Worksheet 4).

6. Tidy up time

After completing the activities, encourage all the learners to help with tidying up. Either sing an old favourite or try this new song, sung to the tune *For he's a jolly good fellow*:

(Child's name)'s a jolly good helper

(Child's name)'s a jolly good helper

(Child's name)'s a jolly good helper

And (another child's name)'s a helper too!

7. Hand washing

Before snack time it is very important that all learners wash their hands correctly. Remind learners about the correct hand washing procedure. Sing a washing song to motivate learners to do a proper hand washing job.

8. Snack time

As learners sit down to eat their lunch encourage them to first say a word of thanks for the food they are about to eat.

While learners are eating, talk about chefs who prepare and cook food in various settings: restaurants, hotels, supermarkets, offices, etc. What do they wear? Why do they wear these items?

9. Music and movement ring

Begin the lesson by singing *This is the way we wash our clothes* to the tune of *Here we go round the mulberry bush* (see Poster 7). Learners can come up with actions to accompany each verse.

Play the game *Don't get caught*. Learners sit in a big circle. Place a variety of clothing items on the floor inside the circle. Choose a learner to come to the middle. S/he is blindfolded and given a scarf. Choose another learner from the circle and tell him/her to find a specific article of clothing on the floor. Vary the descriptions, e.g. its name, use, colour, season when it's worn, etc. The aim is for that learner to walk around, find the article of clothing, and return to his/her place without being caught by the learner with the scarf.

The game works best if the blindfolded learner stands still in the middle of the circle, listens carefully to where the footsteps are, and then just reaches out and tries to flick the other learner's legs with the scarf.

10. Outdoor play

Provide learners with capes or towels for fantasy play. Remind them that no capes are allowed on the apparatus for safety reasons. All capes must be returned and not left lying on the playground.

11. Hand washing and toilet time

As learners line up to go to the toilet they can pair up with someone who is wearing the same colour as they are.

12. Story time

Open the Big Book to the story *Ntombi Hippo*. Talk about the illustrations on each page. Ask: What do you think Ntombi likes to do best of all? Why do you say so? Identify and discuss all the various items of clothing pictured in the story. Ask: What is this used for? Where would you wear it, i.e. for which season or special occasion?

After you have read the story, discuss the twist that even though Ntombi loves clothes and dressing up, she still prefers to lie in a muddy pool with no clothes on at all! Let learners use clothing from the fantasy corner to act out the story as you re-read it.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 7 as a backdrop for the theme table. Place a tablecloth on the table.

- Place the labels appropriate to this theme on the table. Add items that relate to the theme of clothing, for example:
 - flashcards related to the theme
 - a variety of clothing articles and shoes: seasonal, occupational, for sports and special occasions
 - dolls that learners can enjoy dressing with dolls' clothing
 - books about clothing, especially clothing from long ago
 - photographs from 20 to 50 years ago, so learners can see the type of fashions worn then.

Fantasy corner

In the fantasy corner create a space where learners can explore the theme of clothing. Collect multicultural clothing, including shoes and accessories. Do not include hats for hygienic reasons. Hang clothes from a make-shift clothesline with pegs, so learners can easily remove items to wear, and then re-hang them afterwards. You can also include a laundry basket and an ironing board with an iron.

WEEKLY PLANNER: Weeks 13 and 14

This is what I wear

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes	Welcome each learner. As each learner arrives at school tell them that they will find an item of clothing in their locker. They must bring this with them to morning circle. 			Welcome each learner. Tell learners that some of them will find a shoe in their locker. They must bring this with them when they come to the carpet for the morning ring. (Before learners arrive place individual shoes that are part of a 'pair' into some of the learners' lockers.) 	
	HEALTH CHECK				
Morning circle 10 - 15 minutes	Learners place all the items of clothing from their lockers in the middle of the carpet. Identify and talk about each item: how what we wear shows where we are going and what we are doing, etc. Select five different items from the pile, e.g. jersey, shorts, T-shirt, sandal and hat. Ask learners which one does not belong and why (jersey - winter clothing). 		Talk about the pictures on the poster and go through the questions. Discuss the theme words. Get learners to match each label with an item of clothing from the theme table.	Get learners to describe their shoe. They can say when they would wear it - in what weather, to what kind of occasion? Each learner then puts their shoe behind their back. Based on memory, call out one learner at a time to stand up and find the other shoe that belongs to the one they have. They should remember from the discussions who had which shoe.	Use the sentence strip: I have a ____ (scarf, hat, shirt, etc.). Learners can have a chance to finish the sentence and read it together with the class. 
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes	5 Work time activities: Technology focus 1. Learners make clothing mobiles. They cut out pictures of different clothes from magazines and suspend these from a hangar using string. 2. Learners use a small box to make a suitcase. They design a handle and put pictures of clothes inside it. Creative focus 3. Learners make a collage using different pieces of fabric.	Work time activities: Life Orientation focus Learners cut out pictures of party clothes from magazines, and paste these onto paper to create a person wearing a party outfit, including accessories. 	Work time activities: Technology focus 1. Learners make and decorate cone-shaped party hats. 2. Learners make and decorate paper plate crowns. Prepare these by cutting out the middle of the plate, leaving the rim intact. 4. Collect old socks. Learners make sock puppets by adding faces. Life Orientation focus 3. Learners use pegs to attach pictures of clothes to a winter/summer washing line.		
	Small group time activity: Numeracy focus Begin with counting to 10. Revise the number flashcards 1 to 4. Introduce learners to the number 5 and word 'five'. Give learners a pile of socks. How many? Match the socks. How many pairs? Say oral addition and subtraction problems for learners to solve. Get learners to order the socks according to length (from shortest to longest). They can then describe which socks are the longest, shortest, longer than this pair, shorter than this pair, etc.	Small group time activity: Literacy focus Introduce the sentence for the week: 'What do I have in my suitcase?' Put a labelled picture of an item of clothing inside each suitcase made by the learners. They complete the sentence: 'I have a scarf in my suitcase', etc. Make a small book for each learner by folding two pieces of paper in half. On each page learners can draw or paste a picture of clothing and write a sentence. Encourage learners to read the book out loud.	Small group time activity: Numeracy focus Begin by counting to 10. Revise the names of the shapes already learnt. Show learners an oval: What is this? Discuss what other shape it resembles (egg). Think of things that are oval in shape. Give learners six paper ovals/eggs. They count them. Ask learners to put their eggs inside an egg box. Is the box full? Can they group the eggs in different ways? Talk about it.	Small group time activity: Life Orientation focus Fill a box with a variety of pairs of shoes, including children's shoes, adult shoes, boots, slippers, sport shoes, sandals, work shoes, and others. If shoes are not available, cut out shoes from magazines. Place all the shoes on the floor and mix them up. Learners take turns finding two shoes that match, then say who would wear them, when/where they would be worn, and what the person would do while wearing them.	Small group time activity: Numeracy focus Make a washing line in the classroom. Have a suitcase full of clothing. Take out one item at a time. Talk about it: who wears it and when, what it feels like, etc. Use pegs to hang up the clothing. Talk about the order in which the clothing was hung. Learners must then close their eyes. Re-arrange the order of clothing. Can learners spot the error? Learners must then work together as a team to put the clothing back in the original order.
TIDY UP TIME HAND WASHING SNACK TIME					
Music and movement ring	Begin the lesson by playing some music and letting learners do free movement to it. Play this game. All learners sit in a circle and take off one shoe. Learners cover their eyes while you hide all the shoes. Learners must find a shoe that does not belong to them and bring it back to the circle. When all the shoes have been found, ask a learner whose shoe he found. The learner looks around the circle to see who is wearing the shoe that matches the one he found and returns it.	Begin the ring by singing the Getting Dressed song to the tune of <i>The Farmer in the Dell</i> (see Poster 6). Play this game. Learners put on one sock only. Place the other sock from the pair in a pile in the middle. Learners must find their matching sock. While they look, sing this song together to the tune of <i>Hickory, dickory, dock</i>: <i>Hickory, dickory, dock Let's put on our socks We'll walk around Without a sound When we wear our socks</i>			Begin the lesson by singing this song to the tune of <i>Mary had a little lamb</i>. Learners do the actions: (Child's name) wears his/her jumping shoes, jumping shoes, jumping shoes (Child's name) wears his/her jumping shoes, all day long! Change the verb each time, for instance, dancing shoes/running shoes/skipping shoes.
Outdoor play					Provide thick plastic bags to play 'sack' races. Make a start and finish line. Learners put both feet inside the bag, while holding onto the sides. They see who can jump to the finish line first.
					
Story time				Read a book or tell a story about shoes or clothes. After reading/telling, hand out a few pairs of different kinds, colours and sizes of adult-sized shoes. Learners must describe the shoes and say who they are when wearing them. Where are they going and what work do they do? Give other learners a turn to describe themselves in the shoes.	
	Share a book together related to the theme of clothing. Prepare four sequence cards of a child getting dressed. Discuss each one. Learners order the pictures correctly and dictate a caption for each one. 				

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Ntombi Hippo*
- demonstrated understanding of the above story
- identified the 'e' sound at the beginning of words
- sang and recited songs
- described various items of clothing and when they are worn
- read the sentence strips with the teacher and class
- practised the letter formation of the letter 'e'
- used language for learning

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Put the letter 'e' and the other letters introduced so far from the Learner Resource Book on a table.
- Ask each learner to find the letter 'e'. Ask the learner to find the other letters, one at a time.
- Let the learner read each letter.
- Now ask each learner to trace the letter 'e', saying what they are doing. Check that they start and end in the correct positions.
- Finally ask learners if they know words that begin with 'e'. Remember to say the sound and not the name, i.e. 'eh' not 'eee'.

Part two

- Use clothing from the theme table for this task.
- Ask the learner to identify and describe the various items of clothing.
- Ask the learner to name the season in which we would wear the clothes.
- Ask the learner to describe the place/occasion when such clothes would be worn.

Part three

- Use the sentence strip: *I have a ____ (scarf, hat, shirt, etc.)*
- Place the ending words and matching pictures (or clothes) on the table.
- Ask: 'What do I have in my suitcase?' and point to a picture. The learner replies 'I have a ____' and matches the name label and the item of clothing.
- Let the learner make the sentence. Have the learner read the sentence together with you, pointing to each word as you read.

Assessment checklist

Use this assessment checklist to assess the above task.

Grade R: Term 1		
Checklist for Literacy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Recognise initial sounds of words using picture cards		
2. Select cards that begin with 'h' from a group of cards		
3. Recognise the letter 'e' from a group of letters		
4. Read single letters		

Copy this rubric. You will need one for each learner.

Grade R: Term 2				
Holistic rubric for Literacy Assessment Task Parts Two and Three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
The learner is able to:				
Oral:				
1. Follow the instructions				
2. Answer the questions				
3. Describe the season and occasion for clothing items				
Phonics:				
4. Identify the 'e' sound at the beginning of words				
5. Identify 'e' sounds in the environment				
Reading:				
6. Read the names of the items of clothing				
7. Point to the words as you read the sentence strip				
8. Match words and clothing items				
9. Recognise the 'e' letter in print				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted to 10
- were introduced to the number 5/five
- were introduced to the oval shape
- began to conceptualise the concept of equal sharing and grouping to 6
- worked concretely comparing and ordering objects using appropriate vocabulary to describe length (e.g. long, longer, short, shorter, etc.).

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

- Give the learner a pile of socks. Ask the learner to count them all. How many?
- The learner must then pair up the socks, and count the pairs. How many?
- Ask the learner to describe the socks in terms of length: Which one is longer, shorter, the shortest, the widest, etc.

Grade R: Term 3				
Holistic rubric Numeracy Assessment Task				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
Is the learner able to:				
Counting				
1. Count out objects to ten?				
2. Identify the numerals 1 to 5?				
3. Identify the number words one to five?				
Concept development				
4. Subtract verbally stated problems involving single digit numbers? (within the 0-5 range)				
5. Use concrete apparatus to solve problems?				
6. Groups objects in pairs? (within the 1-5 range)				
7. Solve problems involving sharing and grouping within the 1-5 number range, using concrete objects?				
8. Explain solutions using concrete objects?				
9. Describes objects in terms of their length?				
10. Uses mathematical language?				

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skills-linked activities that required them to learn all about what we wear. They described various items of clothing in terms of their function and occasion. Learners were also introduced to the different materials used to make clothes.

Show learners the following pictures and ask them to:

- name the various items of clothing
- explain who would wear each item and why
- identify the season in which we would wear the clothing
- describe where we would wear the clothing, and for what occasion

See if learners are able to apply what they have learnt over the past two weeks when looking at these pictures.

DAILY PLANNER: Weeks 15 and 16

Shapes and colours in my community

Phonics focus: y and o

Day: Tuesday

Term: 2

Big Book story: *Yellow Yolanda*

Poster: Shapes and Colours in my community

1. Arrival time

Welcome each learner as they arrive at school. Draw learners' attention to their lockers where they will find a coloured shape (can be a cardboard or plastic shape).

2. Health check

As learners arrive at school evaluate their overall health and appearance. Check with parents/caregivers that you know about any allergies learners may have, as well as any medication that needs to be taken.

3. Morning circle

Tell learners to sit in a circle on the carpet. Give a ball of string to one learner. Have the learner hold the end of the string and roll the ball to another learner. Have that learner hold the string and roll the ball to a third learner. That learner then rolls it back to the original learner who started. Have learners guess what shape has been formed by the string. Discuss its properties. Roll up the string and start again. Read the theme message (sentence strip): Today we are learning about shapes.

4. Work time

Play the *Look carefully* game. Ask a learner to stand up (Vusi). Ask another learner: What is Vusi wearing that is red? The learner then names one thing that Vusi is wearing that is red. Continue until all the red items that Vusi is wearing have been named. Remind learners to "look carefully". Continue the game with other learners.

Explain the activities learners need to do today.

Work time: work stations

Creative table 1: Learners use a variety of items to imprint patterns onto playdough. These can be shapes and objects with unusual patterns.

Creative table 2: Learners dip a toothbrush into paint and splatter over a design made from shapes. They can dip into various colours and see the colours change.

Creative table 3: Make shapes out of sandpaper. Learners place paper over the shapes and run over them with the long side of a wax crayon. They will make interesting patterns and use colour in a new way.

Numeracy table: Learners use a variety of shapes to create a picture.

5. Small group time

Introduce the letter 'y'. Hold up the letter 'y' flashcard found in the *Teacher's Guide*. Hold up pictures that begin with the letter 'y': *yellow, yolk, yoghurt, yo-yo, yacht*.

Ask learners what sound they hear at the beginning of each word.

Place some shaving cream inside a Ziploc plastic bag and add a few drops of yellow food colouring. Make sure the bag is sealed tight. Learners can squeeze and play with the bag until the colour is all mixed. Cut a small hole in one corner and squeeze out the now yellow shaving cream onto a table. Learners can practise forming the 'y' letter in the shaving cream on the table. Learners can now complete the letter 'y' worksheet (Worksheet 4).

6. Tidy up time

When all the activities are completed, learners must work together to tidy up. Say this rhyme while tidying:

Copy me, copy me do

Copy me, copy me do

I'm picking up blocks

You can do it too

Repeat rhyme with: *I'm packing toys away, I'm washing the paints, I'm wiping the mess, etc.*

7. Hand washing

Remind learners that they need to wash their hands well after going to the toilet and before eating lunch. Sing a washing song to motivate learners:

It's time now to wash our hands, wash our hands, wash our hands

It's time now to wash our hands, so let's go get them soapy!

12. Story time

Open the Big Book to the story *Yellow Yolanda*. Read the title to the class. Ask: Why do you think she is called Yellow Yolanda? What things can you think of that are yellow in colour?

Read the story, allowing learners to interact as you read, i.e. ask questions, make comments, etc. Place a long sheet of paper on the floor. Learners can position themselves near the paper and also be within reach of some paint. Re-read the story. When you get to the part about how Yolanda's overalls became marked with paint, learners can paint on the paper. By the time you have finished reading, you should have a rainbow strip of paper. This paper can be used as a wall mural, tablecloth or cut up into shapes for another activity.

8. Snack time

As learners sit down to eat their lunch encourage them to first say a word of thanks for the food they are about to eat.

Ask learners to call out the colours and shapes of the food they are eating. They can hold up the food as they eat to show others the colour and shape.

9. Music and movement ring

Begin the lesson by singing a colour 'hokey pokey'. Bring circle stickers in four different colours.

Every learner gets a different colour sticker on each hand and each foot. Sing:

You put your red circle in, you take your red circle out

You put your red circle in, and you shake it all about

You do the hokey pokey, and you turn yourself around

That's what it's all about, etc.

Before the lesson begins, tape shape cut-outs around the space. Put some on the walls, some on the doors, some on the floor, and even hang some from the ceiling. Then darken the room as much as possible and give a torch to a learner. Have the learner shine the torchlight on a specific shape and name the shape. Pass the torch to another learner. That learner must find a new shape and name it.

Put on music and tell learners to dance. Stop the music and call out a colour. Anyone wearing that colour sits down. Keep going until everyone is seated. Then reverse the game. Call out a colour and anyone wearing that colour must start dancing again.

10. Outdoor play

Cut out large shapes (circles, triangles, rectangles and squares) from carpet cut-offs or thick foam. Place these on the grass and have the learners "cross the river" by only walking on triangles or squares or another specified shape.

11. Hand washing and toilet time

As learners line up to go to the toilet call out a shape or colour and they have to try spot it on their way.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 8 as a backdrop for the theme table. Place a yellow tablecloth on the table.

Place the labels appropriate for this theme on the table. Add items that relate to the themes of shapes and colours, for example:

- flashcards related to the theme
- paint an apple box polystyrene tray, each section in a different colour. Also draw a different shape in each section. Provide learners with a variety of small items in a box. Learners can sort the small items into their matching colours or shapes.
- cut out shapes from various materials, so learners can explore the different textures. Also include 3D shapes like a box (rectangular prism), a cube and a ball (sphere).
- actual objects that are varied in shape and colour.

Fantasy corner

In the fantasy corner create a space where learners can explore the theme of colour. Imitate a painter's studio. Have large pieces of paper pasted on the wall or pasted onto makeshift easels. Have a variety of paintbrushes available, rollers, squirt bottles with paint, etc. Also have a variety of materials available, e.g. paints, watercolours, crayons, pastels, chalk, etc. Include palettes (egg boxes will work) where learners can mix colours. Most importantly, include plastic aprons so learners can keep clean. If possible, also cover the floor with a plastic cloth (if carpeted) to avoid damage from spills.

Monday

Tuesday

Wednesday

Thursday

Friday

Arrival
15 - 30 minutes

Welcome each learner.

Ask parents to make snacks for their children in different shapes and colours.

Welcome each learner.

Tell learners that they will find a coloured shape and a bean bag in their locker.

They should bring both items to the morning ring.

HEALTH CHECK

Morning circle
10 - 15 minutes

Introduce the theme for the next two weeks. Look at the theme table and discuss the items.

Play colour and shape scavenger hunts. Call out a shape or a colour or a combination of both. Set a timer and give learners 20 seconds to find objects matching the description. When the timer goes off, learners return to the circle and talk about what they found.

Put different shapes in a bag. Call up learners to put their hand in the bag and to pick a shape. Learners must try to name the shape without looking at it. They must say why they think it is that shape before taking it out of the bag. This helps them realise that shapes are in the environment and are not just seen on flat pieces of paper.

Talk about the pictures on Poster 8 and ask the questions.

Discuss the theme words.

Get learners to match each label with a shape from the theme table.

Prepare a large sheet of paper with different coloured shapes on it. Lay it out on the floor. The shapes must match those you placed in the learners' lockers. Ask each learner to describe the shape they found and its colour. Then call out instructions, e.g. "If you have a red square then throw your bean bag onto the red square on the paper." Continue with other coloured shapes until each learner has had a chance to toss their bean bag.

Work time and small group time

SMALL GROUP TIME:
10 - 15 minutes

TOTAL TIME:
45 minutes

Work time activities:
Creative focus
1. Put a piece of paper and a marble inside a lid with a high rim. Spoon in some paint. Learners roll the marble to create a design on the paper.
2. Give each learner a ball of white dough. Place a few drops of food colouring in the middle. With mixing, the colour comes through.
3. Learners glue toothpicks on paper to make various shapes.
4. Learners make paper doilies bordered with shape patterns. Show them how to cut out the shapes along the borders of a folded piece of paper.

Work time activities:
Numeracy/Creative focus
1. Learners make paint prints using a variety of shape items.
Technology focus
2. Baking: Learners make biscuits using shape cookie cutters.
3. Learners make shape stick puppets. They cut out shapes, add facial features, arms, legs, etc. then paste it onto a stick.
Creative focus
4. Learners use medicine droppers to dribble paint onto paper.

Small group time activity:
Numeracy focus
Begin with counting to 10. Revise the number flashcards 1 to 5. Introduce number '6' and word 'six'. Give each learner a pile of shapes. How many? Count them together. Give learners oral addition and subtraction problems to solve, using the shapes as counters. Learners can then use the shape counters to create simple patterns, e.g. circle, square, circle, square, etc.

Small group time activity:
Literacy focus
Introduce the sentence for the week: What is this? Learners reply: "This is a red square", "This is an orange circle", etc. Prepare sentence strips and matching coloured shapes in advance. Learners read their strips and match them to the shapes. Make a small book for each learner. On each page, learners can paste a coloured shape cut from paper and write a sentence. Learners read the book out loud.

Small group time activity:
Numeracy focus
Begin by counting to 10. Revise the names of the shapes already learnt.

Provide learners with an assortment of cut-out or plastic shapes. They must sort the shapes according to shape, colour and size. Create a graph showing how many of each shape they have. This can be done using the actual shapes. Discuss the data.

Small group time activity:
Numeracy focus
Begin by counting to 10. Revise the names of the shapes already learnt.

Provide learners with an assortment of cut-out or plastic shapes. They must sort the shapes according to shape, colour and size. Create a graph showing how many of each shape they have. This can be done using the actual shapes. Discuss the data.

Small group time activity:
Numeracy focus
Prepare various shapes with colour patterns on them. Make two of each. Make them quite similar so learners will have to pay attention to the fine details (visual discrimination). Place all the shapes face down. Learners must turn over two shapes and see if they match. If yes, they keep the pair. If not, they turn them back face down.

TIDY UP TIME HAND WASHING SNACK TIME

Music and movement ring

Read the shapes rhyme
How about you? (see Poster 8).

Encourage learners to act out the rhyme while you read it again.

Add verses to the rhyme by asking learners to tell you about an oval shape, a heart shape and a diamond shape.

Begin the ring by singing a favourite song. Draw large shapes on the floor using chalk. Each learner must go and stand inside a shape. Learners follow instructions according to their shape, e.g. circles sit down, triangles hop, rectangles dance, squares clap hands, etc. Give each learner four large coloured circles (one red, one blue, one green, one yellow). Learners must place these anywhere on their shape. Call out instructions, e.g. Put your right hand on the yellow circle, put your left foot on the red circle, etc.

Begin the ring by singing a favourite song. Give each learner a piece of coloured cellophane or acetate in red, blue or yellow. Put on music and let the learners dance. When the music stops, they must find a partner, hold their two colours together up to the light, and tell everyone what new colour they made. Now, to the tune of *Here we go round the mulberry bush*, sing the movement rhyme *Make A Shape* (see Poster 8). Learners use their bodies to form shapes. Call out a number. Learners get into groups of that number and all make the shape together.

Outdoor play

Hang up a white sheet outside, e.g. on a fence.

Prepare spray bottles containing different colours of watered down paint. Let learners take turns to spray the sheet until it is completely soaked.

When dry it can be used as a tablecloth.

Collect empty egg cartons and small rocks that can fit in the egg grooves. Choose six different colours.

Paint one rock and one groove in each egg carton the same colour. When the rocks have dried, hide them in the sandpit. Learners take turns to find the rocks and to place each one in a matching coloured section of the egg carton.

Story time

Use the shape stick puppets made during the work time activities to tell a story about shapes.

Start the story and have learners continue.

Write the story as learners dictate it. It can be turned into a class storybook later in the theme.

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Yellow Yolanda*
- demonstrated understanding of the above story
- identified the 'y' sound at the beginning of words
- identified the 'o' sound at the beginning of words
- sang and recited songs
- named various shapes and their properties
- read the sentence strips with the teacher and class
- practised the letter formation of the letters 'y' and 'o'
- used language for learning

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Put the letter 'y' from the Learner Resource Book on a table.
- Ask each learner to 'read' the letter 'y'.
- Now ask each learner to trace the letter 'y', saying what they are doing. Check that they start and end in the correct positions.
- Finally ask learners if they know words that begin with the letter 'y'. Remember to say the sound and not the name, i.e. 'yuh' not 'why'.

Part two

- Use Worksheet 1 for this task.
- Ask the learner to name each shape on the worksheet.
- Ask the learner to read the sentence with you: *This is a ____*. Learner must complete the sentence.
- Ask the learner to read and name each colour.
- Call out a colour and a shape. The learner must draw it accordingly.

Part three

- Use the sentence strip: *This is a ____ (circle, square, etc.)*.
- Place the ending words and matching shapes on the table.
- Ask: 'What is this?' and point to a shape. The learner replies, 'This is a ____' and matches the word and the shape.
- Let the learner make the sentence. Have the learner read the sentence together with you, pointing to each word as you read.

Assessment wheel

Use this assessment wheel to assess Part One of the task on this page.

4 Well developed	3 Age appropriate	2 Still developing	1 Intervention needed
------------------	-------------------	--------------------	-----------------------

Grade R: Term 2				
Holistic rubric for Literacy Assessment Task Parts Two and Three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
The learner is able to:				
Oral:				
1. Follow the instructions				
2. Answer the questions				
3. Describe the shape and name the colour				
Phonics:				
4. Identify the 'y' sound at the beginning of words				
5. Identify 'y' sounds in the environment				
Reading:				
6. Read the names of the shapes and colours				
7. Point to the words as you read the sentence strip				
8. Match words and shapes / words and colours				
9. Recognise the letter 'y' in print				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted to 10
- were introduced to number 6/six
- revised all shapes and colours
- created and completed simple patterns
- solved orally stated addition and subtraction problems up to 6
- collected and sorted data.

TASK

- Provide the learner with a pile of shapes. Ask the learner to sort the shapes into groups and to explain the groupings.
- Start a simple pattern with two shapes. Ask the learner to continue the pattern.
- Ask the learner to create a new pattern using three shapes.
- Ask the learner to use the shapes to create a picture. Ask the learner to describe the picture.

Grade R: Term 1		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Count to 10		
2. Write numbers 1 to 6		
3. Sort shapes into groups according to a set of criteria, e.g. four sides, three sides, round, flat		
4. Create and continue simple patterns		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skills-linked activities that required them to become aware of colours and shapes around them. They used shapes to create pictures and patterns. They also learnt about colour mixing, using primary colours to create secondary colours.

Show learners the following pictures and ask them to:

- name the shapes
- name the colours
- describe the characteristics of each shape
- say which of the colours are primary colours
- name the colour made when the two primary colours are mixed together

See if learners are able to apply what they have learned over the past two weeks when looking at these pictures.

Phonics focus: x

Day: Monday

Term: 2

Big Book story: *Friends*

Poster: Opposites

1. Arrival time

Welcome each learner as they arrive at school. Chat to them about their weekend.

2. Health check

As learners arrive at school evaluate their overall health and appearance. Look out for any signs that something is wrong such as anxiety, forgetfulness, a change in usual behaviour patterns, etc. and try to find out the cause of this.

3. Morning circle

Read the theme message (sentence strip): Today we are learning about opposites. Talk about their weekend, the weather and any administration issues.

Draw attention to the theme table. Ask: What can you see on the table? Can you guess what we are learning about this week? Play "I spy" with the items or pictures on the table, e.g. I spy something that is the opposite of hard (a rock). Learners guess what it is (something soft – a feather).

4. Work time

Explain the activities at the various work stations. If necessary, demonstrate how to complete an activity. Talk about the number of learners permitted at each station and learning centre.

Throw a bean bag to a learner and call out a word. The learner catches the bean bag, gives the opposite, then throws the bean bag back to you.

Work time: work stations

Life Orientation/Creative table: Learners draw day and night pictures.

Technology/Creative table: Learners tear long and short strips from various coloured pieces of paper and create a collage.

Creative table 1: Learners make mud and shaving cream designs (dirty-clean, dark-light).

Creative table 2: Learners do blow painting. They dribble paint onto paper and blow designs using a straw. Experiment to see if learners can create big and small patterns.

5. Small group time

Introduce the letter 'x'. Hold up the letter 'x' flashcard in the Learner Resource Book. Discuss its sound.

Tape a large 'x' on the carpet and get learners to walk the correct letter formation. Give each learner a large 'x' on paper. They can form the letter with counters.

Give learners the letter 'x' template in the Teachers' Guide and let them decorate the lower case and capital letters.

Learners can now complete the letter 'x' worksheet (Worksheet 1).

6. Tidy up time

Remind learners that once the work is done it is time to clean up. Sing this new song to the tune of *Twinkle twinkle little star*:

*It is time to clean up now
Clean up, clean up, we know how
We can clean up, you will see
Just how clean our room can be
It is time to clean up now
Clean up, clean up, we know how*

7. Hand washing

Sing this song to the tune *Hi-ho, hi-ho, it's off to work we go*:

*Hi-ho, hi-ho
To toilet off we go!
We'll use the loo
Wash our hands too
Hi-ho, hi-ho, hi-ho!*

12. Story time

Open the Big Book to the story called *Friends*. Look through the story and discuss the pictures. Ask learners to say how they would feel in each situation. Read the story to the class. Discuss the meaning of friendship: how to be a good friend and how to keep a friend. After reading, have the learners dictate what they think a good friend is. Let pairs of friends talk about their similarities and differences, e.g. the things that they both like and the things that one likes that the other doesn't. Learners need to appreciate that although they have differences they can still get along.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 9 as a backdrop for the theme table. Place a tablecloth on the table.

Place the labels appropriate for this theme on the table. Add items that relate to the theme of opposites, for example:

- Collect a variety of items with their opposite, e.g. feather and rock, mirror and sandpaper, long and short rulers, big and small ball/book, long paper towel inner and short toilet roll inner, bottles of different sizes, etc.
- Make cards with opposites that can be acted out, e.g. stand-sit, up-down, left-right, fast-slow, old-young, hot-cold, happy-sad, etc. Make two sets of cards so they can be used to play a matching game.

Fantasy corner

Create a space in the fantasy corner where learners can explore the theme of creativity and opposites. Prepare a variety of materials which learners can use to make their own 'sculptures'. They can use toilet rolls, cardboard boxes, glue and tape to create fantasy characters, buildings, transport, etc. The space can basically be transformed into a workshop. Have a space allocated for work-in-progress, so learners can return to what they were busy doing the next day. It may be a good idea to have a timer in this area, so learners don't spend all their time here and neglect other areas.

8. Snack time

As learners sit down to eat their lunch encourage them to first say a word of thanks for the food they are about to eat.

Ask learners to describe the food they are eating using opposites, e.g. *My bread is soft but my apple is hard. / My grapes are sweet but my noartjie is sour.*

9. Music and movement ring

Begin the lesson by singing a favourite movement song.

Prepare 16 craft sticks. On eight of them write opposites like *up, down, in, out, forwards, backwards, fast, slowly*. Put these sticks in a cup. On the other eight sticks, write action words like *crawl, walk, hop, skip, run, gallop, etc.* Put these sticks in another cup.

Make a big circle or square on the floor using tape or string. Call a learner to choose a stick from each cup. Read the instructions for all the learners to do, e.g. if the learner picked out *crawl* and *backwards*, then all the learners try that. If *in* and *walk* were selected then all the learners would walk in the circle, etc.

10. Outdoor play

Reinforce opposites by making an obstacle course where learners will need to move up or down, in or out, over or under, above or below, to the bottom or the top, etc.

11. Hand washing and toilet time

After outdoor play learners line up to go to the bathroom to clean up before storytime. They can sing this song to the tune of *London Bridge*:

*Everybody make a line, make a line, make a line
Everybody make a line, right now it's toilet time!*

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes			Welcome each learner. Place an object from the theme table in each locker. Learners must bring it with them to morning circle.	Welcome each learner. Place an opposite word card from the theme table in each locker. Tell learners to bring their card to the morning circle.	
Morning circle 10 - 15 minutes		Talk about the pictures on Poster 9 and ask the questions. Discuss the theme words. Get learners to match each label with an object from the theme table.	Learners bring their object to morning ring. They describe what it looks like and how it feels. Learners then find another learner who has the opposite of their item.	One learner at a time holds up their card and acts it out. The learner who has the opposite card then stands up and acts it out. Continue until all learners have had a turn.	Learners sit in a circle. Say a word. Learners must show the opposite meaning, e.g. Point to a learner and say "big". The learner must curl up and try to make himself small. Point to another learner and say "scared" or "nervous". The learner must act calm and relaxed, etc.
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes	 Work time activities: Technology/Creative focus 1. Learners go outside with paper and crayons and make a rubbing of the bark of a tree. 2. Learners use various hard and soft items to paint with, e.g. a stick, cotton wool, a feather, a stone, etc. 3. Learners use play dough to make long and short people, animals, etc. 4. Learners make a necklace using fat and thin macaroni.	 Work time activities: Creative focus 1. Learners paint using fat and thin strings. 2. Learners use various hard and soft materials to create a collage. Technology focus 3. Learners make big and small finger puppets from paper.	 Small group time activity: Numeracy focus Begin by counting to 10. Revise the names of shapes already learnt. Provide learners with various counters, buttons and objects from the theme table. Tell them to sort the items but don't give them any criteria. Once sorted learners must explain their reasons for doing it that way. Now tell them to sort the items again, but this time using a different method of sorting.	 Small group time activity: Literacy focus: Use the cards from the theme table to play a memory game. Spread the cards out face down on the table. One learner flips over a card and says the word on the card. Then he flips over another card. If it is the opposite, he takes both cards and gets a point. If they are not opposites, both cards are replaced.	 Small group time activity: Science focus Talk about how things can change from hard to soft or from soft to hard. Can learners think of any examples of this? Have a boiled egg and a raw egg. Ask about what happened to the egg after it was boiled - did it change from hard to soft or from soft to hard? Another example is bread to toast. Have some pasta and cooked pasta. Let the learners touch it. Have other examples of foods that change from hard to soft like popcorn, raw and fried onions, raw and cooked carrots and pumpkin.
Music and movement ring	Begin the ring by singing a favourite song. Line up the chairs to make a bus. Choose one learner to be the driver. Ask each learner for the opposite of a word, e.g. hard-soft, big-small, clean-dirty, etc. After answering correctly, the learner can go sit on the bus. Continue until all the learners are on the bus. When the bus is full, the driver chooses a place to go to. All learners help to make the motor sound until the bus driver stops. Select a new bus driver and start again.		Begin the ring by singing a favourite song. Play a musical freeze game. Play some music. Tell learners to move or dance around the room. When you stop the music, shout "STOP". When you start the music again, shout "GO". Repeat.		Begin the ring by singing the Opposites song. Learners get into pairs. First they must act out a common or similar interest or quality. Then they must act out an opposite interest or quality, e.g. one learner can be tall / a boy / fast / sad, etc. while the other can be short / a girl / slow / happy, etc.
Outdoor play	Place masking tape on an outside wall at various heights. See if learners can jump and touch each height. How many times can they do this in a row? Learners can then throw balls against the wall and try to hit each height.			Instead of using a skipping rope, have learners skip using a hula hoop. They move under and over, in and out.	
Story time			Read through the theme flashcards. Hand them out. Select a learner to hold up her card and to read the word. She then uses that word to begin telling a story. When she runs out of ideas, she points to another learner who then holds up his card, reads the word and uses that word to continue the story.		

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Friends*
- demonstrated understanding of the above story
- identified the 'x' sound at the beginning of words
- sang and recited songs
- named words and their opposites
- read the sentence strips with the teacher and class
- practised the letter formation of the letter 'x'
- used language for learning.

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Put the letter 'x' from the Learner Resource Book on a table.
- Ask each learner to 'read' the letter 'x'.
- Now ask each learner to trace the letter 'x', saying what they are doing. Check that they start and end in the correct positions.

Part two

- Use the 'opposite' cards from the theme table for this task.
- Read a word on a card. Ask the learner to find the opposite. Learners can also find items on the theme table to show the opposite meaning.
- Call out a word. Ask the learner to say the opposite.
- Put out several cards making pairs of opposites. Mix them up. Now read them with the learner. Learner matches the opposites.

Part three

- Use the sentence strip: Look at the ____ (tall man, fat cat, etc.).
- Place the ending words and matching pictures on the table.
- Say: 'Look at the ____' (give an oral description of a picture). The learner replies, 'Look at the ____' and completes the sentence by finding the matching picture.
- Let the learner make the sentence. Have the learner read the sentence together with you, pointing to each word as you read.

Use this assessment checklist to assess the above task.

Grade R: Term 2				
Holistic rubric for Literacy Assessment Task Parts Two and Three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
The learner is able to:				
Oral:				
1. Follow the instructions				
2. Answer the questions				
3. Say the opposite of a variety of words				
Phonics:				
4. Identify the 'x' sound at the beginning of a few words				
Reading:				
5. Read the opposite words				
6. Point to the words as you read the sentence strip				
7. Complete a sentence with a matching picture				
8. Recognise the 'x' letter in print				
9. Trace the letter 'x' using the correct letter formation				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted to 10
- revised numbers 1 to 6 and number words one to six
- revised all shapes and colours
- solved oral addition and subtraction problems with solutions to at least 6
- explained own solutions to problems

This assessment task may take several days to complete. You can do it on a one-to-one basis with each learner or in a small group.

TASK

- Give the learner a pile of 10 counters. Ask the learner to count out 6 counters. How many are left?
- Now the learner must break up the 6 counters into two groups. How many in each group?
- Give the learner a piece of paper with two circles (sets) drawn on it. The learner must place some counters in one circle and some in the other circle.
- The learner must explain how many in each group.
- The learner can create a new grouping and then explain that one too.

Grade R: Term 2		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Count to 10		
2. Write numbers 1 to 6		
3. Break up 6 into groups		
4. Explain own groupings		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skills-linked activities that required them to learn about opposites. They were able to name the opposite word for various actions. Learners also explored various ways of moving their bodies, including rotate, elevate and balance.

Show learners the following pictures and ask them to:

- name the pictures
- match the pictures to their opposites
- name other opposites not illustrated here

See if learners are able to apply what they have learnt over the past two weeks when looking at these pictures.

DAILY PLANNER: Weeks 19 and 20

Gardens and bugs

Phonics focus: w and z

Day: Wednesday

Term: 2

Big Book story: *Fastest, smartest flea!*

Poster: Gardens end bugs

1. Arrival time

Welcome each learner as they arrive at school. Tell learners not to get a fright when they find a bug inside their locker!

2. Health check

As learners arrive at school evaluate their overall health and appearance. Ensure that every learner knows their full name, address and an emergency contact number (home, work or cellphone) for parents/caregivers.

3. Morning circle

Read the theme message (sentence strip): Today we are learning about gardens/bugs. Ask learners whether they think insects are good or bad. How might they be good? Give examples of good bugs, e.g. ladybugs eat aphids and help protect crops and flowers, bees make honey for us to eat, butterflies spread pollen to help plants grow, etc. Also discuss any dangerous or annoying bugs. Sing the song *It's an insect* to the tune of *Clementine* or make up your own tune (see Poster 10).

4. Work time

Hold up picture cards of insects. Get learners to clap out the syllables in their names. Explain the activities at the different work stations. Some of the steps may need to be demonstrated.

Work time: work stations

Science/Technology table: Prepare cut-up egg cartons, pipe cleaners, scraps of cardboard and paper, buttons, glitter, cotton wool, etc. Learners use these materials to make an insect of their choice.
Creative/Technology table 1: Learners make bug eyes. Cut egg cartons into sections of two. Cut out the centres of the cups so learners will be able to see. Using a punch, make a hole in each side so that string can be attached. Learners paint and decorate the 'eyes'.
Creative/Technology table 2: Prepare butterfly shapes out of paper. Learners collage the wings with tissue paper. Add pipe cleaners for antennae.

5. Small group time

Introduce the letter 'w'. Hold up the 'w' flashcards found in the Teacher's Guide. Show learners objects and pictures that begin with the w sound: wood, water, worm, watch, walk, walrus, wagon, woman, watermelon, wheel, whistle, whale, whiskers, windmill, etc. Identify and discuss each picture. Place all the pictures in a bag. Learners have turns to take a card from the bag and mime the word. The rest of the group must guess what it is. Provide water and pieces of wood. Learners can practise the correct letter formation for the letter 'w' by painting with water onto small pieces of wood. Learners complete the letter w worksheet (Worksheet 2).

6. Tidy up time

Remind learners that when the work is finished it is time to clean up. Sing a favourite tidy up song to motivate them.

7. Hand washing

Sing this song to the tune of *Row, row, row your boat*:
Wash, wash, wash your hands
Play a soapy game
Rub and scrub, and scrub and rub
The germs go down the drain. HEY!

12. Story time

Open the Big Book to the story *Fastest, smartest flea*. Spend time looking at the illustrations. Ask: What is the story about? Which insects are in the story? Read the story. Stop regularly to ask questions, and to answer any questions learners may have. Make sure that learners follow and understand the humour in the story. After reading the story, get learners to re-tell the story in their own words. They can then get into small groups and act out the story for the class.

8. Snack time

As learners sit down to eat their lunch encourage them to first say a word of thanks for the food they are about to eat.

Ask learners if they know what insects eat. Some insects eat other insects, like the praying mantis. Some insects eat fruit, like fruit flies. Others eat leaves, like caterpillars. Most insects eat anything they can find like leaves, flowers, fruit, grass, dirt, etc. Ask learners which insect they would like to be and why.

9. Music and movement ring

Begin the lesson by singing *The Ants go marching* (see Poster 10). Make a buggy band. Provide each learner with a baby food jar lid. These lids have raised centres that make a clicking sound when pressed. Show learners how to hold the lid and press the centre with their thumb. Ask learners to imagine that the clicking is the sound of insects in the garden, especially in the evening. Learners can pretend to be noisy bugs while clicking on their lids. Sing *The ants go marching* again, this time clicking lids to the tune.

10. Outdoor play

Use a thick black koki to draw big insect pests on a large sheet of paper. Put up the sheet on a wall outside or on the floor. Give learners fly swatters dipped in paint and let them swat away! Learners should wear aprons for this activity.

11. Hand washing and toilet time

As learners line up to go to the toilet, they can move like different insects, e.g. they can buzz like a bee, jump like a grasshopper, stalk like a praying mantis, fly like a butterfly, crawl like a beetle, etc.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 10 as a backdrop for the theme table. Place a green tablecloth on the table.

Place the labels appropriate for this theme on the table. Add items to the table that relate to the theme of gardens and bugs, for example:

- Have a variety of pot plants on the table to create the look of a garden.
- Have plastic insects on the table, pasted onto the wall, tied onto sticks and placed in the pot plants, on the flowers, etc.
- Try to include bug boxes, with live insects in them and magnifying glasses for learners to examine the bugs. (All insects must be released at the end of the theme.)
- Place labelled pictures of insects up on the wall around the table.
- Display fiction and non-fiction books related to the theme.

Fantasy corner

Create a space in the fantasy corner where learners can explore the theme of gardens and bugs. Set up a Bug Science Lab by including the following:

- white shirts that look like the coats scientists wear, goggles, clipboards with information about insects, tweezers, bug jars and a microscope if available
- plastic and real bugs to examine
- a code of conduct – how to treat the bugs carefully and not hurt them.

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes	Welcome each learner. Ask parents/caregivers to send an empty, clean baby food jar to school the next day, with the lid.		Welcome each learner. Tell learners to look in their lockers for a card showing the life cycle of the butterfly. 	 	Welcome each learner. Make several different coloured butterflies. Cut them in half. Place a half in each locker. Tell learners to bring these to morning ring.
Morning circle 10 - 15 minutes	Take learners on a bug hunt. They can collect bugs for the theme table. Emphasise humane handling of the insects. All insects must be stored in bug boxes or well-ventilated jars. All insects should be released after a few days. Sing the <i>Hunting bugs</i> song: <i>A-hunting we will go A-hunting we will go We'll catch a (insect) and put it in a box And then we'll let it go!</i>	Talk about the picture on Poster 10 and go through the questions on the poster. Discuss the theme words. Get learners to match the labels with insects from the theme table.	Teach learners about the life cycle of the butterfly while they look at their cards. Tell them about metamorphosis. Teach them that it means 'to change'. Discuss how the caterpillar changes into a butterfly. Teach the rhyme <i>Caterpillar change</i> (see Poster 10).		Learners match their butterfly halves. Sing the <i>Watch out for the bugs</i> song to the tune of <i>Jingle Bells</i>: <i>Clap your hands Stamp your feet Wiggle all around Throw your hands up in the air then bend and touch the ground! Hold your head Hold your hips Give yourself a hug Lay yourself down on the floor B-U-T — watch out for the bugs, AAAH!</i>
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes			Work time activities: Science/Technology focus - Learners can make potato bugs using potatoes, toothpicks, pipe cleaners, paper, buttons, beads, etc.) - Learners paint a rock to resemble an insect, adding pipe cleaners for legs. - Learners press flowers, then use them to make a flower collage. Creative focus - Learners do blob painting. Prepare paper cut in the shape of a butterfly. Blob paint in the middle of the paper, fold it in half and press. Open to see the matching wings inside.	Work time activities: Creative focus - Put plastic spiders on a tray of paint. Learners dip them in and make spider prints on paper. Science/Creative focus - Learners make bugs and flowers from handprints. They make handprints on paper then add antennae, eyes, wings, etc. for bugs, and a stem and leaves for a flower. - Learners do leaf rubbings. They collect a variety of leaves, place these under paper and rub over with crayons to create a print.	Work time activity: Science/Technology focus Learners make bug stick-puppets. They draw/trace, decorate and cut out a bug, then glue it onto a stick. 
	Small group time activity: Numeracy focus Begin with counting to 10. Revise the number flashcards 1 to 6. Give each learner a plastic bug. How many legs? Count them. How many groups of 2? How many groups of 3? Make bug counting books. Cut out paper in the shape of an insect like a worm or a ladybird. Write a number and number word on each page (1 one, 2 two, etc.). Learners draw the required number of bugs on each page.	Small group time activity: Literacy focus Introduce the sentence for the week: 'Do you see the ...?' Learners reply 'Yes, I see the ... (spider, worm etc.)'. Prepare the sentence strips in advance. Also have various insect pictures. Learners arrange their strips and match them to a picture. Make a small book in the shape of an insect for each learner. On each page learners draw an insect picture. Write the description to match the picture for each learner. Encourage learners to read the book out loud.	Small group time activity: Numeracy focus Begin by counting to 10. Revise the names of shapes already learnt. Provide learners with pre-cut shapes including lots of narrow rectangles that look like legs and antennae. Look at the different shapes and talk about what part of a bug they might be used for. Learners use the shapes to design bugs.	Small group time activity: Science focus Show a plant from the theme table. Teach learners all about the different parts of a plant. 	Small group time activity: Science focus Explain that an insect's body has three parts called a head, a thorax and an abdomen. Teach them that insects have six legs and spiders have eight legs. Use magnifying glasses and examine the live insects. Learners can then draw an insect, paying close attention to details like legs, wings and antennae.
Music and movement ring		Begin the ring by singing <i>The insect song</i> to the tune of <i>Three blind mice</i> (see Poster 10). Learners learn the words and act out the song. They can buzz around like bees, then jump like grasshoppers, etc. 	Learners say the Gogga rhyme below and enact it to music: <i>See the little gogga Crawl across the floor See the little gogga Crawl right up the door See the little gogga Cross the ceiling to the wall See the little gogga I hope it doesn't fall! See the little gogga Creep outside into the sun Come again, little gogga Watching you is fun!</i>		Begin the ring by singing a favourite insect or movement song. Play a game of <i>Mosquito tag</i>. Choose six learners at a time to be the mosquitoes. Give them six stickers each. Play fast music. The mosquitoes must chase the other learners. Once caught, the mosquito puts a small sticker on the learner, thereby giving them a 'mosquito bite'. When the first six mosquitoes have used up all their stickers, select another six learners to have a turn.
Outdoor play	Hide some plastic bugs in the sandpit and tell learners to dig them out.  			Outside, prepare tubs of water and sponges of all shapes and sizes. Learners can create designs with the wet sponges on the cement.	
Story time			Make a butterfly-shaped book. Enlarge pictures of the lifecycle of the butterfly and paste one on each page. Get learners to dictate what happens at each stage. Write the sentence below the matching picture. Read the book to the class. Put the book in the reading corner where learners can access it.	Use the bug stick-puppets made during the work time activities to tell an insect story. Learners can add their input as well. 	

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Fastest smartest, flea!*
- demonstrated understanding of the above story
- identified the 'w' sound at the beginning of words
- identified the 'z' sound at the beginning of words
- sang and recited songs
- named various insects and described their appearance
- read the sentence strips with the teacher and class
- practised the letter formation of the letters 'w' and 'z'
- used language for learning

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Put the letter 'w' from the Learner Resource Book on a table.
- Ask each learner to 'read' the letter 'w'.
- Now ask each learner to trace the letter 'w', saying what they are doing. Check that they start and end in the correct positions.
- Finally ask learners if they know words that begin with letter 'w'. Remember to say the sound and not the name, i.e. 'wih' not 'double you'.

Part two

- Use Poster 10 for this task.
- Ask the learner to name the various insects on the poster.
- Ask the learner to talk about the insects s/he has seen this week.
- Ask the learner to clap out the syllables in each insect's name.
- Ask the learner to think of words to describe the insects.

Part three

- Use the sentence strip: I see the ____ (spider, fly, bee, etc.).
- Place the insect name labels and matching pictures on the table.
- Ask: 'Do you see the ____?'. The learner replies 'I see the ____' and adds the word and the picture to complete the sentence.
- Let the learner make the sentence. Have the learner read the sentence together with you, pointing to each word as you read.

Assessment wheel

4 Well developed 3 Age appropriate 2 Still developing 1 Intervention needed

Grade R: Term 2				
Holistic rubric for Literacy Assessment Task Parts Two and Three				
	1	2	3	4
	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
The learner is able to:				
Oral:				
1. Follow the instructions				
2. Answer the questions				
3. Talk about personal experiences				
Phonics:				
4. Identify the 'w' sound at the beginning of words				
5. Identify 'w' sounds in the environment				
Reading:				
6. Read the insect labels				
7. Point to the words as you read the sentence strip				
8. Complete a sentence with a matching picture				
9. Recognise the 'w' letter in print				

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted to 10
- revised numbers 1 to 6 and number words one to six
- revised all shapes and colours
- solved oral addition and subtraction problems with solutions to at least 6

This assessment task may take several days to complete. You can do it on a one-to-one basis with each learner or in a small group.

TASK

- Give the learner toothpicks, a dice and six ladybug pictures (without legs).
- Tell the learner to throw the dice, and to identify the number.
- Have the learner match the number on the dice to the correct number word flashcard (one to six).
- The learner then counts out the same number of toothpicks as the number on the dice and attaches these 'legs' to one of the ladybug bodies.
- Continue in the same way, with the learner identifying the number on the dice, matching it to the word, and adding the correct number of legs until all six ladybug pictures have been used.
- Present learners with opportunities to solve problems using concrete apparatus or drawings, e.g. there are four lady each one has two antennae, how many altogether?

Grade R: Term 2		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Count to 10		
2. Write numbers 1 to 6		
3. Match number, word and picture (dots on the die)		
4. Count out matching items		
5. Solve verbal problems using counters or other concrete apparatus		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skills-linked activities that required them to learn all about gardens and bugs. Learners have classified insects as having six legs and spiders as having eight legs. They are also able to describe what insects look like and where they live.

Show learners the following pictures and ask them to:

- name each insect
- describe each insect (in terms of appearance)
- say what it eats
- say where it lives
- say if it is dangerous

See if learners are able to apply what they have learnt over the past two weeks when looking at these pictures.

DAILY PLANNER: Weeks 21 and 22

Time and weather

Phonics focus: c (hard c)

Day: Monday

Term: 3

Big Book story: *Clouds*

Poster: Time and weather

1. Arrival time

Welcome each learner at the door. Let each one feel especially welcome after the holiday break. Ask what the learner did over the holidays. Remind the learner to keep her/his locker space neat and tidy.

2. Health check

Pay particular attention to learners' general appearance. Poor hygiene and dirty clothing could be indicators of neglect. Record your observations. (See pages 14-15 in the Teacher's Guide.)

3. Morning circle

Welcome learners to ring. Sing the *Good morning Mr Sun* song on Poster 11. Read the theme message: Today we are learning about weather. Ask if any of the learners wish to share their holiday news. Learners make sentences using the frame 'In the holidays, I ...'

4. Work time

Read the story *Clouds* on page 28 of the Big Book. Afterwards take the learners outdoors and let them look at the sky. Ask them what cloud-pictures they can see. (See the follow-up activity under Creative in the Weekly Planner.)

Work time: work stations

Numeracy table: Place a variety of seasonal clothing into an old suitcase. Let learners sort them according to clothes we wear when it's hot and those we wear when it's cold.

Literacy table: Provide plasticine for learners to use to make the letter 'c'. Learners can also form objects that begin with 'c', e.g. cat, car.

Creative table: Let learners cut out pictures that relate to the theme. They separate the pictures into hot weather items and cold weather items.

U: Place various items of clothing, e.g. a scarf, beanie, swimming costume, etc. one at a time into a 'feely' bag or box. (This is an opaque bag or box that learners cannot see into.) Learners reach into the bag and try to identify what the item is, what it is made of, and in what type of weather it is worn.

5. Small group time

Use Poster 11 to initiate a discussion around weather, different times of the day and the seasons. Allow learners to label the poster using the flashcards on page 14 of the Resource Book. Then complete the sentence strips: Today is ... (hot/cold/ etc).

Introduce the letter 'c'. Make copies of the letter templates. Learners glue cotton wool onto the 'c' template.

6. Tidy up time

Divide learners into groups, e.g. suns, raindrops, clouds, rainbows, etc. Allow the groups to pack away materials and equipment. Use an egg timer to time the activity. Reward the group who completes the task best with a clap from the class or by sticking stars on their foreheads.

7. Hand washing

Make sure learners wet, soap, wash and dry their hands. You can sing the following action song with them to the tune of *Frère Jacques*:

*Taps and bottoms, taps and bottoms
In between, in between*

*Scrub those little fingers, scrub those little fingers
'Til they're clean, 'til they're clean!*

12. Story time

Turn to the story *Clouds* on page 28 of the Big Book. Look at the pictures on each page. Ask the following questions:

Page 1: What do you think this story is about? Why do you say so? What is in the sky? What sound does the word 'clouds' begin with? How many picture clouds do you see? What is the little girl's cat's name? What sound does that name begin with? What time of day is it? How can you tell?

Page 2: How many picture clouds does the little girl see now? Is that more or less than what she saw in the morning? What time of day is it now? How can you tell? Is it earlier or later?

Page 3: How many clouds does the little girl see now? Is that more or less than what she saw in the morning? What time of day is it now? How can you tell?

Read the story.

8. Snack time

Ask learners to help serve fruit, sandwiches and juice. Remind learners about good eating manners. Use a small hand-held mirror to let learners look at themselves eating. Choose a learner to say a 'word of thanks' for the food..

9. Music and movement ring

Talk about what learners discovered about clouds when they did the cottonwool in water experiment, i.e. clouds are light and fluffy until they 'fill' with water. Let learners move like light fluffy clouds and then like heavy water-filled clouds. Clap hands to make thunder. Let them fall like rain to the ground. You can use instruments or a piece of suitable music to accompany this movement exercise.

10. Outdoor play

Let learners bring raincoats and umbrellas to school, if they have them. Alternatively, make raincoats from big plastic rubbish bags. Let learners run under the sprinkler. Let them say what they hear, see and feel.

As a follow-up activity, set out different kinds of fabrics, including plastic. Learners 'test' the fabrics in water to see which ones absorb water, and which ones repel water. They can talk about why they think this is so.

11. Hand washing and toilet time

Learners float like clouds and go quietly to wash and use the toilet. Remind learners to flush after using the toilet, and to wash and dry their hands. Tell learners to close the tap properly after use.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery.

Use Poster 11 as a backdrop for the theme table.

Place a green tablecloth on the table.

Types of weather

Have pictures depicting the different weather conditions, e.g. hot, cold, windy, cloudy. Cut out the labels from the Resource Book and use them to label the pictures on your table.

Types of clothing

Have pictures of people wearing seasonal clothing, e.g. swimming costumes and shorts in summer. Also display actual items of clothing around the poster on the bulletin board. Make labels for these items and label them.

Accessories

Have pictures or actual items such as sunglasses, hats, umbrellas, gloves and scarves on the table.

Fantasy corner

Have a selection of seasonal clothing for learners to dress up in. Each day, ask learners to dress for a different season. Observe whether learners are able to select the correct clothing for the chosen season.

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes			Prepare small cards with pictures of suns, clouds, rain and items of seasonal clothing. Place one card in each locker. Have learners collect their cards and bring them to morning circle.		
Morning circle 10 - 15 minutes	Ask learners what they've noticed about the weather on their way to school. Ask them to find the matching picture on Poster 11. Ask how they feel in this type of weather, what they wear, if and why they like it.	Welcome learners to morning circle. Tell them that you are happy to see them. <i>Sing The more we are together song on Poster 11.</i>	Welcome learners and ask each learner to talk about the picture on their card. You can also get them to match the cards that belong together, e.g. a sun and a bathing costume.	Welcome each learner. Ask the learner what s/he would have worn this morning if it were a winter's day. Remind the learner to check that her/his faced cloth is clean and hanging where it should be.	Welcome learners to the ring. Ask the learners how today's weather is different from or the same as yesterday's weather. Learners make weather sentences using the words: today / yesterday / tomorrow.
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes	 Work time activities: 1. Numeracy focus: Make large number dice. Learners throw the dice, count the dots and then draw the same number of clouds, raindrops or suns. 2. Literacy focus: Prepare letter 'c' pegboard templates. Learners copy the 'c' onto pegboards. 3. Literacy focus: Let learners sort toys into those that begin with 'c' and those that don't. 4. Place beads and string on table. Learners make necklaces.	 Work time activities: 1. Numeracy focus: Learners draw clouds and cut them out. They sequence them from biggest to smallest. 2. Life Orientation / Creative focus: Learners make carrot salad. Put out small bowls, spoons, grated carrot and orange juice for each child to cook with. 3. Creative/Literacy focus: Provide carrot tops and paint. Learners make 'c' shaped prints by dipping carrot tops into paint.	 Small group time activity: Literacy focus: Make lotto boards for each learner with a shirt, pants, socks, dress on it. Cut and label exact copies of these. The learners find the matching label, paste it onto the lotto board and colour it in. They 'read' the name of each item.	 Small group time activity: Literacy focus: Make flashcards with weather words on them. Cut each card through the middle in a distinctive way. Learners match the cut cards to complete a weather word. They 'read' the completed word and choose one word to draw.	 Small group time activity: Numeracy focus: Talk about the weather and look at what everyone is wearing. Use Worksheet 4. Follow the instructions on the worksheet to make a pictograph.
Music and movement ring			Sing and act out the words to <i>This is the way we wash our clothes</i> on Poster 11.	Explain to the learners that the water on Earth is thousands of years old. There is no new water, so we need to look after the water we have. Discuss why we should drink clean water. Sing <i>Splash went the raindrop</i> on Poster 11.	
Outdoor play	Fill different sized bags with different amounts of water. Learners feel the weight. Make small holes in each bag so water can 'rain' out. How does the bag feel as the water drains?		Set out ice cubes and containers of water. Learners experiment with what happens to the ice cubes when placed in water.		Put a kettle on to boil. Learners note steam (water vapour). Learners move like different forms of water, e.g. running water, steam, rain, melting ice.
Story time		Literacy focus: Remind the learners about the <i>Clouds</i> story. Read the story again, but this time have the learners clap each 'picture cloud' in the story (cat = 1 clap; guitar = 2 claps, etc.). This is a syllabication exercise.			

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks, learners:

- listened to the story *Clouds*
- identified the 'c' sound at the beginning of words
- sang and recited songs
- used picture clues to predict the story
- read the sentence strips with the teacher and class
- wrote simple sentences, with the help of the teacher, and read them to the class
- used language for learning.

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Put the following pictures, drawn or cut from magazines on a table: cloud, carrot, cat, queen, dog, apple
- Ask the learners to 'read' the pictures.
- Now ask the learners to point to one of the cards, e.g. 'Point to the cat'.
- Then ask what sound the picture begins with, e.g. 'Let's slow-speak the word cat: c-a-t. What sound does cat start with?'
- Finally ask the learners if they know other words that begin with 'c'. Remember to say the sound of the letter and not its name, i.e. 'cih' not 'see'.
- Repeat with the other cards.

Part two

- Ask the learners to sing Good morning Mr Sun or This is the way we wash our clothes.

Part three

- Ask the learners to tell you what the weather is like.
- Then let the learners complete the weather chart and the sentence strip that reads: Today is ...
- Let the learners read the sentence together with you.

Part four

- Ask the learners to retell the story *Clouds* (or any other story you read to the learners over the past two weeks).
- Ask the learners to read their sentence to you.
- Put each learner's cloud picture and the story you helped them write into their portfolio.

Rubric

Use this rubric to assess the above integrated literacy assessment task.

Grade R: Term 3				
Holistic rubric for Literacy Assessment Task				
Name:	1	2	3	4
Date:	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
The learner is able to:				
Oral:				
1. Follow the instructions				
2. Answer the questions				
3. Describe where an object is using the correct vocabulary				
4. Sing a learned song				
Phonics:				
5. Identify the 'c' sound at the beginning of words				
6. Identify 'c' sounds in the environment				
Reading:				
7. Read a sentence strip together with the teacher				
8. Use pictures to predict text				
9. Retell a story in the correct sequence				
10. Use known phonics to decode unknown words when reading				
Handwriting:				
11. Manipulate writing tools				
Writing:				
12. Experiment with writing				
13. Read own writing				

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks, learners:

- counted the clouds in the story *Clouds*
- sorted cloud pictures according to size, i.e. length
- described morning, afternoon and night
- described the mass of the water-filled bags, e.g. heavy and light
- collected, represented and analysed data, i.e. what learners were wearing and why
- used mathematical language, e.g. big, small, more than, less than

This assessment task may take several days to complete. You can do it on a one-to-one basis with each learner or in a small group.

TASK

- Place three tins on the table. Each tin must be a different size, e.g. big, medium-sized and small. Fill the tins with varying amounts of sand so that two have the same mass and one is either heavier or lighter.
- Ask the learners to tell you how many tins there are altogether.
- Then get the learners to count the tins.
- Ask the learners to point to the biggest / smallest tin.
- Now ask the learners to arrange the tins from biggest to smallest.
- Finally ask the learners to pick up each tin in turn. Ask which is heaviest and which is lightest.

Grade R: Term 2		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Count to 10		
2. Write numbers 1 to 6		
3. Match number, word and picture (dots on the die)		
4. Count out matching items		
5. Solve verbal problems using counters or other concrete apparatus		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks the learners engaged in various life skill-linked activities that required them to work collaboratively and co-operatively to a set of classroom rules. Use the checklist below to record your observations of the learners over the last two weeks.

Grade R Term 3						
Checklist for Life Skills Assessment Task						
Name:	Date:	Participates in group activities	Shares resources	Shares ideas and thoughts	Waits for turn	Shares space
		Listens to instructions				

Copy this rubric. You will need one for the class.

DAILY PLANNER: Weeks 23 and 24

Keeping safe

Phonics focus: f

Day: Monday

Term: 3

Big Book story: *A boy's best friend*

Poster: Keeping safe

1. Arrival time

Greet each learner as they arrive. Ask learners whether they had a safe weekend. Ask them what the best thing they did was and whether they did it with a special friend. (This is setting the scene for the story which you will tell later on.) Remind learners to put their clean towels on their pegs.

2. Health check

Arrival time is a good time to do a quick and discreet check on each learner's health and well-being and personal hygiene. Check for sores, marks and unexplained injuries. In a non-threatening way ask how these injuries were sustained and use the opportunity to emphasise safety at home.

3. Morning circle

Welcome learners to the circle. Let them share their weekend news. Read the theme message: Today we are learning about safety. Discuss keeping safe while walking to school. Let them identify possible dangers as they come to school, e.g. dogs, transport, crossing the road. Let them think of and share their ideas on how these dangers can be avoided.

4. Work time

Let learners look at the theme table and the poster and talk freely about what they see. Draw their attention to the kitchen scene on Poster 12 and ask them to point out all the dangers. Make sure that they understand and can tell you why these things are dangerous. Discuss where their parents/caregivers keep dangerous items like cleaning agents, matches and poisons. Discuss why they should never eat or drink substances without asking an adult if it is safe to do so. (Explain that some items like paraffin are stored in cold drink bottles which could make them think it is safe to eat or drink.)

Work time: work stations

Literacy table: Learners cut out pictures of household cleaning agents from magazines.

Creative table: Let learners roll red tissue paper into 'sausages' and paste these onto cardboard to make the letter 'f'.

Numeracy table: Place empty, cleaned household containers on the table. Erect a tiny ramp on the table. Learners sort the containers according to their shapes. They can also check which ones roll and which slide.

Fantasy focus: Put out disused electrical appliances: iron, kettle, hairdryer, etc. Learners play with these items, showing how to use them safely. They discuss amongst themselves why electricity is dangerous. Keep an eye on learners as they work in this area.

5. Small group time

Sit with learners around the theme table. Look at the warning signs. Discuss their shapes and colours. Learners talk about other dangers such as strangers, fire, drowning, etc. Learners say which are safe or unsafe. Look at Worksheet 3. Let learners 'read' each picture and clap out the syllables in each word (syllabication). If the word has one syllable they place one counter on the picture; if there are two syllables – two counters, and so on. Let them also say the first and last sound of each word.

6. Tidy up time

Divide learners into small groups. Give each group a different colour tag and a specific tidy-up task. Use an egg timer to show when time is up. The group that tidies up first, wins. Clap to reward them or stick a star on their foreheads.

7. Hand washing

Learners wash hands before snack time. They line up like brave mice and go quietly to wash. Remind learners to keep the area clean. Talk about why we wash hands before we eat (because germs can be dangerous). Talk about what soap and hot water do to germs (kill them) and why this is important (prevents us from becoming ill).

8. Snack time

Ask a few learners to be helpers who serve juice, fruit and sandwiches to the others in their group. Remind learners to eat with a closed mouth. Choose a learner to say a 'word of thanks' for the food. Let them smell the food and ask them what their noses tell them about it.

9. Music and movement ring

Refer to the park scene on Poster 12. Talk about obvious and hidden dangers. Discuss being aware of potential dangers without being overly anxious about it. Look for potential dangers in the classroom and playground. Talk about how dangerous situations make us feel and the fact that most objects are not dangerous in and of themselves, but become dangerous when people do not use them correctly or when they misuse them, e.g. cars, guns, knives. Discuss what they should do in dangerous situations. Let them move like scared mice, mice in danger, mice finding help, mice who have found help. Transferring these emotions to a 'removed' object helps learners relax with emotions that may be difficult for them to portray. Sing and move to *I'm a brave, brave mouse* – see the side panel on Poster 12.

10. Outdoor play

Talk about the gift of water. Then talk about its dangers. Talk about playing safely around water (only in the presence of an adult who can swim).

Have bowls of water and various items that sink and float. Learners experiment with items in the water, to find out which float on water and which sink.

11. Hand washing and toilet time

Learners hop like bunnies and go quietly to wash and use the toilet.

Remind learners to flush after using the toilet, and to wash and dry their hands.

Tell learners to close the tap properly after use.

12. Story time

Turn to the story *A boy's best friend* on page 34 of the Big Book. Ask learners to look at each of the pictures and talk about each scene. Ask them what dangers the boy faces in each scene and how the danger is averted. Then read each page. Ask why they think Bheki the dog is such a special friend. Talk about people and animals that help keep us safe, e.g. fire-fighters, paramedics, rescue dogs, watch dogs, police dogs and horses, guide dogs. Learners say which other dangers they would add to the story. Sing *I'm a brave, brave mouse* again.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery.

Use Poster 12 as a backdrop for the theme table.

Place a red tablecloth on the table.

Types of dangers

Have pictures of water (swimming pool, river, etc), stranger-danger (a fierce looking man), guns, fire, hot water, car (child running across the street without looking) etc. Set out different objects: candles, matches, a bowl of water, a knife, a pair of scissors, an iron, electrical wires, etc. Make labels for the different pictures and label them.

Emergency vehicles

Put the following toy cars on the table: police car, ambulance, fire truck, etc.

Danger signs

Have pictures of danger signs, e.g. on bottles of poison (skull-and-crossbones), road signs, signs at parks and recreation grounds, etc.

Fantasy corner

Collect a selection of clothing worn by people who keep us safe, e.g. fire-fighter, police officer, paramedic, nurse, etc. These should be available for learners to dress up in and to play with.

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes			Welcome each learner. Ask if s/he remembered to cross the road looking right, left and right again. Remind the learner to put her/his bag in the correct place.		Welcome each learner. Ask if s/he wore a safety belt if they travelled to school by car. Remind the learner to check that her/his faccloth is clean and hanging where it should be.
Morning circle 10 - 15 minutes	Play this reasoning and logic game with the learners: <i>What kind of danger am I?</i> Describe various dangers, e.g. I am sharp. I cut bread. What am I? (a knife); I can go fast. I have wheels. What am I? (a car/taxi); I am very hot. I can burn you. You can light me with a match; What am I? (a fire/stove); etc.	Ask learners to say their name, address and telephone contact numbers. Talk about the importance of knowing these.		Talk about where dangerous items need to be stored in the home and why, e.g. matches, guns, poisons. 	
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes	 1. Science/technology focus: Make smelling pots. This activity demonstrates how our noses can warn us about danger! Put mouldy bread/cheese, dishwashing liquid, sour milk, something burnt, etc. into small opaque containers. Put these on the table. Learners smell each one. 2. Literacy focus: Learners make the letter 'T' out of red plasticine. 3. Literacy/creative focus: Place dishwashing liquid into the water trough. Let them see what items float and which don't.	 1. Science/technology focus: Make smelling pots. This activity demonstrates how our noses can warn us about danger! Put mouldy bread/cheese, dishwashing liquid, sour milk, something burnt, etc. into small opaque containers. Put these on the table. Learners smell each one. 2. Literacy focus: Learners make the letter 'T' out of red plasticine. 3. Literacy/creative focus: Place dishwashing liquid into the water trough. Let them see what items float and which don't.	 Life Orientation focus: Learners make traffic lights from a rectangle of bread, and a round slice of carrot, baby tomato and cucumber.	1. Science focus: Put a butter knife, a vegetable peeler, a grater and some food items on the table (cheese, carrot, potato, jam). Learners experiment to see which tool works best on each food item. Talk about how to use these items safely. Keep a close eye on learners as they do this. 2. Numeracy focus: Have items that roll and others that slide. 3. Numeracy focus: Construction: Learners sort household containers according to their own criteria, e.g. round. 	
	Numeracy focus: Set out a variety of cutlery, e.g. spoons, knives, forks of differing sizes on the table. Talk about which of these items are potentially dangerous (fork and knife). Invite learners to sort the cutlery into groups according to various criteria: safe, not safe, use, shape, size and colour.	Literacy focus: Discuss how fire is a help and a danger. Discuss sources of fire, like lightning. Discuss how to put out a fire. Introduce the letter 'f' and its sound. Learners copy it in red crayon on paper and draw a fire around the letter. 	Literacy focus: Set out objects on the carpet: a candle, matches, a knife, a pair of scissors, a bowl of water, an electrical appliance, etc. Ask learners to name each object and to say the letter sound it begins with. Clap the name. They say why each item is a potential danger.	Literacy focus: Collect and display different labels from safe and unsafe items, e.g. candles, matches, cleaning agents, medication, poisons etc. Learners 'read' the labels. Let learners group these into safe and unsafe collections and paste them on a piece of cardboard where you have written two headings, 'Safe' and 'Unsafe'. Put this poster near the theme table.	Life Orientation focus: Ask learners to tell you what a stranger is. Talk about stranger danger. Discuss all the adults whom learners know and with whom they feel safe. Talk about strangers who help us (police, nurses, etc.).
	TIDY UP TIME HAND WASHING SNACK TIME				
Music and movement ring			Discuss dangers related to poor personal hygiene and dirty environments, including flies, mosquitoes and cockroaches. Sing <i>I'm a brave, brave mouse</i> (see Poster 12).		Sing and act out the <i>Mystery Man</i> song (see Poster 12). 
Outdoor play		Learners practise the 'Stop-drop-roll' technique. This is the routine to follow if caught in a fire. 			
Story time			Look at the pictures in the story <i>A boy's best friend</i> . Ask the learners to predict what would have happened in each scene had Bhek not intervened.	Have mirrors on the tables. Learners look at themselves and each other. Can they tell if a person is helpful or harmful just by looking at them?	

1. Literacy assessment

This assessment task will assess whether the learner has understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *A boy's best friend*
- demonstrated understanding of the above story
- identified the 'f' sound at the beginning of words
- sang and recited songs
- used picture clues to investigate safe and unsafe situations
- interpreted common warning symbols, e.g. STOP
- segmented words into syllables
- read the sentence strips with the teacher and class
- practised the formation of the letter 'f'
- used language for learning

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Put the letter 'f' from the Teacher's Guide on a table.
- Ask the learners to 'read' the letter 'f'.
- Now ask the learners to trace the letter 'f', saying what they are doing. Check that they start and end in the correct positions.
- Finally ask the learners if they know words that begin with 'f'. Remember to say the sound and not the name, i.e. 'fff' not 'ef'.

Part two

- Use Worksheet 1 again.
- Ask the learner to 'read' each of the pictures.
- Ask the learner to use each word in a (oral) sentence.
- Finally ask them to point to a picture and clap the words (into syllables).
- Ask how many claps.
- Repeat with the other pictures.

Part three

- Complete this part of the assessment when doing the numeracy and life skills assessment.
- Use Worksheet 3 again. You can also draw or cut out safety signs to use for this assessment.
- Ask the learners to 'read' each warning sign.
- Ask the learners what the sign warns about.

Assessment wheel

Use this assessment wheel to assess Part One of the task on this page.

4 Well developed 3 Age appropriate 2 Still developing 1 Intervention needed

Grade R: Term 3				
Holistic rubric for Literacy Assessment Task Part Two and Part Three				
Name:	1	2	3	4
Date:	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
The learner is able to:				
Oral:				
1. Follow the instructions				
2. Answer the questions				
3. Hear and clap syllables in words				
Phonics:				
4. Identify the 'f' sound at the beginning of words				
5. Identify 'c' sounds in the environment				
Reading:				
6. Recognise (high frequency) warning symbols				
7. Explain the meaning of warning symbols				
8. Use word in own sentence				
9. Recognise the 'f' symbol in print				

Copy this rubric. You will need one for each learner.

Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- manipulated household containers, e.g. detergent boxes, shampoo bottles
- sorted the containers according to those that slide and those that roll
- described properties of objects that roll and slide
- identified boxes
- described properties of boxes

This assessment task may take several days to complete. You can do it on a one-to-one basis with each learner or in a small group.

TASK

- Place five containers used for this theme on a table.
- Ask the learners to tell you how many containers there are altogether.
- Then let the learners count the items.
- Ask the learners to point to the items that slide and those that roll. Allow them to manipulate the items if they are unsure.
- Ask them to explain the properties of those that slide (flat sides) and those that roll (round edges).
- Now ask the learners to show you the boxes.
- Finally ask the learners to tell you why the item is a box.

Grade R: Term 3		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Tell how many items are on the table		
2. Count the items		
3. Identify items that roll		
4. Identify items that slide		
5. Identify boxes from other 3D objects		
6. Use mathematical language to describe understanding of concepts		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skills-linked activities that required them to identify safe and unsafe situations in the home, at school and in the environment. Use the checklist below to record your observations of the learners over the last two weeks.

Show learners the following pictures and ask them to tell you:

- where they are used
- when they are used
- why they are used

See if the learners are able to apply what they have learnt over the past two weeks when looking at these pictures.

DAILY PLANNER: Weeks 25 and 26

The sky

Phonics focus: q and u

Day: Monday

Term: 3

Big Book story: *Queen Quellerina*

Poster: The sky

1. Arrival time

Welcome each learner at the door. Remind learners to keep their lockers clean. Have a tidy-up session where learners clear out old and dirty items from their lockers. They can play freely as they wait for school to start.

2. Health check

Pay particular attention to the learners' general appearance including injuries, e.g. scrapes and cuts. Ask learners how they got their injury. Record important observations.

3. Morning circle

Ask learners what they do each morning to get ready for school. Ask them if they come to school in the day or at night. Read the theme message: Today we are learning about the sky.

4. Work time

Give learners cut-outs of the following shapes: 4 circles (1 big, 1 small, 2 very small) for the head, body and eyes; 7 triangles (1 small, 6 very small) for the beak and claws; 2 crescents for the wings. Tell them to make an owl by sticking shapes together on a paper bag. This makes a lovely owl puppet with a movable beak.

Work time: work stations

Literacy table: Give learners Worksheet 3 in the Learners' Workbook and have them colour in and cut out the pictures. They can then sort them into day and night piles.

Numeracy table: Provide string, beads and unifix blocks. Learners create their own sequenced patterns. They can then copy each other's patterns.

Creative table: Let learners make Queen Quellerina necklaces. They roll tin foil into small 'sausages' and make the 'q' shape from it. Help them to attach string so they can wear it.

Science and technology table: Put an ice block in the water trough. Let learners play and experiment with it.

Fantasy focus: Have different kinds of clothing that learners can dress up in. They can put them on then say and mime where they are going and what they are going to do. They must say when in the day it is (morning, day, night). Provide props they can use to support their play.

5. Small group time

Use Poster 13 to initiate a discussion around activities that happen at certain times of the day. Allow learners to label Poster 13 using the flashcards on page 16 of the Resource Book. Then complete the emergent sentence strips:

It is day. I see a ... It is night. I see a ...

Help learners to make the 'My sky book' on Worksheets 1 and 2 of the Learners' Workbook.

6. Tidy up time

Divide learners into four groups: queens, kings, suns and moons. Use an egg timer to time the tidy up period. Ask the groups to pack away specific materials and equipment. The group that performs the task best and within the given time can get a clap from the class or a star on their foreheads.

7. Hand washing

Make sure learners wet, soap, wash and dry their hands.

You can sing this action song to the tune of 'If you're happy and you know it'.

If they're dirty and you know it

Wash your hands (both lines x2)

If they're dirty and you know it

Clean them up so you can show it

If they're dirty and you know it

Wash your hands

12. Story time

Open the Big Book to *Queen Quellerina* on page 37. Show the pictures. Ask learners what they think the story is about, e.g. Who do you think the lady is? Why? Where is she? How can you tell? Read each page. At the end of each page ask learners questions about what you have read. Then ask questions about what they think will happen on the next page. Continue reading the story like this, using open-ended questions to involve the learners.

Note: An open ended question requires learners to think about and provide reasoned answers using full sentences to answer – it prevents them from giving 'yes' or 'no' answers.

8. Snack time

Use a cookie cutter to cut the sandwiches into crescents and other shapes you want to reinforce. Choose learners to hand out sandwiches, fruit and juice. Ask a learner to say a word of thanks. Remind learners to sit up tall and straight like kings and queens when they eat. Ask learners to identify the sandwich shapes.

9. Music and movement ring

Look at the owl on Poster 13. Ask learners to tell you what the owl is doing in each scene. Tell learners that animals that are active at night are called *nocturnal* animals. Have plastic animals or pictures of animals for learners to sort into day and nocturnal animals.

Play some music and allow learners to move like nocturnal animals, e.g. bats, owls, rodents, leopards, night adders, etc.

10. Outdoor play

Label two boxes with the words 'day' and 'night'. Learners stand in a line. Call out day or night and the learner at the front of the row throws a beanbag into the correctly labelled box.

11. Hand washing and toilet time

Learners walk like kings and queens and go quietly to wash and use the toilet. Remind learners to flush after using the toilet, and to wash and dry their hands. Tell learners to close the tap properly after use.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery.

Use Poster 13 as a backdrop for the theme table. Place a blue tablecloth on the table.

Day

Divide the bulletin board in two. Make a paper owl from a large brown bag. Draw closed eyes on the owl and pin it up against light blue paper. Pin up the cottonwool clouds made in Week 20 to the board.

Night

On the other half of the board place a second paper owl on a background of dark blue or black paper. Learners can make stars from tin foil or foil sweet wrappers. Pin these up. Use the flashcards in the Resource Book to label the bulletin board.

Place toy helicopters, aeroplanes, birds, night animals, e.g. rats and bats, and day animals on the table.

Display pictures of day clothing, e.g. school uniform, and night clothing, e.g. gown, pyjamas and slippers.

Fantasy corner

Have a selection of day and night clothing as well as associated accessories for learners to play with. Include items such as pillows, toothbrushes, hairbrushes, shawls, hats, bags, slippers etc.

WEEKLY PLANNER: Weeks 25 and 26

The sky day and night

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes			Greet each child. Ask them to make sure all the equipment in the classroom is packed away neatly in the correct place. They will have tidied up the day before / but put some things in the wrong place for them to find and fix.		
Morning circle 10 - 15 minutes			HEALTH CHECK  	Ask the learners what they saw in the sky on the way to school today (birds, clouds, aeroplanes, kites, etc.). Repeat the poem <i>Kites</i> on Poster 13. 	Ask learners what they are looking forward to doing this weekend. Will they do it during the day or at night? Why will they do it then?
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes	Literacy focus: Introduce the letter 'q'. Learners suggest words that begin with 'q', e.g. quiet, quick, queen. Learners pretend they are Queen Quellerina and each one has to ask a question. Numeracy focus: Introduce the crescent shape. Ask learners to name objects that look like this shape (bananas, half moon etc.). Let learners make jewelled patterns (using cut-out stars, moons and suns) on paper crowns. Call out patterns, e.g. moon-sun-moon or crescent-circle-crescent. Learners measure the crown to fit their head before asking you to staple it together.	Numeracy focus: Learners count the wings/ beaks/ claws, etc. of the owls that they made in their group. Ask the learners how many owls will remain if one flies away. How many wings/ beaks/ claws now? Learners use the number (numeral) cards in the Resource Book to show their workings. Repeat.	Science / Technology focus: Allow learners to discover what causes day and night. If possible provide a globe (of the Earth) and a torch. If you don't have a globe use a small ball or an orange. Learners shine a torch, which represents the Sun, on the one side of the globe. The other side of the globe represents night. Of course the phenomena responsible for day and night are more complex than can be explained by this activity – this is just a first exploratory exercise. Encourage learners to talk about their understanding of this activity.	Creative focus: Provide black crepe paper and silver tinfoil. Learners make a night collage. 	Creative focus: Give each learner a circle of paper, a pair of scissors and a cardboard tube (like an empty toilet roll holder). Learners fold paper and cut out small shapes. They unfold the paper and fasten it to the end of the tube with an elastic band. Let them shine a torch through the open end of the tube so that the shapes reflect against the wall.
Music and movement ring			TIDY UP TIME HAND WASHING SNACK TIME Learners can fly like birds and aeroplanes; dive like swimmers or like birds towards prey. They can go 'whish' like the wind and wave to say 'hi'. They can also float like a cloud. Then they can say the rhyme <i>Kites</i> together with actions.		Learners touch a body part that rhymes with a word you say, e.g. <i>land, meet, bed, fly, hose</i> . Say the words again – faster and eventually jumbled – to see how fast the learners can do it.
Outdoor play	Revise positional language. Learners take their chairs outside. Get them to sit on/ stand behind/ in front of/ next to their 'throne'. Learners describe what their bodies are doing.				
Story time	Tell historical Indigenous stories about queens, e.g. Modjadji. 	Learners find outfits from the fantasy area. Choose one learner to wear the crown they made in the Numeracy focus – this child will play the queen. Choose learners to be the sun, moon, rain, lightning, thunder and wind. Read the story with expression and let learners dramatise the story.		Learners read the books that they created this week, with you. See Daily Planner.	

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Queen Quellerina*
- used picture clues to predict the story
- dramatised the story
- identified the 'q(u)' sound at the beginning of words
- made an emergent reader 'My sky book'
- completed the sentences: It is day, I see a ... It is night, I see a ...
- read the emergent reader back to the teacher and class
- identified words that rhyme with sky, moon, queen, etc.
- used language for learning.

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Make picture cards in advance of this assessment task.
- Put the following picture cards on a table: *moon, spoon, queen, bean, sky, cry, star, car*
- Ask the learners to 'read' the pictures.
- Now ask the learners to point to one of the cards, e.g. 'Point to the moon.'
- Then ask the learners to find the picture that rhymes with moon.
- Ask the learners to read both words, e.g. *spoon and moon*.
- Finally ask them if they can think of other words that rhyme with *spoon and moon*, e.g. *soon, June*.

Part two

- Ask the learners what sound they hear at the beginning of queen.
- Now ask if they can think of other words that begin with 'q(u)', e.g. *quick, quiet, question, quack*. Remember to say the sound and not the name, i.e. 'kwih' not 'kew'.
- Repeat with the other cards.

Part three

- Ask the learners to talk about each picture they drew on the pages.
- Ask the following questions one at a time: Where do you find this object? What does it do? What is it used for? Is it living or not?
- Ask the learners to read their 'My sky book' to you.
- If necessary, you can read the sentences with the learner (paired reading).

Grade R: Term 3			
Checklist for Literacy Assessment Task			
Name:	Date:		
The learner is able to:	Yes	With help	No
1. Identify rhyming words			
2. Read pictures			
3. Identify initial sounds			
4. Follow spoken instructions			
5. Use pictures to anticipate written text			
6. Read own sentences			

Rubric

Use this rubric to assess the above integrated literacy assessment task.

- 4 - Exceeds expectations: yes to all six criteria
- 3 - Satisfactory: yes to at least four criteria
- 2 - Still developing: yes to three criteria
- 1 - Needs intervention: yes to only one or two criteria; mostly no's

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted the owls and their different body parts
- subtracted the owls and re-counted the different body parts
- used number cards to show their workings
- responded with their bodies to positional language
- used mathematical language to describe their position in space.

This assessment task may take several days to complete. You can do it on a one-to-one basis with each learner or in a small group. Task Two can be done outside during free play.

TASK ONE

- Ask the learners to make four or five houses using the logi shapes.
- Ask the learners to count the houses. Let them use a number card to show how many houses there are.
- Ask the learners to tell you how many windows/doors/roofs/etc. there are altogether.
- Then ask the learners to remove one or more houses and calculate how many windows/roofs/etc.
- The learners put out the relevant numeral card each time. You can say: 'Now show me the number.'

Grade R: Term 3		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Count objects to 10		
2. Use apparatus to work out verbal subtraction		
3. Recognise numerals from 1 to 10		

Copy this rubric. You will need one for each learner.

TASK TWO

This assessment can be done outside of the classroom. You will need a small chair.

Ask the learners to position themselves:

- on the chair
- next to the chair
- behind the chair
- in front of the chair
- under the chair

Write your observations in your observation book.

3. Life skills assessment

Over the last two weeks learners engaged in various life skill-linked activities that required them to investigate and reflect on natural phenomena. Use the checklist below to record your observations of the learners over the last two weeks.

Grade R: Term 3				
Checklist for Life Skills Assessment Task				
Name	Date	Keen interest in the natural world	Asks questions about the world on investigative	Active participation in observations

Copy this rubric. You will need one for the class.

Phonics focus: p and t

Day: Monday

Term: 3

Big Book story: *Our goat Godfrey*

Poster: People who help others

1. Arrival time

Greet each learner. Welcome them back after the weekend. Ask learners to tell you what they did over the weekend. Remind them to hang their clean towels on their pegs.

2. Health check

Arrival time is a good time to do a quick and discreet check on each learner's health/well-being and personal hygiene. Check that the learners' eyes are clear and shiny. Take note of learners that are tired. If there is a pattern to the learner's tiredness make sure to record it in your observation book and address your concern with the caregiver.

3. Morning circle

Read the theme message: Today we are learning about community helpers. Learners share their weekend news. Use Poster 14 to discuss community workers such as doctors, nurses, fire-fighters, garbage collectors, teachers and the police. Ask learners to tell you where each of these people work and what they do to help us. Ask them if they know any people who do these jobs.

4. Work time

Discuss the kind of work that learners' parents or caregivers do. Talk about how we can all help in our community even if we are not 'community workers'. Let them suggest ways in which everyone can help, e.g. clean up pavements and parks, helping the sick and elderly. Learners share their dreams about what work they want to do when they grow up. Let them explain why they want to do this type of work and how it will help the community.

Work time: work stations

Creative table: Put out stamp pads, koki pens and paper. Let learners make fingerprint community helper people. They make prints with their fingers and then add legs, arms, etc. with the koki pens.

Literacy table: Make a post-box. Write learner names on flashcards and provide writing paper, crayons, magazines, scissors, glue and envelopes. Let each learner choose a classmate's name and 'write a letter' to this child. The letter can be composed using drawings, cut-out pictures from magazines and their own 'writing'. They decorate the envelope, copy their friend's name on it, and post their letter into the post-box.

Numeracy table: Put out paper plates and plastic shapes. Learners serve food, sharing it between the plates.

Science and technology table: Provide a box of 'trash' or rubbish. Learners sort it into items that can be recycled (used again) and those that must be thrown away. Do not include actual food.

Fantasy focus: Create a clinic in the fantasy corner. Provide a doctor and nurse outfit. On a table place (empty) pill boxes, a 'stethoscope', tongue depressor etc. Learners listen to each others' 'heartbeats'. Show learners how to find a pulse.

Work time: literacy focus

Make a dice: on each side write one of the following sounds: 'p', 't', 'f', 'n', 'l', 'm'. Each of these letters corresponds with the first sound of a community worker on the poster. Learners play in small groups. They throw the dice, say the sound of the letter it falls on and then find the community worker on the poster. The learners say what they know about this community worker.

5. Small group time

Make a sentence strip The ... helps others and use the flashcards on page 17 of the Resource Book for this activity. Read the sentence you have made, pointing at each word, then ask: Who helps us? Let the learners complete the response using a flashcard of their choice, e.g. The (fire-fighter) helps us. Repeat this.

Point to a community worker on Poster 14. Learners say which first and last sound they hear. They clap the word, e.g. doc-tor, tea-cher. They say how many claps they hear. Repeat with the other pictures. Which word has fewer/or more claps? Ask: By how many?

6. Tidy up time

Make six community worker cards. Divide the learners into groups. Give each group a different card and a specific tidy-up task. They pretend to be nurses, rubbish collectors, etc. Use an egg timer to show when time is up. The group that finishes tidying up first wins. Clap to reward them or stick a star on their foreheads.

12. Story time

Ask learners if they have ever lost anything, let them say how they felt and who helped them look for/find the thing they had lost. Ask if they have ever been lost. Talk about what they should do if they get lost and see which of the learners knows their contact telephone numbers and address. Turn to the story *Our goat Godfrey* on page 40 of the Big Book. Ask learners what they think the story is about. Read the first page and ask them questions about who the children in the story approached to help them. Ask why they think the children asked these people. Learners talk about what they see on each page and retell the story in the correct sequence.

Learners can then sequence the pictures on Worksheet 4 in the Learners' Workbook.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 14 as a backdrop for the theme table. Place a brown tablecloth on the table.

Community workers

Have pictures of community workers on the theme table. Make labels for each one. Find pictures of the places where these people work, e.g. post-office, library, school, fire station, garbage depot.

Place items associated with their work on the table, e.g. syringe, stethoscope, toy gun, envelopes, chalk, fire hat, police hat, black rubbish bag and bin.

Fantasy corner

Have a selection of clothing as well as associated accessories for learners to play with. Include outfits for a nurse, fire-fighter, police officer, postal worker, etc. Old shirts and scarves will work well.

Also provide items related to the profession, e.g. syringe, stethoscope, toy gun, police badge, plastic empty medicine bottles, books, etc.

7. Hand washing

Learners wash hands before snack time. They line up like police officers at a police parade and march quietly to wash. Remind learners to keep the area clean. Talk about why we wash hands before we eat. Learners say why they should close the tap properly (to save water – a precious resource in short supply in South Africa).

8. Snack time

Ask a few learners to be helpers who serve juice, fruit and sandwiches to the others in their group. Ask learners 'Who serves food to us in the community?' (waiters). Tell learners that waiters are also community helpers. Remind learners to chew their food properly and with a closed mouth. Choose a learner to say a 'word of thanks' for the food, in his/her home language.

9. Music and movement ring

Show learners the community cards again. Learners secretly choose a community worker they admire most. Learners mime the actions and movements of that community worker. The group says who is being represented in the mime and copy the actions. Continue in this way until all the learners have had a chance to mime. End with doing *The brave fireman* finger play on Poster 14.

10. Outdoor play

Put out large dustbin bags. Learners work in pairs to collect litter from the school surrounds. Learners compare rubbish bags to see which is heavier. They identify who collected the most and who collected the least rubbish. Learners make 'Thank you' cards to give to the rubbish collectors who keep their area clean.

11. Hand washing and toilet time

Learners pretend to drive a fire engine to the bathroom. Remind learners to flush after using the toilet – ask them why this is important – and to wash and dry their hands. Tell learners to use the bathroom without leaving a mess. Talk about the people who clean the bathrooms for them.

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes				Greet the learners individually and remind them to tidy up the classroom and playground during the day.	
Morning circle 10 - 15 minutes	Ask the learners for any news about what happened over the weekend. Then ask them who they saw on the way to school today, other than their family members.		HEALTH CHECK 		Arrange for a fire-fighter, a police officer or a postal worker to visit the class and talk about what they do. Learners can ask any questions they can think of.
Work time and small group time	Literacy focus: introduce the letters 'p' and 't'. Ask learners to identify objects that begin with these sounds in the classroom. Have templates of 'p' and 't' for the learners to trace around. They decorate the 't' and the 'p'.	Work time activities: 1. Literacy focus: Learners make a letter 'p' from pink pipe cleaners. 2. Numeracy/baking focus: Learners make two strings of popcorn. Each string must have the same number of popcorn pieces. Use plastic needles. 3. Literacy focus: Learners make plasticine pens and pencils. 4. Creative: Provide trays of paint and small plastic bags. Learners scrunch bags and use them to make garbage prints onto newspaper.			
SMALL GROUP TIME: 10 - 15 minutes	Small group time activities: Numeracy focus: Put out counters. Learners cut out the cards depicting community workers on Worksheet 2 in the Learners' Workbook. The cards show even and odd numbers of community workers, e.g. 3 fire-fighters, 4 policemen. Learners pick up a card and then place a counter on each image (one-to-one correspondence). They then share the counters into equal parts. If there are no leftovers (remainders) they put it on one pile, if there are they put it on the other pile.	Numeracy focus: Have cut-outs of ten firemen. Have two boxes that represent fire stations. Ask learners to put an equal number of firemen into each box. How many firemen are there in each box? (Repeat exercise with 8, 6, 4 and 2.) Learners explain why they put five in each box.	Literacy focus: Arrange four chairs to make a police car. Each learner has a chance to pretend to 'drive the police car', making the right sounds, to the 'police station' where they choose the letter that their name begins with from a pile of letters available in the Resource Book. They 'drive' back to their seats where they sit down and say "My name begins with ... (letter)".	Numeracy focus: Fill pill bottles with six tiny stones or counters. Learners take out one stone and count how many are left in the bottle. Repeat, taking out as many as you decide.	Science/Technology: If possible make a display of books about police on the table. Explain that clues are used to investigate crimes. People's fingerprints are a good clue, because no one's fingerprints are the same. Put a stamp pad and Worksheet 3 on the table. Learners press their finger onto the stamp pad and make fingerprints on the paper. If possible provide a magnifying glass so learners can compare their finger works with a partner. Let them write their names on the paper and pin them on the bulletin board.
	TIDY UP TIME HAND WASHING SNACK TIME				
Music and movement ring				Sing Who are the people in your neighbourhood? on Poster 14, with a fire-fighter, a postal worker and a police officer.	Learners dress up as fire-fighters, police officers, postal workers or health workers. They stand in the same order as they appear in the story. Repeat the pattern until all the learners are in a row. Sing the Who are the people in your neighbourhood? song on Poster 14.
Outdoor play		Learners sit in a circle. Place flashcards that you are trying to reinforce in the centre of the circle. Let each learner have a chance to be a postal worker and find a word.			
Story time	Read the story Our goat Godfrey to the learners. Each time they hear "Please can you help us find him?", they must say whether it's likely that that person could help them.				

44

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *Our goat Godfrey*
- demonstrated understanding of the above story
- identified the 'p' and 't' sounds at the beginning of words
- identified initial and end sounds of names of community workers
- recognised (read) initial sounds learned so far
- sang and recited songs
- shared personal stories of being lost
- identified people in the community who help us
- read the sentence strips with the teacher and class
- practised the letter formation of the letters 'p' and 't'
- used language for learning.

This assessment task may take several days to complete. Depending on the ability of the learners, you may choose to assess one letter on one day and the other letter on a different day.

TASK

Part one

- Use the letter formation assessment wheel to assess this activity.
- Draw a large 'p' and 't' on the ground with chalk. Mark the starting points with a green card that reads 'go'. Mark the ending point with a red card that reads 'stop'.
- Ask the learners to 'read' the letters 'p' and 't'.
- Then ask the learners to trace the letter by walking it. They must say how they are moving, e.g. 'I'm standing at the starting point. Now I'm walking around and down, etc. Check that the learners start and finish in the correct positions.
- Finally ask the learners if they know any words that begin with 'p' and 't'. Remember to say the sound and not the name, i.e. 'pih' not 'pee' and 'tih' not 'tee'.

Part two

- Use the letter dice you made previously.
- Ask each learner to throw the dice and 'read' the letter facing upwards.
- Ask each learner to make a word that begins with that sound.
- Repeat until each learner has thrown all the letter symbols.

Part three

This activity is an oral (spoken) assessment to determine how the learners listen and speak.

- Use Poster 14 again.
- Ask each learner to point to a particular person in the picture, e.g. 'Show me the policeman'.
- Ask each learner what this person does, where he works and what he wears.
- Repeat with the other people on the poster.

Assessment wheel

Use this assessment wheel to assess Part One of the task on this page.

4 Well developed 3 Age appropriate 2 Still developing 1 Intervention needed

Grade R: Term 3			
Checklist for Phonics Assessment Task			
Name:	Date:		
The learner is able to:	Yes	No	
1. Identify a learnt letter and say the letter sound (c, q, p, t, m, a):			
1.2 q			
1.3 t			
1.4 f			
1.5 m			
1.6 a			
2. hear a sound spoken by the teacher and say a word beginning with that sound.			

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learner has understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted to 10
- shared concrete apparatus to determine if there are leftovers (odd) / no leftovers (even) (to at least 6)
- used concrete apparatus to subtract (from at least 6).
- explained solutions to problems

This assessment task may take several days to complete. You can do it one-to-one with the learner or in a small group.

TASK

Part one

- Place 10 buttons in a row on the table. Ask the learner to count them.
- Ask them to match the numeral and word card for 10.
- Repeat with other numbers in the one to six range.

Part two

- Put six buttons on the table. Ask how many there are.
- Ask the learner to count out the buttons.
- Ask how many buttons will be left if we take away two.
- Let the learner remove two buttons and say their answer.
- Let them count the buttons to check their answer.
- Repeat with different subtractors.

Part three

- Prepare five paper pizzas or cakes (just trace around a saucer onto paper five times).
- Divide the circles into 2, 3, 4, 5 and 6 slices respectively. Place each one in a small box or an envelope.
- Place two paper or plastic plates on the table.
- Talk about leftovers after a meal. Ask: What is a leftover? What do you do with leftovers?
- Take out the pizza/cake cut into two. Tell the learner that they are going to be a waiter/waitress. Allow the learner to count the pieces and put them together.
- Ask them if they think there will be any leftovers when they share them between the plates. Let them share out the pieces and check their prediction.
- Let the learner talk about what they are doing.
- Repeat with the other pizzas/cakes. Learners do not need to know or use the terms even or odd.

Grade R: Term 3				
Holistic rubric Numeracy Assessment Task				
Name:	1	2	3	4
Date:	Not achieved	Partial achievement	Satisfactory achievement	Outstanding achievement
Is the learner able to:				
Counting				
1. Can count out objects to ten?				
2. Can identify the numerals 1 to 6?				
3. Identify the number words one to six?				
Concept development				
4. Subtract verbally stated problems involving single digit numbers? (within the 0-6 range)	Any two correct	Any three to five correct	Any five to eight correct	All nine correct
5. Use concrete apparatus to solve problems?				
6. Breaks down and builds numbers? (within the 1-6 range)				
7. Solve problems involving sharing and grouping within the 1-6 number range, using concrete objects?				
8. Explain solutions using concrete objects?				
9. Uses mathematical language?				

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners investigated various people who help them (and us) at home, at school and in the environment. They were encouraged to think about where these people work, what they do in the course of their work, the special skills that they have and how they impact on our daily lives. This topic links closely to Life Orientation LO1 and learners need to understand how (many of) these people keep them safe.

Let learners look at the following pictures and say how these people help to keep them safe.

Show learners these pictures and ask them to tell you

- Who is he/she?
- Where do they work?
- How does this person help keep you safe/healthy?

See if learners are able to apply what they have learned over the past two weeks when looking at these pictures.

Phonics focus: h

Day: Tuesday

Term: 3

Big Book story: I like to help

Poster: Helping hands

1. Arrival time

Greet learners. Ask learners how they helped at home this morning, e.g. made sandwiches, made their bed. Commend them if they have done so. Allow learners to sit and read a book from the library corner.

2. Health check

Arrival time is a good time to do a quick and discreet check on each learner's health and personal hygiene. Check if the learners' face, neck and ears look washed and clean. Learners who wriggle while sitting may have worms. If you suspect this is the case talk to the caregiver.

3. Morning circle

Welcome learners to ring. Read the theme message: Today we are learning about helping. Discuss the word *ubuntu*. Ask what it means. Learners talk about what makes them feel special. Ask what we can do to make others feel special. Explain that we can make the world a really nice place if we are all friendly and helpful and try to make others feel special in some way.

4. Work time

Look at Poster 15. Talk about the pictures. Make a list of all the jobs in the classroom. Write the different jobs on cards and place them under each of the hands on the poster. Next choose learners to be responsible for these jobs and place their names, photos or a drawing of themselves on the hands.

Work time: work stations

Literacy table: Place plasticine at the work station. Let learners make the letter 'h' from the plasticine.
Creative table: Place a tray with a deep lip on the table. Fill it with flour and let learners make hand prints in it. They can compare the size of their hands with one another.
Numeracy table: String a washing line up in the classroom. Place crayons, scissors and paper at the station. Learners trace around their hands and cut out the hands. They peg it to the washing line. Learners can count hands and fingers later on with the teacher.
Science/Technology table: Place plastic magnifying glasses on the table. Learners look at their hands close up.
Fantasy focus: Put out aprons, cleaning cloths, feather dusters, brooms, dust pans, cutlery, etc. Learners clean and polish.

5. Small group time

Ask learners what sound 'help' starts with (h). If any learners' names begin with 'H' let them put up their hand. Let learners give other words that begin with the letter 'h'. Give each learner an 'h' template from the Teacher's Guide. They cut out the letter 'h' and then trace around their hands and cut these out. Let them glue each hand to the sides of the 'h'. On the hands they draw little pictures of how their helping hands help others and then display them in a line so that the hands join each other. Draw a big letter 'h' in chalk. Ask the learners to hop along it, saying h-h-h as they hop.

6. Tidy up time

Divide learners into small groups. Give each group a different greeting: Hello, Sawubona, Lotlani, Dumela, Salaam, Namaste, etc. and a specific tidy-up task. Use an egg timer to show when time is up. The group that completes tidying first wins. Clap to reward them or stick a star on their foreheads.

7. Hand washing

Learners wash hands before snack time. Let learners hop as they make their way to the bathroom. Ask learners to practise saying h-h-h-h as they hop. Remind learners to keep the area clean. Talk about why we flush the toilet and why we wash before we eat. Learners say why they should close the tap properly (to save water / a precious resource in short supply in South Africa).

12. Story time

Turn to the story *I like to help* on page 43 of the Big Book. Talk about the pictures and the different ways in which the child likes to help at home and at school. Discuss how helping makes us feel. Ask if this could be the reason that the child in the story likes to help. Point to the words on each page as you read. The predictable sentence framework allows the learners to join in and read along with you. Learners can make *ubuntu* necklaces using Worksheet 3. Let them take their necklace home or pin them on the bulletin board.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 15 as a backdrop for the theme table. Place a brown tablecloth on the table.

Helping hands

Have pictures of items that learners use to help with, e.g. watering can and pot plant, broom and dust pan, piece of hosepipe and car, litter and a dustbin. Have pictures of people helping one another, e.g. teacher and child, parent and child.

Fantasy corner

Have a selection of clothing as well as associated accessories for learners to play with. Include items such as feather dusters, brooms, cloths, sponges, brushes, etc.

8. Snack time

Ask a few learners to be helpers who serve juice, fruit, sandwiches to the others in their group. Remind learners to think about the people who grew the food and prepared it for them. Choose a learner to say a 'word of thanks' for the food, in their home language.

9. Music and movement ring

Learners make an inner and outer circle facing each other. The outer circle moves in a clockwise direction while the inner circle moves in an anti-clockwise direction. Shake a tambourine and then stop shaking it. When the tambourine stops, the learners shake hands with the learner opposite them and greet them using one of the greetings used before.

10. Outdoor play

Give learners gardening brooms, rakes and forks. They should help to tidy the garden, sweep the forecourt, rake up leaves, be directed to pull out weeds. Explain that weeds are not *ubuntu* or 'helper' plants; they take the food and water of other plants. Learners use bricks or stones to make a tidy border around flower/vegetable beds. If there is no garden let learners pick up litter as it too is not *ubuntu*.

11. Hand washing and toilet time

Learners hold hands and walk quietly to the bathroom. Remind learners to flush after using the toilet, and to wash and dry their hands. Remind learners to close the tap properly after use. Explain that looking after our environment, caring for our land and saving water are all part of practising *ubuntu*.

	Monday	Tuesday	Wednesday	Thursday	Friday
Arrival 15 - 30 minutes			Make a little welcome note for each learner: Dear I am so glad you are at school today. I HELP you and you HELP me. Decorate it with a little picture and place in the learner's locker. See their delight as they discover the note.		Ask learners to bring a hat for the 'h' sound table for next week. Make labels of describing words beginning with 'h', e.g. hot, hard, huge, high, heavy, happy, horrible.
Morning circle 10 - 15 minutes		Talk about the class as a community. Ask the learners 'How do I help you?' Let them share their ideas on this. Then ask, 'How do you help me?' Let them share their thoughts. Introduce the idea of teamwork. Talk about listening and talking sensitively to each other.			
Work time and small group time SMALL GROUP TIME: 10 - 15 minutes TOTAL TIME: 45 minutes		Work time activities: Literacy focus: Make 'h' mobiles. Learners draw pictures beginning with h and hang them from pieces of string attached to hangers. Creative/Life Orientation focus: Make 'charity' money boxes. Put small boxes, paint, textiles and glue on the table. Learners paint and decorate boxes. Make a slit in the top of each box. Learners will fill the boxes with plasticine coins (see next activity).	Work time activity: Numeracy focus: Place two dice, counters and plasticine at the work station. Learners throw both dice. Using counters they add the two numbers together and/or subtract the smaller number from the larger one. The answer is the number of coins they need to make from plasticine to fill the money box.		
	Small group time activity: Literacy focus: Introduce the letter 'h'. Teach the sound 'h/h' and not the letter name 'aitch'. Ask learners if anyone's name begins with 'h', e.g. Hanyani, Harry or Hannah. Ask learners to identify objects in the environment that begin with 'h'.	Small group time activity: Science/Technology focus: If possible make bread rolls with the learners. Make enough so learners can share the bread in pairs. Let learners experience the taste and texture of the dough. Learners should watch the dough rise. Discuss the differences between unbaked and baked dough. Learners practise <i>ubuntu</i> by sharing the bread roll with a partner. Learners complete Worksheet 2 in the Learners' Workbook.	Small group time activity: Literacy focus: Discuss being young and old. Ask learners what they call their grandparents, e.g. gogo, nntemoholo, oupa, granny. Learners talk about things that elderly people like to do. Ask how they can help elderly people they know. Let them make a card of appreciation for their grandparents or an elderly person in the community. Let them complete Worksheet 1 in the Learners' Workbook.	Small group time activity: Numeracy focus: Give each learner 8 buttons. Use story sums to get learners to build up and break down the counters to 8, e.g. Hannah serves 3 mugs of soup and Hanyani serves 3 mugs of soup at the old age home. How many cups of soup did they both serve? The learners use their counters to solve the story sums.	Small group time activity: Literacy focus: Learners make their own little books called <i>I like to help at home</i>. Learners illustrate their pages and then 'read' their pictures to you. Write a caption for each picture and help them read it by pointing to the words as you read. Let them show and read their books to each other.
	TIDY UP TIME HAND WASHING SNACK TIME				
Music and movement ring		Teach learners the <i>Playmotes</i> finger play on Poster 15. 		Teach learners the <i>It's time to clean up</i> song on Poster 15. While they sing, learners can all help each other clean up the mess that was made during the lessons... 	
Outdoor play	Numeracy focus: Let the learners stand in a circle. Count all the learners' hands in the classroom. Ask a few learners to hide their hands behind their backs and count again. Ask: 'Are there more or fewer hands?' Repeat.	Creative focus: Let each learner trace around their body on newsprint. Help them cut it out and let them paint it. When it is dry, paint or print one letter of the words 'UBUNTU I HELP YOU AND YOU HELP ME' onto each one. Decorate an outside wall with these cut-outs.	Let learners get into pairs and use their bodies to make the letter 'H'. 		
Story time	Look at the pictures in the story <i>I like to help</i> in the Big Book. Ask learners what they think the story is going to be about (picture analysis and prediction skills). 		Role-play how to ask for help. 		Re-read page 1 of the story <i>I like to help</i> with the learners. Add in sentences describing what they do to help.

1. Literacy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- listened to the story *I like to help*
- used the illustrations in the story to identify objects and experiences
- recounted personal stories of helping others
- identified the 'h' sound at the beginning of words
- recognised the symbol for 'h'
- identified words beginning with 'h'
- read from the book they made on how they help at home
- pointed to the words when they 'read'
- sang and recited songs
- practised the formation of the letter 'h'
- used language for learning

This assessment task may take several days to complete..

TASK

Part one

- Allow the learner to look at the pictures on each page of the story *I like to help*.
- Close the book.
- Ask the learner to tell you about two tasks that the child in the story likes helping with at home.
- Then ask the learner to tell you about two tasks the child likes helping with at school.
- Ask the learner what they do at home and at school to help.

Part Two

- Put picture cards of the following on the table: *hat, house, horse, hand, dog, pot, boat, cloud*.
- Mix up the cards. Ask the learner to 'read' the cards.
- Now ask the learner to pick up all the cards that begin with h. Remember to say the sound 'h/h' and not the letter name 'aitch'.

Part Three

- Place the following alphabet letters on the table: c, p, t, s, h, q.
- Ask the learner to 'read' each letter.
- Ask the learner to make a word that begins with the letter sound.
- Repeat until the learner has 'read' all the letter symbols.

Part Four

- Let the learner use the *I like to help* book s/he made.
- Ask the learner to show you the front of the book and the back of the book.
- Ask the learner to open the book and point to the first picture. Let the learner tell you about the picture.
- Now ask the learner to point to the words under the picture. Let the learner 'read' the sentence.

Assessment checklist

Use this assessment checklist to assess the task above

Grade R Term 3		
Checklist for Literacy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Remember events from a story		
2. Use a story to recognise common experiences		
3. Recognise initial sounds of words using picture cards		
4. Select picture cards that begin with 'h' from a group of cards		
5. Recognise the letter 'h' from a group of letters		
6. Read single letters		
7. Role-play reading: turn pages appropriately		
8. Hold a book the right way up		
9. Look at words and pictures and understand the relationship between them		
10. Use pictures to construct ideas		
11. Distinguish pictures from print (e.g. by pointing at words rather than pictures when 'reading')		

Copy this rubric. You will need one for each learner.

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- counted to 10
- broke and built up numbers to 8
- solved verbally stated addition and subtraction problems in the range of 1-8
- used mathematical language to express problem-solving strategies and techniques.

This assessment task may take several days to complete. You can do it on a one-to-one basis with each learner or in a small group.

TASK

Part one

- Place 10 counters on the table.
- Ask the learner to count them one by one.

Part Two

- This activity must be done on the carpet.
- You will need 8 bottle tops and a small box plus the numeral and word flashcards for numbers 1 to 8 (found in the Resource Book).
- Ask the learner to count the bottle tops and tell you how many there are. They will count 8.
- Let them find the matching numeral and word card for 8.
- Tell the learner to put all the bottle tops into the box, shake it and toss them onto the carpet.
- Some bottle tops will be facing upwards and others will be facing downwards when they land.
- Let the learners count those facing upward first. Ask the learner to find the matching numeral and word card.
- Now ask the learner to count the bottle tops facing downwards. Again, let the learner find the matching numeral and word card.
- Finally, ask the learner to count both groups and see how many there are all together (will add up to 8).
- Repeat.

Part Three

- Provide the learner with counters.
- Give simple theme-related story sums for the learners to solve. Some are provided for you here:
 - Hanyani serves 6 cups of soup and Hannah serves 2 cups. How many cups do they serve altogether?
 - Happy helps by washing the dishes. She washes 7 plates and 1 glass. How many things does she wash altogether?
 - Hendrik walks 4 dogs in the morning and 4 dogs in the evening. How many dogs does he take for a walk every day?
 - Hussein has 8 jerseys. He gives 3 away to the poor. How many jerseys does he have left?

Grade R Term 3		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
1. Count objects to 10		
2. Break down and build up numbers to 8		
3. Match the numeral and word for the number of objects (to 8)		
4. Add and subtract verbally stated number problems		
5. Use mathematical language to describe understanding of concepts		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners engaged in various life skill-linked activities that required them to talk about how they can help at home, at school and in the community. Use the checklist below to record your observations of the learners over the last two weeks.

Show learners these pictures and ask them to tell you

- Why does this person need help?
- How does this person feel?
- How can you help?
- How will this person feel after you've helped?

See if learners are able to apply what they have learnt over the past two weeks when looking at these pictures. Write your observations in your record book. These questions should help you with your observations:

- Can the learner identify that these people are in need of help?
- Can the learner recognise what help they need?
- Does the learner show empathy for these people?
- Can the learner suggest practical and achievable ways in which to help?
- Does the learner respond appropriately to the pictures?

Phonics focus: b

Day: Tuesday

Term: 4

Big Book story: *A spring surprise*
Poster: New life

1. Arrival time

Greet learners. Ask learners if they noticed the new spring leaves and blossoms on the trees. Remind them to keep their lockers neat and tidy. Let them give their lockers a 'spring clean'.

2. Health check

Arrival time is a good time to do a quick and discreet check on each learner's personal hygiene. Check that the learners' hair is clean and groomed. Check for lice/nits. If there is a problem let the caregiver know immediately as it is highly contagious.

3. Morning circle

Welcome learners to ring. Use the weather board to introduce the topic of spring. Discuss the four seasons. Learners say how they know when it is winter or summer. Read the theme message: today we are learning about spring. Use Poster 16 to help learners identify all the things that happen in spring-time. Attach flashcards where needed.

4. Work time

Go outdoors. Look for signs of spring/new life. Talk about different animals and how they bring babies into the world: mammals give birth to live young; reptiles and birds lay eggs. Ask them to think about why many animals give birth at this time of year.

Put out plastic animals – try to include sets of mother animals and their babies for learners to group (pair) together. If possible, supply leaves and old plastic flowers for learners to create gardens. Paint a flat piece of packing styrofoam green and let learners stick the leaves and flowers into it.

Work time: work stations

Creative table: Put an egg-shaped template (which you have made beforehand), broken egg shells and glue on the table. Learners glue the egg shells pieces onto the templates.

Numeracy table: Put paper, ink and ear/eyedroppers on the table. Learners fold paper in half, drop some ink onto the fold line, then fold the paper in half spreading the ink with their hands. They open up to reveal the butterfly.

Literacy table: Let learners cut out pictures of babies and the letter 'b' from magazines and make a little collage to take home.

Science and technology table: Let learners make plasticine silkworms while observing real silkworms in a box.

Literacy/reading corner: If possible play some musical rhymes for learners to listen to.

5. Small group time

Introduce the letter 'b' to the learners. Remember to teach the sound 'buh' and not the letter name 'bee'. Make a big letter b and draw eyes, nose and mouth into the round part of the 'b' so that it looks like a baby's face. Identify learners whose names begin with 'B'. Ask what other sounds start with 'b'. Let learners cut out or draw pictures of objects that begin with the 'b' sound.

6. Tidy up time

Divide learners into small groups. Give each group a different animal name (frog, silkworm, etc.) and a specific tidy-up task. Use an egg timer to show when time is up. The group that completes tidying first is the winner. Clap to reward them and stick a star on their foreheads.

7. Hand washing

Learners wash hands before snack time. They line up like butterflies and 'fly' quietly to the bathroom. At the basins remind learners to keep the area clean. Discuss why keeping clean is good for our health. Remind learners to close the tap properly after use. Remind learners to save water – a precious resource in short supply in South Africa.

12. Story time

Talk about the poster. Read the sight words with the learners. Encourage learners to use the sight words in sentences.

Turn to the story *A spring surprise* on page 46 of the Big Book. Ask: 'What is a surprise? Do you like surprises? What surprises you?' Look at the pictures and ask the learners to say what they can see.

They predict what the story is about. Read the story. Discuss how the child in the story feels on pages 1, 2 and 3. This is a rhyming story (in English) so at the end of it say some of the words aloud and get learners to think of words that rhyme. Here is a list of words from the story to use: eggs, butterfly, bees.

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery. Use Poster 16 as a backdrop for the theme table. Place a green tablecloth on the table.

New life

Place toy animals on the table. Try to find sets that have baby animals too. Label the parent and baby animal with the correct names. Have pictures of blossoms and buds. Place a bird's nest on the table and label this too. Cut some twigs with spring blossoms and place them in a jar of water on the table. Place books about babies, animals and their young, and spring on the table too.

Fantasy corner

Have a selection of animal masks and outfits for learners to dress up in. You can make these from cheap materials. Also include soft and plastic animals. Provide dolls with baby products, e.g. nappies, baby powder, pram.

8. Snack time

Ask a few learners to be helpers who serve juice, fruit and sandwiches to the others in their group. Remind learners to respect their food and not to play with it or waste it. Choose a learner to say a 'word of thanks' for the food. Remind learners that many animals have babies at this time because the weather is warmer and there is food at this time.

9. Music and movement ring

Remind learners that they were once babies too. Show them a photo of yourself as a baby. Explain that every grown person (even their granny, grandpa, mom, dad) was once a baby. Let learners show photos of themselves as babies. Learners wiggle like a newborn baby, crawl like a baby, totter like a toddler, walk like a child, stride like an adult, shuffle with a 'stick' like an old person. Play appropriate music and let learners move like growing flowers to the music. Sing and act out *Frogs jump*, *caterpillars bump* on Poster 16.

10. Outdoor play

Let learners pretend to be tadpoles swimming around. Ask them to wriggle and dart, jump up and down and spin around as they 'swim'.

Follow up: Learners note each stage of metamorphosis. (This will take approximately 12 weeks.) They use plasticine to make their own tadpoles and frogs, matching the developmental stages over time. They can complete Worksheet 3 at the end of the 12 weeks.

11. Hand washing and toilet time

Learners walk like baby chicks to the bathroom. Remind learners to flush after using the toilet, and then to wash and dry their hands. Remind learners to close the tap properly after use.

Arrival
15 - 30 minutes

Monday	Tuesday	Wednesday	Thursday	Friday
			Welcome each learner. Remind learners to check that their lockers are tidy.	

Morning circle
10 - 15 minutes

Welcome learners. Learners share weekend news.	Talk about the value of family. Include family member roles.	HEALTH CHECK		
				

Work time and small group time

SMALL GROUP TIME:
10 - 15 minutes

TOTAL TIME:
45 minutes

Work time activities: Literacy focus: Let learners make the letter b from salt dough. See pages 4-5 of the Resource Book. Natural Sciences focus: Talk about animal skin, hair and fur. Put different pieces of fabric into a bag and let learners take turns describing what they feel, e.g. smooth, furry, rough etc. Creative focus: Learners make paper blossoms by rolling crepe paper into tiny balls. Glue these onto a tree trunk you have prepared from cardboard. Learners can also glue little feathers onto trees for birds.	Work time activities: Numeracy focus: Learners make long and short strings of beads.		
Small group time activity: Literacy focus: Have pictures of baby animals. Ask learners if they know the baby and adult animal names. Cut Worksheet 4 into separate cards. Learners 'read' the name of each animal and baby (e.g. elephant-calf). Learners draw their own animal mother and baby picture and colour it in. Help learners label their pictures. Learners talk about their picture with a partner. Staple all the pages together to make a class reader. Learners role-play reading from it.	Small group time activity: Numeracy focus: Talk about the life cycle of a butterfly. Use large egg trays and cut them into strips of varying lengths. Have learners make caterpillars from egg cartons. They can use paint, pipe cleaners and other materials to decorate their caterpillars. Let learners compare the lengths of their caterpillars. They use words such as longer and shorter.	Small group time activity: Numeracy focus: Let learners make plasticine animals. Give them toothpicks or matches to make the legs. Learners count how many legs each creature has. They also count how many legs two and three animals have.	Small group time activity: Numeracy focus: Learners explore the symmetry of various items using mirrors placed horizontally in the centre of an image. Look for other examples of symmetry in the environment.
			

Music and movement ring

	TIDY UP TIME HAND WASHING SNACK TIME		
	Teach learners the words and actions for <i>Frogs Jump</i>, <i>caterpillars bump</i> on Poster 16. Learners dramatise the caterpillar/butterfly life cycle.		Learners hop like frogs. Teach learners to sing and act out <i>Five green and speckled frogs</i> or Poster 16.

Outdoor play

Have a table with a doll and nappies, baby bottles, dummy, powder, blanket, potty, baby bath, etc.	Science and technology focus: Have beans, cottonwool, small plastic containers and a jug of water on the table. Ask learners what they think these materials will be used for. Let them give input to the steps they need to take to plant the beans. Learners plot the bean's growth on Worksheet 2. This activity will take several weeks to complete.	Hide pictures of different small creatures on trees and shrubs. Learners look for, find and identify each creature.	Put out different examples of eggs (from a hen, duck, ostrich, etc.), a collection of feathers and books about birds.	Creative focus: Let learners mud paint outside with their bare feet. Put out newspapers, and separate trays containing wet mud, green, pink and white paint.
				

Story time

Read the story <i>A Spring Surprise</i> in the Big Book. Learners talk about newborn babies and what they are able to do.	Invite an elder to the classroom to share traditional stories about animals with the learners.		
---	---	--	---

1. Literacy assessment

This assessment task will assess Learning Outcome 1: Listening. This is a very important skill which is sometimes taken for granted and overlooked. The list below details some of the things learners did over the last two weeks. (Note: the informal assessment task that follows focuses specifically on listening.) Over the last two weeks learners:

- listened to the story *A Spring surprise*
- identified rhyming words in the story
- used their imagination to make up other rhyming words
- recounted personal experiences of events that surprised them or a member of their family
- identified the 'b' sound at the beginning of words
- recognised the symbol for 'b'
- identified words beginning with 'b'
- drew pictures of baby animals and their mothers and used known letters to construct meaning
- made a class reader and 'read' from the reader
- pointed to the words when they 'read'
- sang and recited songs
- practised the letter formation of the letter 'b'
- used language for learning.

This assessment task may take several days to complete. Parts 1-3 are done with each learner on their own. Part 4 is done in pairs or in a small group. Before beginning any of these tasks, make sure that you explain very clearly what you want done. Do not speak fast and make sure you use simple language that the learners understand.

TASK

Part one

- This part of the task assesses the learner's ability to follow verbal instructions.
- Prepare the following picture cards in advance. You can draw the pictures or cut them from magazines. Paste them onto cardboard.
- Place the cards in a pile on the table.
- Ask the learner to take three cards and put them in a row face-up on the table.
- Now ask them to pick up four cards and place them in a row under the first row.
- Repeat this type of request, changing the number and position of the cards each time.
- When all the cards are packed out on the table, begin with Part Two.

Part Two

- Part Two of this task assesses the learner's ability to follow multiple instructions in a single command.
- Ask the learner to point to three of the cards, e.g. Please point to the bee, the baby and the butterfly.
- Repeat. If the learner is able to select three cards with ease, increase the number of cards that they must remove from the set.

Part Three

- This part of the activity focuses on rhyming words.
- Say a word that rhymes with at least one of the pictures on the table, e.g. 'see'.
- The learner must find and remove the picture cards that rhyme with this word, e.g. 'bee', 'tree'.

Part Four

- Work with two or more learners.
- Show them a picture of an animal. Ask them questions about this animal, for example:
 - What is its name?
 - Where does it live?
 - What type of body covering does it have? Why?
 - What does it eat?
 - What is the name of the baby animal?
 - Would you like to have this animal as a pet? Why?
- Observe how the learners interact with each other.

Assessment checklist

Use this assessment checklist to assess the task above

Listening checklist		
Name:	Date:	
The learner is able to:	Yes	No
Listen and respond to multiple instructions: Part One		
Listen and respond to multiple instructions: Part Two		
Listen and respond to multiple instructions: Part Three		
Listen to, understand and respond to multiple instructions: Part Four		

Copy this rubric. You will need one for each learner.

4 Well developed	3 Age appropriate	2 Still developing	1 Intervention needed
------------------	-------------------	--------------------	-----------------------

2. Numeracy assessment

This assessment task will assess whether the learners have understood and can apply the concepts taught in this theme. Over the last two weeks learners:

- investigated symmetry in nature (the environment)
- worked concretely comparing the length of objects
- created own patterns
- used mathematical language to express problem-solving strategies and techniques.

This assessment task may take several days to complete. You can do it on a one-to-one basis with each learner or in a small group.

TASK

Part one

- Place 10 counters on the table.
- Ask the learner to count them one by one.

Part Two

- Place three cardboard inner tubes/rolls of different lengths (from paper towels, tin foil, toilet paper, etc.) on the table.
- Ask the learner to sort them from longest to shortest.
- Let them verbalise what they have done.
- Now ask them to point to the longest/shortest tube.

Part Two

- You will use the pegboard patterns in the Resource Book.
- Cover half of the image with a sheet of white paper and ask the learner to build this half using their pegs and pegboards. (If you do not have these in your classroom see pages 4-5 in the Teacher's Guide for how to make your own).
- Repeat with a few other pictures.

Grade R Term 4		
Checklist for Numeracy Assessment Task		
Name:	Date:	
The learner is able to:	Yes	No
Measurement		
1. Sort objects according to their length, e.g. from shortest to longest		
2. Use language related to measurement, e.g. long, longer, longest, short, shorter, shortest		
Symmetry		
3. Copy patterns		
4. Approach the task in a logical way / use own methods to copy		
5. Complete an incomplete symmetrical picture		
6. Use mathematical language to describe what s/he is doing		

Copy this rubric. You will need one for each learner.

3. Life skills assessment

Over the last two weeks learners used their bodies to represent animals in nature and move as they do. These activities link to Life Orientation Learning Outcome 4 as well as to Arts and Culture (Dance).

Use the following statements to guide your comments in your observation book.

- Explores different ways to locomote (move), rotate (turn), elevate (lift) and balance.
- Performs expressive movements using different parts of the body. For instance, can they wriggle their arms and legs like tadpoles?
- Through play, co-ordinates simple gross and fine motor movements.
- Through play crosses the mid-line.
- Draws on play, fantasy and imagination to explore a wide variety of movement words, e.g. crouch, bend, jump, skip, run, spin.
- Draws on play, fantasy and imagination to explore a wide variety of changes in tempo, i.e. fast, slow.
- Participates in simple dances based on formations and patterns.
- Talks about own dancing using action words.
- Responds to movement instructions that cover space without bumping or hurting others when moving forwards and backwards.

DAILY PLANNER: Weeks 33 and 34

This is where people live

Phonics focus: d

Day: Monday

Term: 4

Big Book story: *Who lives here?*

Poster: This is where people live

1. Arrival time

Make little doors for each locker or hook. Colour and pattern them differently, e.g. blue dots, red diamonds. Greet the learners individually. Ask them to make sure their lockers are tidy. They collect the door and bring it to morning circle to talk about the colour and shapes. Swap doors tomorrow.

2. Health check

As you greet the learners, carefully check their general appearance. Check for runny noses, coughing and general wellbeing. Sick learners should not come to school as they could be contagious. Contact parents and caregivers if their child should return home.

3. Morning circle

Invite the learners to sit on the carpet. Ask learners to tell you what they did in preparation for coming to school and where in their home they did it, e.g. 'I woke up in my bed in my bedroom, went to the bathroom where I washed my face' etc.

4. Work time

Use Poster 17 and the theme table to introduce the theme: This is where people live. Begin by asking learners where they live and gradually over a period of days expand the theme to where other people live. (You could even bring in an international perspective, e.g. boathouses in Europe and the Far East.)

Work time: work stations

Science/technology table: Set out building materials. If possible provide a magnifying glass and wood, brick, canvas, sand paper, sand etc. Learners examine these and say what each item feels and looks like. Let learners sand pieces of wood with sandpaper.

Literacy table: Learners make a little book titled 'Where do you live?' On the inside they draw a picture of their home and if possible label it, using the flashcards on the theme table to help them.

Creative table: Learners paint a picture of a house with sand paint (see pages 4-5 of the Teacher's Guide) and add twigs and leaves to create gardens around their sand house.

Numeracy table: Numeracy focus: Learners make a small floor covering. Put out paper shapes in different colours and sizes. Give each learner a piece of paper on which you have drawn a square. Let learners use the coloured cut-out shapes to fill the square. They can pretend to be carpet makers or tilers. Ask them to name the shapes as they work. Display learners' squares together to make a big 'carpet' that covers the bulletin board.

Fantasy focus: Have a builder's outfit, builder's plans (if possible), toy tools and tool boxes available in the fantasy area. Learners can pretend to be builders and build 'houses' with chairs, tables, cloths, etc.

5. Small group time

Look at the pictures of the different homes. Ask: What do all these homes have in common? (roofs, windows, doors, etc.) How do we get inside them? (through the door) What are doors made from? What shape are they? What sound does 'door' begin with? Let learners put up their hands if their names begin with 'D'. Let them think of other words that begin with 'd'.

Introduce the letter 'd'. Let learners trace the letter in a sand tray. Trace a letter 'd' on the floor with chalk or string and let learners 'walk' it. Let learners draw a letter 'd' on a piece of paper. Then let them glue sawdust or wood shavings onto it. Pin these up on the bulletin board.

6. Tidy up time

Learners tidy up the different focus areas. Let them pretend that they are tidying up a building site. They throw away waste and put scraps of paper into the recycling box. Check that learners have put away the items in the correct place.

7. Hand washing

As learners wash their hands, sing *Fingers all:*

Tommy Thumb, Tommy Thumb, where are you?

Here I am, here I am and how do you do?

Repeat for the other fingers, e.g. Peter Pointer, Middle Mike, Ruby Ring, Baby Small.

12. Story time

Turn to the story *Who lives here?* on page 49 of the Big Book. Show learners the pictures on each page. See if they are able to identify each of these places as a home. Let learners try to guess the theme of the story. Discuss what a home is (a place that provides shelter and safety).

This story contains a great deal of repetition so encourage learners to read along with you by pointing to each word as you read it. Use the flashcards from the Resource Book (see page 20) and practise completing the sentence strip: Where do you live? I live in a

Theme table

Use the following ideas to create a theme table to stimulate discussion and discovery.

Use Poster 17 as a backdrop for the theme table.

Place a brown or black tablecloth on the table.

Where people live

Create a street plan on the tablecloth. Use toys or home-made buildings to create a three-dimensional 'map'.

Place small cars and little toy people in and around the scene. Have pictures of animal homes and homes around the world on the bulletin board. Label these pictures.

If possible place a dolls' house on a table and label the different rooms. If not, make a house with rooms out of simple shapes and place this on the table.

Put books about different homes on the table or in the library corner.

Fantasy corner

Change this area every two or three days to represent a different room (or area) in the home, e.g. a kitchen, a bathroom, a playroom.

Provide matching accessories for learners to play with, e.g. kitchen utensils, objects usually found in a bathroom like soap, a towel, shampoo, etc.

8. Snack time

Let learners pretend that they are eating at a building construction site, e.g. sitting on a scaffold. Show them a picture of what this looks like. Tell them to sit carefully in one place as they eat.

9. Music and movement ring

Sing and move to *This is the way we build our house* sung to the tune of *Here we go round the mulberry bush*:

This is the way we build our house

Build our house, build our house

This is the way we build our house

So early in the morning

You can add the following verses:

This is the way we lay the bricks

This is the way we tile the floor

This is the way we saw the wood

This is the way we bang in the nails etc.

Let learners make noises to accompany the actions, e.g. Bang! Bang!

10. Outdoor play

Place a variety of cardboard boxes in the outdoor play area. Let learners build (construct) houses from the boxes. Encourage them to build carefully and safely. Let them make noises to accompany their actions.

Get learners to role-play requests, e.g. Please would you pass me the hammer? May I please have some of those big nails?

11. Hand washing and toilet time

Learners hop like daddies to the toilet, saying d-d-d-d along the way. Make sure that learners flush the toilet after using it. Remind every learner to wash and dry their hands after using the toilet.

WEEKLY PLANNER: Weeks 33 and 34

This is where people live

Arrival
15 - 30 minutes

Cut out pictures of different homes. Prestik a different home to each learner's locker.

Welcome the learners back after the weekend and tell them to put their bags away in their lockers and to collect the picture that they find there.

Swap the pictures of the homes around (see above) so that the learners find a new picture on their locker each day. Ask: "Who has the caravan? Who has the tent?" etc. (This is a useful auditory perceptual exercise.)

HEALTH CHECK

Morning circle
10 - 15 minutes

Ask each learner to show the picture of the house they found at their locker.

Discuss each type of home.

Discuss the sequence in which a house is built.

Design your own sequencing cards for learners to complete.

Remember the weather board and continue to use it regularly.

Play recorded household sounds, e.g. tap running, toilet flushing, cutlery clanging, doorbell ringing, etc.

Learners can use Poster 17 to identify the rooms where these sounds are made.

Learners share stories about their grandparents' homes, e.g. in the past, toilets were not built inside but rather outside the house.

Work time and small group time

SMALL GROUP TIME:
10 - 15 minutes

TOTAL TIME:
45 minutes

Small group time activity:
Numeracy focus: Remember to count daily! Count the buildings on Poster 17. Count windows, chalk an area and count the tiles or bricks. Let learners make pegboard and Unifix block houses. Ask them to look at both sides of each house (all of these pictures are symmetrical). Learners complete Worksheet 2 in the Learners' Workbook.
Literacy focus: Make a large letter 'd' door for the sound table. Display items inside (behind) the door that begin with 'd', e.g. desk, dog, donkey, dinosaur, dish.

Small group time activity:
Literacy focus: Use Poster 17 to introduce a discussion about rooms in the home. Remember to be sensitive – some learners may live in one-roomed/ multifunctional-roomed homes. Talk about the fittings and furnishings that go into each room (or area of the room). Allow learners to complete Worksheet 2 in the Learners' Workbook.
Creative focus: Learners make doodle patterns. Ask what sound the word 'doodle' begins with and how many times they can hear the 'd' sound (twice).

Small group time activity:
Numeracy focus: Discuss the different tools and materials used for building a house. Give each learner 10 counters. Use theme-related story sums to practise subtraction, e.g. Bob has 8 nails. He hammers 4 nails into the door. How many are left? Learners use their counters to work out the problems.

Small group time activity:
Life skills focus: Show Poster 17.
Ask learners to identify some of the other buildings near where they live, e.g. shop, clinic, school, post office.

Discuss why each of these places is needed and what they are used for. Practise teaching learners their addresses.

Small group time activity:
Literacy focus: Pin a map (commercial or hand-drawn) of your local area onto the board. Use a drawing pin and flashcard to mark your school. Then mark where each learner lives with drawing pins and name tags. Use pieces of string to see who lives closest to/furthest away from school.

Music and movement ring

Learners recite the A very nice place finger play, using different animals.

TIDY UP TIME HAND WASHING SNACK TIME

Play a piece of appropriate music e.g. *Carnival of the Animals* by Camille Saint Saens.

Let learners listen and imagine what animals they hear.

Then let them move accordingly.

Outdoor play

Play dodge-ball. Learners stand in a circle. Choose 3 learners to stand inside the circle.

The outside learners take turns to throw a soft ball into the circle to try and 'hit' the 3 learners in the middle. Learners swap when one is hit by a ball.

Remind learners to throw gently!

Take learners on a neighbourhood walk to observe houses in the community.

Let learners pretend to be builders.

Let them pretend to mix cement, lay bricks, knock in nails, screw in screws, etc.

Story time

Let the learners retell the story *Who lives here?*

Look at the story *Who lives here?* And ask: What is the difference between the homes on the first page (for people) and the homes in the rest of the story (for animals)?

Which animal home would you like to live in?

Remind learners about the home safety rules which they learnt about during the 'Keeping safe' theme.
